Effects of using International Financial Reporting Standards (IFRS) in the EU: public consultation

Fields marked with * are mandatory.

Impact of International Financial Reporting Standards (IFRS) in the EU: public consultation

Purpose of the consultation

The European Commission is holding a public consultation to seek views from all interested parties on their experience of Regulation 1606/2002 ("the IAS Regulation"). The results of this public consultation will feed into the European Commission’s evaluation of the IAS Regulation.

Background

Applying internationally accepted standards - the International Financial Reporting Standards (IFRS) – means standardising companies' financial reporting to make financial statements more transparent and comparable. The ultimate aim is for the EU capital market and the single market to operate efficiently.

Scope of the IAS Regulation

The IAS Regulation states that the IFRS must be applied to the consolidated financial statements of EU companies whose securities are traded on a regulated EU market. EU countries may extend the application of IFRS to annual financial statements and non-listed companies (view an update on the use of options in the EU). The Transparency Directive (2004/109/EC), as subsequently amended, also stipulates that all issuers (including non-EU ones) whose securities are listed on a regulated market located or operating in an EU country must use IFRS.

Impact of the IAS Regulation

The implementation of IFRS in the EU has had an impact on cross-border transactions, trade, the cost of capital, investor protection, confidence in financial markets and stewardship by management. However, it is difficult to differentiate their impact from that of other significant factors, including other regulatory changes in the EU and internationally.

Developments since adoption

Over 100 countries now use IFRS. These accounting standards have been increasingly discussed at international level (e.g. G20, Basel Committee) and with various interested parties in the EU, especially in the wake of the financial crisis.
Several initiatives concerning technical issues and governance are under way at both international and EU level. In the EU, the Maystadt report’s recommendations are being implemented. These are designed to strengthen the EU’s contribution to achieving global and high quality accounting standards by beefing up the role of the European Financial Reporting Advisory Group (EFRAG), which advises the Commission on IFRS matters.

Current Commission evaluation

The Commission is evaluating the IAS Regulation to assess:

- IFRS’s actual effects
- how far they have met the IAS Regulation’s initial objectives
- whether these goals are still relevant
- any areas for improvement.

This consultation is part of the evaluation process. The questionnaire was drafted with the help of an informal expert group which is to assist the Commission throughout the process.

Target group(s)

Any interested party – commercial, public, academic or non-governmental, including private individuals.

Especially: capital market participants and companies preparing financial statements or using them for investment or lending purposes (whether or not they use IFRS).

Consultation period

7 August — 31 October 2014 (12 weeks).

How to submit your contribution

If possible, to reduce translation and processing time, please reply in one of the Commission’s working languages (preferably English, otherwise French or German).

Contributions will be published on this website with your name (unless – in your response – you ask us not to).

N.B.: Please read the specific privacy statement to see how your personal data and contribution will be dealt with.

Reference documents and other, related consultations

- IAS/IFRS standards & Interpretations
- IFRS Foundation
- European Financial Reporting Advisory Group (EFRAG)
- Commission reports on the operation of IFRS

Results of public consultation & next steps

The results will be summarised in a technical report and will feed into the evaluation report to be presented by the Commission in line with Article 9.2 of Regulation 258/2014.
Please note that some questions do not apply to all groups of respondents.

**Who are you?**

1. In what capacity are you completing this questionnaire?

   If it's *not* on behalf of an organisation, please indicate that you are a "private individual".

   - Company preparing financial statements [some specific questions for preparers marked with ‘P’]
   - Company using financial statements for investment or lending purposes [some specific questions for users marked with ‘U’]
   - A company that both prepares financial statements and uses them for investment or lending purposes [some specific questions for preparers and users marked with ‘P’ and ‘U’]
   - Association
   - Accounting / audit firm
   - Trade union / employee organisation
   - Civil society organisation / non-governmental organisation
   - Research institution / academic organisation
   - Private individual
   - Public authority [one specific question for public authorities marked with ‘PA’]
   - Other

1.4.1. How many organisations do you represent?*

> FEE (Fédération des Experts-comptables Européens – Federation of European Accountants) is an international non-profit organisation based in Brussels that represents 47 institutes of professional accountants and auditors from 36 European countries, including all of the 28 EU member states.

> FEE has a combined membership of more than 800,000 professional accountants, working in different capacities in public practice, small and large accountancy firms, businesses of all sizes, government and education – all of whom contribute to a more efficient, transparent and sustainable European economy.

1.4.2. What type of business do you represent?*

   - Industry
   - Banking
   - Insurance
   - Other
FEE has a combined membership of more than 800,000 professional accountants, working in different capacities in public practice, small and large accountancy firms, businesses of all sizes and industries, government and education.
2. Where is your organisation/company registered, or where are you located if you do not represent an organisation/company? Select a single option only.*

- EU-wide organisation
- Global organisation
- Austria
- Belgium
- Bulgaria
- Croatia
- Cyprus
- Czech Republic
- Denmark
- Estonia
- Finland
- France
- Germany
- Greece
- Hungary
- Ireland
- Italy
- Latvia
- Lithuania
- Luxembourg
- Malta
- The Netherlands
- Poland
- Portugal
- Romania
- Slovakia
- Slovenia
- Spain
- Sweden
- United Kingdom
- Norway
- Iceland
- Liechtenstein
- Other European country
- Other
3. What is the name of the organisation or authority you represent? If you are part of a group, give the name of the holding company as well.*

FEE (Fédération des Experts-comptables Européens – Federation of European Accountants)

4. In the interests of transparency, we ask organisations to supply relevant information about themselves by registering in the Transparency Register (http://ec.europa.eu/transparency/register). If your organisation is not registered, your submission will be published separately from those of registered organisations. Is your organisation registered in the European Parliament/Commission Transparency Register?*

☐ Yes
☐ No

4.1. Please give your registration number.*

4713568401-181

5. In the interests of transparency, your contribution will be published on the Commission's website. How do you want it to appear?*

☐ Under the name supplied? (I consent to the publication of all the information in my contribution, and I declare that none of it is subject to copyright restrictions that would prevent publication.)

☐ Anonymously? (I consent to the publication of all the information in my contribution except my name/the name of my organisation, and I declare that none of it is subject to copyright restrictions that would prevent publication.)

Relevance of the IAS Regulation

Objective
6. The rationale for the IAS Regulation, imposing internationally accepted standards - the International Financial Reporting Standards (IFRS) - was to make companies use the same set of accounting standards, thus ensuring a high level of transparency and comparability of financial statements. The ultimate aim was to make the EU capital market and the single market operate efficiently.

In your view, are the Regulation's objectives still valid today?

- Yes
- No
- No opinion

6.1. Comments.

- The main objective of the IAS Regulation is to make the European Union (EU) capital market and single market operate efficiently. Today, capital markets are structured in an even more globalised manner than they used to be, which leads to an increasing need for a single financial reporting framework.
- Global standards are therefore necessary for and of benefit to the EU.
- The global character of IFRS allows the improvement of the quality, comparability and reliability of financial information.
- These are crucial benefits for the EU in remaining competitive, for attracting foreign investment and for restoring confidence in European financial markets.
- The adoption of IFRS in the EU has made it possible for listed EU companies to access international capital markets (including in the USA) with their IFRS based financial statements without any further reconciliation or preparation of other financial information.
- FEE believes that the IAS Regulation's objectives are still valid.

7. The IAS Regulation refers to IFRS as a set of global accounting standards. Over 100 countries use or permit the use of these standards. The US, for instance, allows EU companies listed in the US to report under IFRS. However, it continues to rely on its "generally accepted accounting principles" (GAAPs) for its domestic companies' financial statements, while the EU requires IFRS to be used for the consolidated accounts of EU listed companies.

Has the IAS Regulation furthered the move towards establishing a set of globally accepted high-quality standards?

- Yes
- No
- No opinion
7.1. Please explain.

- The IAS Regulation of 2002 demonstrated Europe’s leadership and paved the way for IFRSs to be a global set of standards. Many jurisdictions have followed the EU’s lead in adopting IFRSs with the number of jurisdictions and the scope of adoption (for example Japan) still expanding.
- Furthermore, according to the “IFRS as global standards: a pocket guide” (issued in July 2014 by the IASB) the non-EU users of IFRS have a combined GDP of US$23 trillion while the EU IFRS users account for US$17 trillion. This indicates that despite the EU being the largest single user of IFRS, IFRS are used by other users that in total form a larger group.
- EU companies seek capital from international markets and in doing so require a reliable, relevant, robust and globally accepted set of standards. In FEE’s opinion IFRS can serve this purpose. The fact that IFRS are now being applied to more than 100 countries shows that the IFRS are considered as a robust and high quality set of financial reporting standards.

Scope

8. The obligation to use IFRS as set out in the IAS Regulation applies to the consolidated financial statements of EU companies whose securities are traded on a regulated market in the EU. There are about 7,000 such firms.
In your view, is the current scope of the IAS Regulation right (i.e. consolidated accounts of EU companies listed on regulated markets)?

☐ Yes
☐ No
☐ No opinion

8.1. How would you propose it be changed?

☐ By making IFRS compulsory for the individual annual accounts of listed companies on regulated markets
☐ By making IFRS compulsory for the consolidated accounts of large non-listed companies
☐ By allowing any company to opt for reporting under IFRS
☐ Other
8.2. Comments.

- In some instances listed entities are not required to prepare consolidated financial statements (since they do not have any subsidiaries), and this means that they are not required to present financial statements under IFRS even though their equity and/or debt is publicly traded. FEE suggests that the scope of the IAS regulation should be updated to include those entities that are listed and are not currently required by the IAS regulation to present consolidated financial statements.
- In addition, in FEE’s opinion reporting under IFRS should be available for entities that are currently not included in the scope of the IAS Regulation. This would be beneficial if the entity seeks to go public in the future. Therefore we suggest that reporting under IFRS should be available for every company irrespective of the member states’ options (refer to Question 9).
- The scope of the IAS Regulation covers only those companies that are traded on a regulated market in the EU. Consideration might be given to extending that scope, in the context of the wider application of the small and medium sized companies reliefs that will be introduced by the EU Accounting Directive. For some entities, such as small biotech companies, there is a risk that they might otherwise qualify as small or medium. Although it might be expected that the related stock exchanges would put requirements in place to prevent those companies from issuing financial statements which take advantage of the related reliefs, it might be desirable for there to be EU-wide requirements.

9. National governments can decide to extend the application of IFRS to:
   - individual annual financial statements of companies listed on regulated markets
   - consolidated financial statements of companies that are not listed on regulated markets
   - individual annual financial statements of companies that are not listed on regulated markets.

In your view, are the options open to national governments:*  

- Appropriate
- Too wide
- Too narrow
- No opinion
9.1. Please give details.

- In line with our response to Question 8, we believe that the scope of the options available for each member state available is too narrow.
- In relation to our answer to Question 8, we believe that if the option to apply IFRS were given at entity level, this would not result in a conflict between the IAS Regulation and Member States’ legislation.

Cost-benefit analysis of the IAS Regulation

10. Do you have pre-IFRS experience/ experience of the transition process to IFRS?*  
- Yes  
- No

11. In your experience, has applying IFRS in the EU made companies' financial statements more transparent (e.g. in terms of quantity, quality and the usefulness of accounts and disclosures) than they were before mandatory adoption?*  
- Significantly more transparent  
- Slightly more transparent  
- No change  
- Slightly less transparent  
- Significantly less transparent  
- No opinion

11.1. Please elaborate.

- FEE firmly believes that since IFRS have been endorsed in the EU, transparency has been enhanced in financial reporting due to increased disclosure. IFRS have also reduced the level of divergence in the EU and thereby increased the comparability of EU financial statements.
- IFRSs require an entity to present in all material aspects its financial position, performance and cash flows in a way that enhances the transparency of its financial statements.
12. In your experience, has applying IFRS in the EU altered the comparability of companies’ financial statements, compared with the situation before mandatory adoption?

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

12.1. Please elaborate.

- FEE is not in a position to answer the first part of this question re the country specific situation.
- In FEE’s opinion comparability has been enhanced significantly on a European and International basis. Entities are required to apply the same set of standards which means that transactions that have the same economic consequences for each entity have been reported similarly in financial statements.
- In addition the IAS Regulation significantly reduced divergence among different EU listed entities (in different jurisdictions) that existed due to the differences between the local GAAP, which were only comparable by preparing time-consuming reconciliations.
- Furthermore, the disclosures required under IFRS improve comparability of financial statements since the users are in a position to understand the accounting policies used and compare different entities.
- Moreover, since IFRS are now applied in more than 100 jurisdictions comparability is enhanced not only within the EU but also with the financial statements of many non-EU countries. This enhances companies’ ability to attract international investors.

13. Have financial statements become easier to understand since the introduction of IFRS, compared with the situation before mandatory adoption?

- Yes, in general
- Yes, but only in certain areas
- No, in general
- No, except in certain areas
- No opinion
13.2. Please elaborate.

- In FEE's opinion, IFRS are a complete set of accounting standards. As a result some areas of financial reporting have become easier to understand, for instance the criteria for recognition and measurement are now the same in the EU due also to the increased transparency and comparability brought about by IFRS. Understandability has also increased as users interested in investing in listed entities in the EU only need to understand a single set of financial reporting standards. Additionally the application is consistent. Preparers are becoming more familiar with the IFRS requirements and, IFRSs being principle based standards, their main principles can be more easily understood by financial reporting constituents.

- However, in some other areas (stock options, financial instruments and related, disclosures, fair value measurements, etc.), complexity may have increased for non-expert users, reflecting to some extent the fact that transactions have themselves become more complex. Whilst disclosures provide increased transparency, their overload may also render IFRS financial statements sometimes more difficult to understand. However, we note that the IASB has a project for addressing this issue.

14. Has the application of IFRS in the EU helped create a level playing field for European companies using IFRS, compared with the situation before mandatory adoption? *

- Yes
- Yes, to some extent
- No
- No opinion

14.1. Please elaborate.

- The same financial reporting framework and set of financial reporting principles and standards apply to all entities across the EU that prepare consolidated financial statements and are listed on a regulated market. The cost of preparing financial statements is part of the cost of getting access to finance. Since all of those listed entities (and their subsidiaries) are subject to the same EU IAS Regulation, a level playing field is created for all EU companies.

- Furthermore the fact that the EU is using one set of standards (IFRS) and the US SEC allows US listed EU companies to report under IFRS has significantly reduced the compliance cost for the many multinational/multi-jurisdiction entities with a US listing. However, the level playing field can be affected by the regulatory environment, where EU regulators adopt regulations that use IFRS data and non-EU regulators do not adopt similar approaches.
15. Based on your experience, to what extent has the application of IFRS in the EU affected access to capital (listed debt or equity) for issuers in domestic and non-domestic markets that are IFRS reporters?

<table>
<thead>
<tr>

15.1. Please provide data / examples if available.

- The endorsement of IFRS in the EU has enabled listed EU companies to access international capital markets (including in the USA) with their IFRS based financial statements without any further reconciliation or preparation of other financial information. The use of IFRS has enhanced their access to worldwide capital markets and the competitive possibilities they offer.

16. In your experience, has the application of IFRS in the EU had a direct effect on the overall cost of capital for your company or the companies you are concerned with? (Please distinguish - as far as possible – the impact of IFRS from other influences, e.g. other regulatory changes in the EU and the international credit crunch and crisis.)*

- Cost has fallen significantly
- Cost has fallen slightly
- No effect
- Cost has risen slightly
- Cost has risen significantly
- No opinion
17. In your view, has the application of IFRS in the EU improved protection for investors (compared with the situation before mandatory adoption), through better information and stewardship by management?*

- Yes, to a great extent
- Yes, to a small extent
- It had no impact
- No, protection for investors has worsened
- No opinion

17.1. Please provide data/examples if available.

- Users of financial statements (existing and potential investors, lenders and other creditors) are provided with financial information that is more comparable and transparent. This enhances the transparency, accountability, reliability and stewardship by management. Although this might come at the expense of additional complexity in financial reporting, to an extent this is unavoidable due to the additional complexity arising from ever more complex business transactions and not from IFRS themselves.

18. In your view, has the application of IFRS in the EU helped maintain confidence in financial markets, compared with the likely situation if it had not been introduced?

(N.B.: the “enforcement” section of this questionnaire deals with how IFRS are/were applied.)*

- Yes, to a great extent
- Yes, to a small extent
- It had no impact
- No, confidence in financial markets has decreased
- No opinion
18.1. Please provide data/examples if available.

- The quality of financial information is only one of the elements that contribute to confidence in financial markets. The fact that international standards (IFRSs) are applied in the EU allows European companies to be comparable with other International companies. The investors only need to study one complete set of financial reporting standards to be able to assess entities in different jurisdictions.
- IFRS provide comparable and transparent information of quality. FEE considers that financial markets can gain confidence from such information. Therefore, in FEE’s view, the application of IFRS in the EU achieves the goal of enabling and maintaining the confidence in financial markets.

19. Do you see other benefits from applying IFRS as required under the IAS Regulation?*

- Yes
- No
- No opinion

19.1. Yes - please specify (you may select more than 1 option).*

- Improved ability to trade/expand internationally
- Improved group reporting in terms of process
- Robust accounting framework for preparing financial statements
- Administrative savings
- Group audit savings
- Other

19.1.1. Other - please specify.*

- Please refer to Question 19.2
19.2. If yes, please give details, with examples/data if possible.

- Applying International reporting standards (IFRSs) enables an entity to have access to International markets (not limited to capital markets). Increased transparency, accountability, reliability and stewardship enable international expansion as they enhance the confidence of business partners (and market participants) across the world.
- Furthermore FEE believes that consistent application of IFRS in a group of companies (especially if a group has international presence) results in economies of scale in terms of cost savings for group financial reporting and for internal/external audit. Reference is also made to our comments on costs in paragraphs 57 and 58 in the FEE response to Question 20.
- In addition, use of IFRS have helped bring credibility to EU financial reporting and allows the EU to participate actively and effectively in the international standard-setting process.
- Finally, FEE believes that the use of international standards increases the mobility of expertise and resources across different jurisdictions.

20. In your experience, on balance and at global level, how do the benefits of applying IFRS compare to any additional costs incurred – compared with the situation before mandatory adoption, bearing in mind the increasing complexity of businesses that accounting needs to portray?*

- Benefits significantly exceed the costs
- Benefits slightly exceed the costs
- Benefits and costs are broadly equal
- Costs slightly exceed the benefits
- Costs significantly exceed the benefits
- No opinion
20.1. Please provide any additional comments you think might be helpful.

- FEE very much agrees that the complexity of businesses and the resulting transactions have dramatically increased over the last decade. Such increased complexity of a business needs to be portrayed in its IFRS financial reporting to reflect the economic reality of complex business transactions which may create additional costs.
- Additionally, transitioning to IFRS a decade ago generated costs and in the future moving to new standards (which respond to new business realities) is expected to add additional costs.
- As discussed in Question 19, FEE identifies a number of benefits that European entities have from applying International standards (IFRSs). One of them, relevant to international groups, may be that IFRS reporting enables management to better monitor the performance of the individual business units/subsidiaries, the quality of its internal processes and internal controls, and this may generate improvements.
- The benefits may also not be the same for every entity; they seemed to be more apparent for the larger entities due to the inherent economy of scale, the cost/benefits assessment may be less favourable for smaller entities.

Endorsement mechanism & criteria

The EU’s IFRS endorsement process

[Diagram showing the endorsement process involving IASB, EFRAG, European Commission, European Parliament, Council, Accounting Regulatory Council, and interest groups.]
In the EU, IFRS are adopted on a standard-by-standard basis. The procedure is as follows:

- The International Accounting Standards Board (IASB) issues a standard.
- The European Financial Reporting Advisory Group (EFRAG) holds consultations, advises on endorsement and examines the potential impact.
- The Commission drafts an endorsement regulation.
- The Accounting Regulatory Committee (ARC) votes and gives an opinion.
- The European Parliament and Council examine the standard.
- The Commission adopts the standard and publishes it in the Official Journal.

This process typically takes 8 months.

**Endorsement criteria**

Under Article 3.2 of the IAS Regulation, any IFRS to be adopted in the EU must:

- be consistent with the "true and fair" view set out in the EU's Accounting Directive
- be favourable to the public good in Europe
- meet basic criteria on the quality of information required for financial statements to serve users (i.e. statements must be understandable, relevant, reliable and comparable, they must provide the financial information needed to make economic decisions and assess stewardship by management).

In his October 2013 report, Mr Maystadt discussed the possibility of clarifying the "public good" criterion or adding 2 other criteria as components of the public good, namely that:

- any accounting standards adopted should not jeopardise financial stability
- they must not hinder the EU's economic development.

He also suggested that more thorough analysis of compliance with the criteria of prudence and respect for the public good was needed.
21. In the EU, IFRS are adopted on a standard-by-standard basis. The process, which typically takes 8 months, is as follows:

- The International Accounting Standards Board (IASB) issues a standard.
- The European Financial Reporting Advisory Group (EFRAG) holds consultations, advises on endorsement and examines the potential impact.
- The Commission drafts an endorsement regulation.
- The Accounting Regulatory Committee (ARC) votes and gives an opinion.
- The European Parliament and Council examine the standard.
- The Commission adopts the standard and publishes it in the Official Journal.

Do you have any comments on the way the endorsement process has been or is being conducted (e.g. in terms of the interaction of players, consistency, length, link with effective dates of standards, outcome, etc.)?

- FEE actively participated in the review of EFRAG and ARC governance conducted by Mr. Maystadt. FEE therefore fully supports the outcome of this process, namely, a transformed EFRAG to reinforce the EU’s contribution to the international accounting standards setting process.

- This stronger EFRAG organises stakeholders and standard setters’ representation at European level which we understand aims at:
  - Enhancing the genuine European dimension;
  - Facilitating consensus building;
  - Diminishing national oppositions and reduces risk of conflicts.

- In this new context, the current 8 month long endorsement process seems especially long and cumbersome. The EU should not run behind other parts of the world in the IFRS endorsement process. Furthermore, the number of steps in the process and the number of parties involved can per se be a source of blockages and misunderstandings and risks creating too many opportunities that may be misused for political manipulation.

- To maximise the European contribution to international accounting standards, proactive strategic input aimed at shaping the agenda and contributing thought-leadership sufficiently early in the process of standard development is most efficient and helps prevent political stalemate at the end of the process. Europe is more influential and effective when it speaks with one voice. FEE supports better coordination of European views and thinks that EFRAG plays an instrumental role to that end.
- The reformed EFRAG and the EC should take up an enhanced role in this process.
  • EFRAG by actively engaging the EP and the Council earlier in the process. This on-going and regular dialogue and mutual education should help to develop a relationship as well-informed sparring partners between EFRAG and the EP and Council.
  • The EC by taking up its independent role as standing for the European public good. Thereby, it can facilitate relations between the EP and Council on the one side and IASB on the other.

- If the length and complexity of the process cannot be reduced, it is essential that those participating are fully informed and engaged and share common European objectives.

- In relation to Questions 22-24 FEE believes that the endorsement should be based on the 2002 IAS Regulation. Therefore, the existing endorsement criteria do not need to be altered and/or expanded.

- We fundamentally disagree with "opening the door" towards more flexibility for the EU in endorsing IFRSs as this would not bring flexibility, but would defeat the very purpose of having global standards.

- Finally, we believe that flexible endorsement would isolate Europe, damage its credibility and decrease its influence on the IASB.
22. Under Article 3.2 of the IAS Regulation, any IFRS to be adopted in the EU must:

- be consistent with the "true and fair" view set out in the EU's Accounting Directive
- be favourable to the public good in Europe
- meet basic criteria on the quality of information required for financial statements to serve users (i.e. statements must be understandable, relevant, reliable and comparable, they must provide the financial information needed to make economic decisions and assess stewardship by management).

Are the endorsement criteria appropriate (sufficient, relevant and robust)?
- Yes
- Yes, to some extent
- No
- No opinion

23. There is a necessary trade-off between the aim of promoting a set of globally accepted accounting standards and the need to ensure these standards respond to EU needs. This is why the IAS regulation limits the Commission’s freedom to modify the content of the standards adopted by the IASB.

Does the IAS Regulation reflect this trade-off appropriately, in your view? *
- Yes
- No
- No opinion

24. Have you experienced any significant problems due to differences between the IFRS as adopted by the EU and the IFRS as published by the IASB ("carve-out" for IAS 39 concerning macro-hedging allowing banks to reflect their risk-management practices in their financial statements)? *
- Yes
- No
- No opinion

Quality of IFRS financial statements
25. What is your overall opinion of the quality (transparency, understandability, relevance, reliability and comparability) of financial statements prepared by EU companies using IFRS?*

- Very good
- Good
- Moderate
- Low
- Very low
- No opinion

25.1. Please provide any additional comments you think might be helpful.

- The quality of IFRS financial statements is not just dependent on the IFRS standards. It is the quality of the standards used, the preparation of the financial statements, audit and enforcement that together contribute to make IFRS financial statements produced in the EU of quality. The standards are themselves only one component. If all components are present, IFRS financial statements are of very good quality compared to other frameworks.
- As of today, FEE considers the overall quality of IFRS financial statements prepared under IFRS in the EU as being “very good”. However, FEE believes that there is still room for improvement in some areas of the set of the IFRS standards. FEE has already commented in the past on these to the IASB during prior consultations. For instance, the IASB still needs to work (and is doing work) on the disclosure overload and to complete some key projects, such as the standard on insurance contracts, the conceptual framework, the accounting for macro-hedging, etc.
- Finally, we believe that national enforcement quality has improved in many EU countries which has helped to improve of the quality of financial statements. However in FEE’s opinion, there is still room for improvement.

26. Given that firms have complex business models and transactions, how would you rate financial statements prepared in accordance with IFRS in terms of complexity and understandability?*

- Very complex & difficult to understand
- Fairly complex & difficult to understand
- Reasonable
- Not complex or difficult
- No opinion
26.1. Please provide any further comments you think might be helpful, specifying any particular areas of accounting concerned, if appropriate.

- Complexity that exists in financial reporting is not necessarily due to the financial reporting standards. In FEE’s opinion the complexity that exists in financial statements is mostly due to the complexity in the business and transactions that entities undertake. Financial reporting’s main aim is to faithfully portray the economic substance of transactions in a transparent manner. Therefore we strongly believe that given the complexity of transactions, IFRS’s complexity is reasonable, taking into account the need for a high quality set of financial statements. However, some standards induce disclosure overload and may produce accounting outcomes in a few cases that can be difficult to explain to non-IFRS experts.

27. How would you rate financial statements prepared using IFRS in terms of complexity and understandability – compared with other sets of standards you use?

<table>

27.2. Please identify other GAAPs you are using as a basis for comparison.

N/a

28. How do IFRS compare with other GAAPs in terms of providing a true and fair view of a company’s (group’s) performance and financial position?

<table>
<thead>
<tr>
<th></th>
<th>IFRS are better than...</th>
<th>IFRS are equivalent to...</th>
<th>IFRS are worse than...</th>
<th>No opinion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Your local GAAPs (as identified under question 27)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Any other GAAPs (as identified under question 27)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

29. How often is it necessary to depart from IFRS under “extremely rare circumstances” (as allowed by IFRS), to reflect the reality of a company’s financial performance and position in a fairer way?*

- Often
- Sometimes
- Hardly ever
- Never
- No opinion
29.1. Please provide additional comments and examples of departures from IFRS that you have seen.

- Despite the fact that IFRS provide preparers the option to depart from the principles and requirements of an IFRS (in extremely rare circumstances) this only happens in truly exceptional circumstances as IFRS are principle-based and thereby are able to cover almost all business transactions. In addition, in many cases a departure from IFRS is not needed because a “true and fair view” can be achieved through compliance with the accounting standards combined with additional disclosures.

30. How would you rate the extent to which IFRS allows you to reflect your company’s business model in your financial statements?*

- This is not an issue
- IFRS are flexible enough
- IFRS should be more flexible, so different business models can be reflected
- No opinion

**Enforcement**

Since 2011, the European Securities and Markets Authority (ESMA) has been coordinating national enforcers’ operational activities concerning compliance with IFRS in the EU. ESMA has taken over where the Committee of European Securities Regulators (CESR) left off.

Enforcement activities regarding companies listed on regulated markets are defined in the Transparency Directive (2004/109/EC, as subsequently amended).

31. Are the IFRS adequately enforced in your country?*

- Yes
- Yes, to some extent
- No
- Not applicable
- No opinion
32. Does ESMA coordinate enforcers at EU level satisfactorily? *

- Yes
- Yes, to some extent
- No
- Not applicable
- No opinion

32.1. Please provide any additional comments you think might be helpful.

- In FEE's opinion ESMA's role is important in the context of the overall efforts to achieve consistency in the EU. ESMA coordinates an coherent approach by National Competent Authorities (NCAs) through:
  a. Enforcement Coordination Sessions
  b. Enforcement decisions
  c. Setting common enforcement priorities
  d. Concluding thematic reviews & issues reports with findings.

- On the other hand, FEE observes that ESMA operates within the boundaries of its role as a coordinator since ESMA is not an enforcer itself.

33. Has enforcement of accounting standards in your country changed with the introduction of IFRS? *

- Enforcement is now more difficult
- Enforcement has not changed
- Enforcement is now easier
- Not applicable
- No opinion

34. In your experience, have national law requirements influenced the application of IFRS in the EU country or countries in which you are active? *

- Yes, significant influence
- Yes, slight influence
- No
- No opinion
- Not applicable
35. If you are aware of any significant differences in enforcement between EU countries or with other jurisdictions, do they affect your practice in applying IFRS or analysing financial statements? *

- Yes, significantly
- Yes, but the impact is limited
- No
- No opinion
- Not applicable

36. The recitals of the IAS Regulation stress that a system of rigorous enforcement is key to investor confidence in financial markets. However, the Regulation contains no specific rules on penalties or enforcement activities, or their coordination by the EU.

Should the IAS Regulation be clarified as regards penalties and enforcement activities? *

- Yes
- No
- No opinion

37. Should more guidance be provided on how to apply the IFRS? *

- Yes
- No
- No opinion

**Consistency of EU law**

There are different types of reporting requirements in the EU (e.g. prudential requirements, company law, tax, etc.)
38. How would you assess the combined effects of, and interaction between, different reporting requirements, including prudential ones? *

- FEE identifies that there is, to a certain degree, overlap between some EU regulations and financial reporting. To a certain extent this is also true for regulatory reporting and financial reporting and the requirements under IFRSs. As a recent example, regarding the
Country-by-Country Reporting requirements of the Capital Requirement Directive IV, some of the requirements (for instance in Article 89) are already partly available under the IFRS 8 -Operating Segments disclosures in the financial statements.

39. Do you see any tensions in interaction between the IAS Regulation and EU law, in particular:

<table>
<thead>
<tr>
<th></th>
<th>No</th>
<th>Yes</th>
<th>To some extent</th>
<th>No opinion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prudential regulations (banks, insurance companies)</td>
<td>0</td>
<td>0</td>
<td>1</td>
<td>0</td>
</tr>
<tr>
<td>Company law</td>
<td>0</td>
<td>0</td>
<td>1</td>
<td>0</td>
</tr>
<tr>
<td>Other</td>
<td>0</td>
<td>0</td>
<td>0</td>
<td>1</td>
</tr>
</tbody>
</table>
39.2. If you answered "yes" or "to some extent", please give details and state what the main effects of these tensions are.*

- Tensions also exist with prudential regulations particularly where valuations are required, as the overall objectives of the information provided may not be the same.

User-friendliness of legislation

All standards are translated into the official EU languages before they are adopted. The Commission also regularly draws up a consolidated version of the current standards enacted by the EU ([http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:02008R1126-20130331:EN:NOT](http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:02008R1126-20130331:EN:NOT)). The consolidated version does not include any standards that are not yet in force, but can be applied before the date of entry into force.

40. Are you satisfied with the **consolidated version** of IFRS standards adopted by the EU, which is not legally binding, or would you like to see improvements?

- Satisfied
- Need for improvements
- I wasn't aware of it
- I don't use it
- No opinion

41. Are you satisfied with the quality of **translation** of IFRS into your language provided by the EU?*

- Yes
- Yes, to some extent
- No
- No opinion
- Not applicable
42. Do you have any other comments on or suggestions about the IAS Regulation?

   - We will send a letter to European Commission with additional comments on this matter.

   Thank you for your valuable contribution.
