What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

- **#1 Sustainable** covers sustainable investments with environmental or social objectives.
- **#2 Not sustainable** includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[Include note only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852]

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

[Include section for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 and include information in accordance with Article 59 of this Regulation]
What was the share of investments made in transitional and enabling activities? [include a breakdown of the proportions of investments during the reference period]

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods? [include where at least one previous periodic report was provided]

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy? [include only for the financial products referred to in Article 5, first paragraph, of Regulation (EU) 2020/852 where the financial product included investments with an environmental objective that invested in economic activities that are not environmentally sustainable economic activities and explain why the financial product invested in economic activities that were not taxonomy-aligned]

What was the share of socially sustainable investments? [include only where the financial product includes sustainable investments with a social objective]
What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

What actions have been taken to attain the sustainable investment objective during the reference period? [list the actions taken within the period covered by the periodic report to attain the sustainable investment objective of the financial product, including shareholder engagement as referred to in Article 3g of Directive 2007/36/EC and any other engagement relating to the sustainable investment objective]

How did this financial product perform compared to the reference sustainable benchmark? [include section only for the financial products referred to in Article 9(1) of Regulation (EU) 2019/2088 and indicate where the methodology used for the calculation of the designated index can be found]

- How did the reference benchmark differ from a broad market index?

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

- How did this financial product perform compared with the reference benchmark?

- How did this financial product perform compared with the broad market index?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.
