Standard requirements for the submission of programme for eradication, control and monitoring

PROGRAMME for ERADICATION : ANNEX I

Member States seeking a financial contribution from the Union for national programmes for the eradication, control and monitoring of animal diseases and zoonosis listed below, shall submit applications containing at least the information set out in this form.

Bovine brucellosis, bovine tuberculosis, ovine and caprine brucellosis (B. melitensis), bluetongue in endemic or high risk areas, african swine fever, swine vesicular disease, classical swine fever, rabies.

The central data base keeps all submissions. However only the information in the last submission is shown when viewing and used when processing the data.

If encountering difficulties, please contact SANCO-BO@ec.europa.eu, describe the issue and mention the version of this document: 2014 1.09

Instructions to complete the form:  Your current version of Acrobat is: 10.104

1) Be informed that you need to have at least the Adobe Reader version 8.1.3 or higher to fill and submit this form.
2) To verify your data entry while filling your form, you can use the "verify form" button at the top of each page.
3) When you have finished filling the form, verify that your internet connection is active and then click on the submit notification button below. If the form is properly filled, the notification will be submitted to the server and a Submission number will appear in the corresponding field.
4) IMPORTANT: Once you have received the Submission number, save the form on your computer.
5) If the form is not properly filled, an alert box will appear indicating the number of incorrect fields. Please check your form again and try to re-submit it according to steps 3), 4) and 5). Should you still have any difficulties, please contact SANCO-BO@ec.europa.eu.
6) For simplification purposes you are invited to submit multi annual programmes
7) As mentioned during the Plenary Task Force of 28/2/2014, you are invited to submit your programmes in English.

IMPORTANT: AFTER SUBMITTING THE FORM DO NOT FORGET TO SAVE IT ON YOUR COMPUTER FOR YOUR RECORDS!
Standard requirements for the submission of programme for eradication, control and monitoring

1. Identification of the programme

Member state: ROMANIA

Disease: African swine fever

Species: Domestic pigs and wild boar

This program is multi annual: no

Request of Union co-financing from beginning of: 2015
Standard requirements for the submission of programme for eradication, control and monitoring

1.1 Contact

Name : Grigore Marius

Phone : 0040757022042

Fax. : 0040213124967

Email : grigore.marius@ansvsa.ro

2. Historical data on the epidemiological evolution of the disease

Provide a concise description on the target population (species, number of herds and animals present and under the programme), the main measures (sampling and testing regimes, eradication measures applied, qualification of herds and animals, vaccination schemes) and the main results (incidents, prevalence, qualification of herds and animals). The information is given for distinct periods if the measures were substantially modified. The information is documented by relevant summary epidemiological tables (point 6), complemented by graphs or maps (to be attached).

(max. 32000 chars) :

The present program is intended for monitoring and surveillance of ASF, in 8 Romanian counties found at risk. So far, the ASF was never confirmed in Romania. Having regard some considerations as:

- the confirmation of the disease in some member states of EU in wild boars and domestic pigs;
- the fact that Romania is mentioned as a country found at risk in all risk analyses (FAO, CISA/INIA), and also by a risk analysis performed by the Romanian veterinary authorities;
- the fact that Romania is bordered by two third countries at the N-E borders (in one of them cases of ASF were confirmed - Ukraine);
- the presence of the Danube Delta which is a very favorable biotope at the border with Ukraine, and the fact that the area is officially protected by low and the hunting is banned, a large population of wild boars remained untested;
- the density of wild boars and domestic pigs, many of them in nonprofessional holdings, in the zones found at risk, we consider that Romania needs to develop an appropriate surveillance in 8 Romanian counties found at risk: Satu-Mare, Maramures, Suceava, Botosani, Iasi, Vaslui, Galati and Tulcea.
- the European Commission asked to all Member States bordered with Russian Federation, Belarus and Ukraine to apply the provisions of article 8 of Decision 2009/470 on expenditure in the veterinary field and to draw up national programmes for ASF surveillance in wild boars.

Romania decided to present this programme for ASF monitoring and surveillance for 2015, in order to keep it’s territory under control.
Standard requirements for the submission of programme for eradication, control and monitoring

3. Description of the submitted programme

Provide a concise description of the programme with its main objective(s) (monitoring, control, eradication, qualification of herds and/or regions, reducing prevalence and incidence), the main measures (sampling and testing regimes, eradication measures to be applied, qualification of herds and animals, vaccination schemes), the target animal population, the area(s) of implementation and the definition of a positive case.

(max. 32000 chars):

The objective of the present programme is monitoring and early detection of the presence of ASF virus in the susceptible population of domestic and wild pigs, in 8 Romanian counties found at risk, due to their bordering in the N-E part of Romania with third countries.

a. by passive surveillance:

- All sick or found dead domestic pigs for which other causes cannot be excluded and wild boars found dead or sick. They should be investigated and tested for the ASF detection in the all 8 Romanian counties found at risk: Satu-Mare, Maramures, Suceava, Botosani, Iasi, Vaslui, Galati and Tulcea.

b. by active surveillance:

- All hunted wild boars all over the year, in the all 8 Romanian counties found at risk: Satu-Mare, Maramures, Suceava, Botosani, Iasi, Vaslui, Galati and Tulcea.

In the area under programme, the animals of the susceptible species (domestic pigs and wild boar) found sick or dead for which other causes cannot be excluded on clinical grounds should be investigated and tested serologically and virologically. The tests follow to be performed on the same samples collected for Classical Swine Fever.

Regular clinical examination in back yard holdings along the border with Ukraine and Moldova will be introduced to be performed, in the strategic programme of Romania for 2015.

The samples in domestic pigs and in wild boars found dead are sampled by the official veterinarian and sent to the IDAH - NRL for diagnostic. In hunted wild boars, samples will be sampled by the the hunters and sent to the County Veterinary Laboratory which will sent them to the IDAH-NRL.

The election tests for ASF passive surveillance as well as for active surveillance for all samples is a virological test, PCR (Polimerase Chain Reaction), in order to detect the viral genome of ASFV, and a serological test, ELISA in order to detect antibody against ASFV, in accordance with the provision of the Commission Decision 2003/422/EC approving the diagnostic manual for ASF.

If a sample reacts positive at ELISA for antibody, a second test will be performed for disease confirmation: indirect immunofluorescence test (IIFT), Immunoperoxidase test (IPT) for antibody detection.
Standard requirements for the submission of programme for eradication, control and monitoring

The confirmed cases will be sent to the Community Reference Laboratory for virus characterization.

The nominated laboratory where sample will be tested are the Institute for Diagnosis and Animal Health, the National Reference Laboratory for ASF.

The program contains also a request for funding for early advertising of population concerning the ASF recognizing and measures in case of suspicion.

4. Measures of the submitted programme

4.1 Summary of measures under the programme

Duration of the programme: 2015

First year:

☑ Control
☑ Testing
☐ Slaughter and animals tested positive
☐ Killing of animals tested positive
☐ Vaccination
☐ Treatment
☑ Disposal of products
☐ Eradication, control or monitoring
Standard requirements for the submission of programme for eradication, control and monitoring

4.2 Organisation, supervision and role of all stakeholders involved in the programme

Describe the authorities in charge of supervising and coordinating the departments responsible for implementing the programme and the different operators involved. Describe the responsibilities of all involved.

(max. 32000 chars):

4.2.1. The National Sanitary Veterinary and Food Safety Authority (NSVFSA)

The Romanian central competent authority is responsible for coordination and monitoring the Programme implementation. NSVFSA is also responsible for the funding and costs of all monitoring, surveillance and eradication activities, accordingly to the law.

It's main role is:

- drafting the program and sending to the EU Commission for approving;
- monitoring the fulfilling of this program;
- issuing and sending periodically to the EU Commission the technical and financial reports;
- reporting periodically to the EU Commission the progress in implementation of the program.

At the territorial level, the veterinary authorities responsible for the application of the Program are 8 County Sanitary Veterinary and Food Safety Directorates (CSVFSD) for: Satu-Mare, Maramures, Suceava, Botosani, Iasi, Vaslui, Galati and Tulcea.

Their main role in this program is:

- implement at the local level this program;
- collecting and sending the samples to the IDAH - NRL;
- sending the NSVFSA periodically the data for reporting and issuing technical and financial reports.

4.2.2. The Institute for Diagnosis and Animal Health

Is the National Reference Laboratory (NRL) for ASF. It's main role is :

- performs the diagnostic for samples under this Program;
- releases the reports for diagnosis results;
- send the samples and cooperating with the Community Reference Laboratory for confirmation of the results obtained at NRL.

4.2.3. The Ministry of Environment and Climatic Changes

- establish the hunting quota and approves additional hunting sessions, in order to support the program of disease eradication;
- keeps in function the system of collecting, transporting and neutralization of hunted wild boars, and by-products;
Standard requirements for the submission of programme for eradication, control and monitoring

4.2.4. The Territorial Forest and Hunting Inspectorates

- make available to County Sanitary Veterinary and Food Safety Laboratories, including Bucharest, (CSVFSL) the cadastral-survey of wild boar populations, the geographical coordinates of hunting funds in order to establish the GIS maps;
- monitors and evaluates the density of wild boar populations within the Romanian hunting-funds;
- monitors and controls the implementation of the gamekeepers responsibilities;
- cooperate with CSVFSD for sampling the game;

4.2.5. Ministry of Public Finances

- provides to NSVFSA the necessary funds for the implementation of the ASF Programme;

4.3  Description and demarcation of the geographical and administrative areas in which the programme is to be implemented

Describe the name and denomination, the administrative boundaries, and the surface of the administrative and geographical areas in which the programme is to be applied. Illustrate with maps.

(max. 32000 chars):

The counties proposed for monitoring and surveillance are 8 counties found at risk, and neighbored with third countries Ukraine and Moldova. See Map attached to this programme.

4.4  Description of the measures of the programme

A comprehensive description needs to be provided of all measures unless reference can be made to Union legislation. The national legislation in which the measures are laid down is mentioned.

4.4.1  Notification of the disease

(max. 32000 chars):

Is enforced by:

- The Order 79/2008 of President of NSVSA approving veterinary sanitary Norm on the internal notification of official declaration of certain communicable animals diseases, as well as the procedure of extinction of notifiable diseases, with subsequent amendments and additions.

The ASF confirmation or suspicion is immediately and compulsory notified to the territorial competent
Standard requirements for the submission of programme for eradication, control and monitoring

authority, accordingly with the provision of the art. 3 of the afore mentioned Directive. Therefore, will be notified:
- the ASF outbreaks in all commercial and non-professional holding;
- the ASF outbreaks confirmed in slaughterhouses and in the middle of animal transport;
- the ASF cases notified in wild boars.
The CCA of Romania have to notify the disease and to immediately provide the informations to the EU Commission and to Member States regarding the following cases confirmed in an infected zone.

4.4.2 Target animals and animal population

(max. 32000 chars):

In the 8 counties considered at risk (Satu-Mare, Maramures, Suceava, Botosani, Iasi, Vaslui, Galati and Tulcea), the targeted animals are:
- All sick or found dead domestic pigs for which other causes cannot be excluded;
- All wild boars found dead or sick;
- All hunted wild boars all over the year;

All the hunted wild boars will be sampled and sample will be sent for surveillance to the IDAH - NRL.

Disposal of carcasses will be assured by every Local Disease Control Centre.

An official investigation will be performed when a dead wild boar id found, in order to assure the traceability in that case.

4.4.3 Identification of animals and registration of holdings

(max. 32000 chars):

Legal basis:
- The NSVFSA Order  no. 16/2010, for approval of the sanitary veterinary Norm for the registration and authorization procedure of units and of the middle of transport in the heath and welfare field;
- The NSVFSA Order no. 85/2008 - for approval of the sanitary veterinary Norm concerning the swine identification and registration system;
- The NSVFSA Order no. 40/ 2010 regarding the approval od the sanitary veterinary Norm for implementing the process of identification and registration of swine, ovines, caprines and bovines.

Accordingly with the afore mentioned legislation, the registration of pig holdings and identification of all pigs before exit the origine holding is compulsory.

4.4.4 Qualifications of animals and herds

(max. 32000 chars):

Not applicable
4.4.5  Rules of the movement of animals

(max. 32000 chars):
When a case or outbreak of ASF is suspected or confirmed, the provisions of Council Directive 2002/60/EC are applied. No pigs are moved from the territory under restriction.
NSVFSA Order No. 67/2012 concerning the animal health conditions to be respected in relation to the movement of live pigs on Romanian territory and for modification of certain veterinary rules.

4.4.6  Tests used and sampling schemes

(max. 32000 chars):

4.4.7  Vaccines used and vaccination schemes

(max. 32000 chars):
Not applicable

4.4.8  Information and assessment on bio-security measures management and infrastructure in place in the holdings involved.

(max. 32000 chars):
NSVFSA Order No. 63/2008 approving the Sanitary Veterinary Norms concerning the general bio-safety rules in pig holdings sanitary veterinary registered/approved. This establish rules for animal movement in relation with the production type of farms. These measures are applicable to all commercial holdings and to type A holdings, but not to non-professional holding.

Special rules for managing the hunted wild boars have been issued and shared to the responsible of hunting grounds.

At the BIP's are applied measures in accordance with the provisions of the Commission Decision no. 2013/426/UE.
Articles in media, posters and leaflets have been shared for the information of farmers and large public.

4.4.9  Measures in case of a positive result
Standard requirements for the submission of programme for eradication, control and monitoring

A short description is provided of the measures as regards positive animals (slaughter, destination of carcasses, use or treatment of animal products, the destruction of all products which could transmit the disease or the treatment of such products to avoid any possible contamination, a procedure for the disinfection of infected holdings, the therapeutic or preventive treatment chosen, a procedure for the restocking with healthy animals of holdings which have been depopulated by slaughter and the creation of a surveillance zone around infected holding):

When the presence of ASF is confirmed in a holding, measures provided for disease control are applied.
An official investigation is ordered, in order to find out the ASF virus traceability.
All animals are ordered to be culled, sample are sampled for laboratory, the carcasses are disposed in a rendering plant under official supervision.
Restriction on animal movement will be issued for the contaminated holdings and zones. The disease will be notified accordingly to legislation in force.
- meat of previous slaughtered pigs are put under official control;
- all semen, ova, and embryo harvested previous the confirmation are put under official control;
Any other risk materials are placed under official controls and processed as provided in afore mentioned Council Directive.
- meat of previous slaughtered pigs are put under official control;
- all semen, ova, and embryo harvested previous the confirmation are put under official control;
Any other risk materials are placed under official controls and processed as provided in afore mentioned Council Directive.

4.4.10 Compensation scheme for owners of slaughtered and killed animals

Legislative provisions and measures regarding the compensation of owners for animals slaughtered, killed, death and for collateral losses are established by national Government Decision no. 1214, October 7, 2009 on the methodology for determination and payment of compensation which are adequate to owners whose animals were slaughtered, killed or otherwise affected in the context of liquidation of infectious animals’ diseases outbreaks.

As it is provided in article 9 of Council Regulation (EEC) No. 349/2005 the payment of compensation must not exceed 90 days, the delay of this deadline results in eligible for reimbursement.

4.4.11 Control on the implementation of the programme and reporting

The control of the implementation of this programme is carried out by the NSVFSA through the Directorate-General for Official Inspection and County Sanitary Veterinary and Food Safety Divisions, on the basis of the National Control Programme, approved by the NSVFSA Order. Reporting will be delivered by the Animal Health and Welfare Directorate periodically, accordingly to the
5. **Benefits of the programme**

A description is provided of the benefits of the programme on the economical and animal and public health points of view.

*(max. 32000 chars)*:

Having regard that Romania is a country considered at risk, this programme will help to early detect the presence of the virus on Romanian territory and will allow to take the necessary measures to prevent the spreading of the disease in our country and, implicitly, in the EU Member States territories.

For brucellosis (bovine and small ruminants) and tuberculosis, if an annual programme is submitted, please provide also the targets for herd incidence and prevalence, and the animal prevalence for at least 3 years (including the year for which the programme is submitted).

8.2 Co-financing rate:

The maximum co-financing rate is in general fixed at 50%. However based on provisions of Article 5.2 and 5.3 of the Common Financial Framework, we request that the co-financing rate for the reimbursement of the eligible costs would be increased:

- Up to 75% for the measures detailed below
- Up to 100% for the measures detailed below
- Not applicable

Please explain for which measures and why co-financing rate should be increased (max 32000 characters)

Romania has no funds included for ASF surveillance on 2015, and founds at risk for this disease.
8.3 Source of national funding

Please specify the source of the national funding:

☒ public funds
☐ food business operators participation
☐ other

Please give details on the source of the national funding (max 32000 characters)

Government budget funds.
Standard requirements for the submission of programme for eradication, control and monitoring

Attachments

**IMPORTANT :**

1) The more files you attach, the longer it takes to upload them.
2) This attachment files should have one of the format listed here: .jpg, jpeg, tiff, tif, .xls, .xlsx, .doc, .docx, .ppt, .pptx, .bmp, .pna, .pdf.
3) The total file size of the attached files should not exceed 2,500Kb (+- 2.5 Mb). You will receive a message while attaching when you try to load too much.
4) IT CAN TAKE **SEVERAL MINUTES TO UPLOAD** ALL THE ATTACHED FILES. Don't interrupt the uploading by closing the pdf and wait until you have received a Submission Number!
5) Only use letters from a-z and numbers from 1-10 in the attachment names, otherwise the submission of the data will not work.
