Bifenthrin

In 2010, the JMPR proposed to withdraw existing CXL for barley as no GAP was submitted to support this use. Barley has a registered use in Europe and the European Union and its Member States (EUMS) wish to submit GAP and supporting data to maintain a CXL for barley.

This is the reason why the EUMS ask for inclusion of Bifenthrin in the 2012 JMPR priority list in order to assess the barley data package.
