

EUROPEAN COMMISSION
DIRECTORATE-GENERAL FOR HEALTH AND FOOD SAFETY
Safety of the Food Chain

Version 4
Updated on 25 July 2016

**Food enzyme applications submitted to the Commission within the legal
deadline (from 11 September 2011 to 11 March 2015)**

According to Article 17(2) of Regulation (EC) No 1332/2008¹ interested parties may submit applications for the inclusion of a food enzyme in the Union list.

The deadline for submitting such applications started from 11 September 2011 and ended on 11 March 2015. The Commission has received 301 applications for their inclusion in such list.

Article 17(3) of the Regulation requires the Commission to establish a Register of all food enzymes to be considered for inclusion in the Union list provided that the applications comply with the validity criteria laid down in accordance with Article 12 of Regulation (EU) No 234/2011². The Register shall be made available to the public.

Due to the large number of food enzyme applications received and the fact that all the dossiers have to go through the validity assessment, it will take some time to establish the Register.

In the meantime, it is necessary for the purposes of information and transparency to publish the food enzyme applications submitted to the Commission.

The food enzyme applications have been listed in the Annex to this document and consists of four columns namely, the reference number, the food enzyme, the source and the strain where appropriate, and the indicative food uses.

This Annex has no legal value and cannot be considered as the Register. The Commission declines any and all responsibility for any inaccuracy, error or omission in relation to the information on the list. The European Commission fully excludes any and all liability of any kind to any person or entity that chooses to rely upon the information in the list.

In case any inaccuracies are detected in the Annex, the Commission would be grateful to be informed at the following email address: SANTE-E2-ENZYMES@ec.europa.eu. Where necessary, the Annex will be updated to provide further clarification.
