1) subdivision of state authorized body in the field of veterinary (hereinafter – subdivision of the authorized body) – committee of authorized state body in the filed of veterinary carrying out state veterinary and sanitary control and surveillance;

2) veterinary control post - subdivision of the Agency of the authorized body, located in the territory of border and customs points (checkpoints across the state border of the
Republic of Kazakhstan which coincides with customs border of the Customs Union), equipped with necessary equipment and devices, performing veterinary and sanitary control and surveillance of objects transferred (transported);

3) permission - number issued by the Agency of the authorized body for objects transferred (transported) upon their exportation, importation, transit, registered in the register, subsequently contained in veterinary accompanying documents (veterinary certificate) is the basis for issuing veterinary certificate;

4) extract from the register - a written notice issued by the agency of the authorized body on issuance of the permission for importation, exportation, transit of objects transferred (transported), including permission number and information on the object transferred (transported);

5) register - information base of agency of authorized body containing information about objects transferred(transported) and permission number issued for the importation, exportation, and transit;

6) transferred (transported) objects subject to state veterinary and sanitary control and surveillance (hereinafter - transferred (transported) objects) - animals, germ and somatic cells of animals, strains of animal diseases, products and raw materials of animal origin, veterinary products, animal feed and feed additives, pathological material or samples taken from them, samples of water, air, soil, plants, products, and attributes of the veterinary and zootechnical purposes, and used for packaging and transportation of all kinds of containers and vehicles carrying such transferred (transported)objects/

3. The Rules apply to transferred (transported) objects moving across the state border of the Republic of Kazakhstan which coincides with customs border of the Customs Union

4. Objects transferred (transported) across the state border of the Republic of Kazakhstan which coincides with customs border of the Customs Union shall be subject to mandatory state veterinary and sanitary control and surveillance.

5. For conducting state veterinary and sanitary control and surveillance in order to prevent entry into and spread of contagious and exotic animal diseases into the territory of the Republic of Kazakhstan from other countries the authorized body at the border and customs posts (checkpoints across the state border which coincides with customs border of the Customs Union) organizes veterinary control posts (hereinafter - VCP).

The state veterinary and sanitary control and surveillance of the VCP is carried out by the state veterinary sanitary agency inspectors of the Agency of authorized body carrying out the state veterinary and sanitary control and surveillance.

6. State veterinary and sanitary control and surveillance at checkpoints for vehicles moving across the state border of the Republic of Kazakhstan which coincides with customs border of the Customs Union is conducted in accordance with instructions for interaction and coordination between regulatory authorities at the checkpoints of the State Border of the Republic of Kazakhstan which coincides with customs border of the Customs Union approved by joint order of the authorized bodies that conduct control functions.

7. The state veterinary and sanitary inspectors at VCP in the performance of duties wear special clothing (without shoulder mark) with veterinary logo.

2. The Procedure of State Veterinary and Sanitary Control and Surveillance in Moving of Objects Transferred (Transported) Across the State Border of the Republic of Kazakhstan which Coincides with the Customs Union Border

8. State veterinary and sanitary inspectors of veterinary control posts when transferring objects transferred (transported) across the state border of the Republic of Kazakhstan which coincides with customs border of the Customs Union at the checkpoint perform document control, inspection (examination) of objects transferred (transported) and sampling (if necessary) for laboratory testing.
9. Document control includes checks for:
1) availability of an accompanying veterinary documents for objects transferred (transported) (veterinary certificate);
2) correct (full) filling of veterinary certificate;
3) availability of signatures and stamps of the competent authority of the exporting country;
4) availability of information in the veterinary certificate confirming the compliance of objects transferred (transported) with veterinary and sanitary requirements of the exporting or the importing country established by legislation in the field of veterinary;
5) compliance of information on objects transferred (transported) and permission number for import, export, transit with data of extracts from the register.

10. Inspection (examination) of object transferred (transported) includes:
1) verification of compliance of name of object transferred (transported), its weight (volume), total amount of data labeling and information of veterinary certificate;
2) verification of compliance with veterinary (veterinary sanitary) requirements for the vehicle;
3) verification of compliance with veterinary (veterinary sanitary) requirements and conditions for transport of object transferred (transported);
4) veterinary inspection of object transferred (transported) (compliance with requirements of transportation), and when transporting live animals (if necessary) a thermometry, measurement of heart rate and respiration.

11. Sampling for laboratory tests is carried out upon detection of:
1) changes in clinical condition of the animal and their subsequent isolation. Samples of blood, saliva, nasal emanations, mucus, droppings are carried out to avoid highly contagious animal diseases;
2) death of animals (selection of pathological material) in order to establish the diagnosis;
3) signs of defrosting, damage, violation of integrity of packaging, labeling, presence of any foreign smell, stains of objects transferred (transported).
Selected materials are sent to the nearest veterinary laboratory with the accompanying documents for research.

12. The state veterinary and sanitary inspectors of veterinary control posts on the basis of state veterinary sanitary control and surveillance in moving of objects transferred (transported) take one of the following decisions:
1) Permission to entry the country
2) Prohibition of import
3) Temporary suspension of import.

13. Importation to the country is carried out upon determination of compliance of the accompanying veterinary documents and transferred (transported) object with veterinary (veterinary sanitary) requirements.
State veterinary sanitary inspector makes a stamp "import permitted" on the accompanying veterinary documents for the object transferred (transported).
Transferred (transported) object is freely sent to destination with its subsequent registration at the destination and, if necessary, validation of its safety (sampling and laboratory tests).

14. Import prohibition of transferred (transported) object is carried out in case of the following:
1) inconsistency of transferred (transported) object with veterinary (veterinary sanitary) requirements;
2) absence of accompanying veterinary documents, permits issued by the Agency of the authorized body;
3) absence of complete information in the accompanying veterinary documents on compliance of the transferred (transported) object with veterinary (veterinary sanitary) requirements;
4) change (deterioration) of the epizootic situation in producer country or the country of origin of transferred (transported) object;
5) imported, exported volume (quantity) of transferred (transported) object exceeds the volume (quantity) of object specified in the accompanying veterinary documents.

Veterinary and sanitary inspector of veterinary control post stamps "import is prohibited." in the accompanying veterinary documents of transferred (transported) objects.

Owner of transferred (transported) object that was prohibited for import provides its export from the customs territory of the border points, or destruction (utilization) in case of a risk of entry of highly contagious disease.

15. Temporary suspension of import of transferred (transported) object is accepted in case of the following:
   1) sampling of transferred (transported) object is carried out and samples are sent to a veterinary laboratory in order to avoid entry of highly contagious diseases;
   2) need to clarify (confirm) data of accompanying veterinary documents and permits for the import, export of transferred (transported) object;
   3) change of the crossing point of transferred (transported) object (pending the issuance of a new permit).

16. Suspended transferred (transported) object is stored at temporary storage and/or detention centers before clarification and/or getting results of laboratory tests.

Upon confirmation of safety of transferred (transported) object based on the results of laboratory tests, access to the country is permitted.

In case of detection of highly contagious disease based on the results of laboratory tests import is prohibited with following destruction.

In determining inconsistency of transferred (transported) object with safety requirements import is permitted for utilization.

Utilization of transferred (transported) object and/or destruction of the contagious transferred (transported) object is carried out in accordance with the Rules for Utilization and Destruction of Food Products Dangerous to Life and Health of Humans and Animals, and Environment, approved by the Government Resolution of the Republic of Kazakhstan № 140 of 15 February 2008.

17. Upon importation of transferred (transported) object at the final point of its destination sampling and veterinary and sanitary inspection are carried out.

18. State veterinary and sanitary inspectors of VCP by the results of the state veterinary-sanitary control and surveillance shall make notes in registration book recording the export, import, transit of transferred (transported) objects.

19. State veterinary and sanitary inspectors of VCP report to the territorial subdivision of the Agency of authorized body in the service area of which it is located, about crossing of transferred (transported) object through the state border of the Republic of Kazakhstan which coincides with customs border of the Customs Union, including the final point of its final destination – upon import, point of its origin - upon export, about the route, stops, overload, places of feeding (drinking) animals, the conditions of transportation (hauls) - upon transit.

20. In case of crossing the state border into the territory of the Republic of Kazakhstan which coincides with customs border of the Customs Union of neglected animals, state veterinary and sanitary inspectors of VCP transmit mentioned animals to subdivisions of the agency of authorized body located at the respective border territories for putting them in quarantine before
a decision on its further use is made in the manner prescribed by the legislation of the Republic of Kazakhstan in the field of veterinary.

Approved
by the Government Resolution of
the Republic of Kazakhstan
N 407 of 28 April 2003

Rules of
Organization of Veterinary Control Points at the Border and Customs Points (Checkpoints Across the State Border of the Republic of Kazakhstan, which Coincides with Customs Border of the Customs Union Except for Vehicle Checkpoints)

1) The Rules of Organization of Veterinary Control Points at the Border and Customs Points (Checkpoints Across the State Border of the Republic of Kazakhstan, which Coincides with Customs Border of the Customs Union, Except for Vehicle Checkpoints) are developed in accordance with paragraph 4 of Article 20 of the Law of the Republic of Kazakhstan «On Veterinary» of 10 July 2002.

2) For conducting state veterinary and sanitary control and surveillance in order to prevent entry and spread of contagious and exotic animal diseases into the territory of the Republic of Kazakhstan from other countries, authorized state body in the field of veterinary at border and customs points (checkpoints across the state border of the Republic of Kazakhstan, which coincides with customs border of the Customs Union except vehicle checkpoints) organizes veterinary control posts (hereinafter - posts).

3) Posts are necessarily organized at border and customs checkpoints where transferred (transported) objects subject to state veterinary and sanitary control are transferred. In determining highly contagious animal diseases in the territory of neighboring states disinfection of vehicles is organized at checkpoints on time and in accordance with the legislation in the field of veterinary.

4. Posts are subdivisions of the agency of the authorized body in the field of veterinary.

5. Post operates in mode set for the checkpoint on the state border of the Republic of Kazakhstan which coincides with the customs border of the Customs Union and staffed by the necessary number of state veterinary sanitary inspectors.

6. The state veterinary sanitary inspector of positions are guided by normative legal acts of the Republic of Kazakhstan in the field of veterinary.

7. Interaction with other state regulatory authorities at border and customs checkpoints is carried out in accordance with legislation of the Republic of Kazakhstan.
