Reasons to cooperate with the EU LIFE Programme

• Need to encourage traditional SMEs to become greener due to the Green Deal and decarbonisation of our society by 2050
• LIFE is the main EU programme in this area and offers good opportunities for SMEs
• Use this cooperation to increase our members’ and their SMEs’ knowledge of LIFE as well
Kind of cooperation with the EU LIFE Programme

• Decided to draft leaflets written in a simple and entrepreneurial language to stimulate SMEs to achieve low hanging fruits first
• Selected sectors with a high environmental impact such as food, construction and transport in the first phase
Food waste prevention in the leaflet

• One of the objectives of the leaflet is reducing food waste
• SMEunited shares the Commission's objective of reducing food loss and waste. The recommendations of the EU Platform on Food Loss and Food Waste are a common ground to move forward
• SMEs by nature endeavour to prevent food waste not only to contribute to a more sustainable use of food, but also to reduce their costs and optimise their operation. Nevertheless, they often run into barriers due to the lack of information, necessary financial resources and even technical skills
• SME organisations are continuously working to raise awareness and provide guidance to Crafts and SMEs in order to integrate food waste prevention practices
