ASF: cases in wild boar in Germany

Start of outbreak until now (17.06.2021) Since last SCoPAFF report in April until now

1.311

1.058

253

Total

Brandenburg

Saxony

248

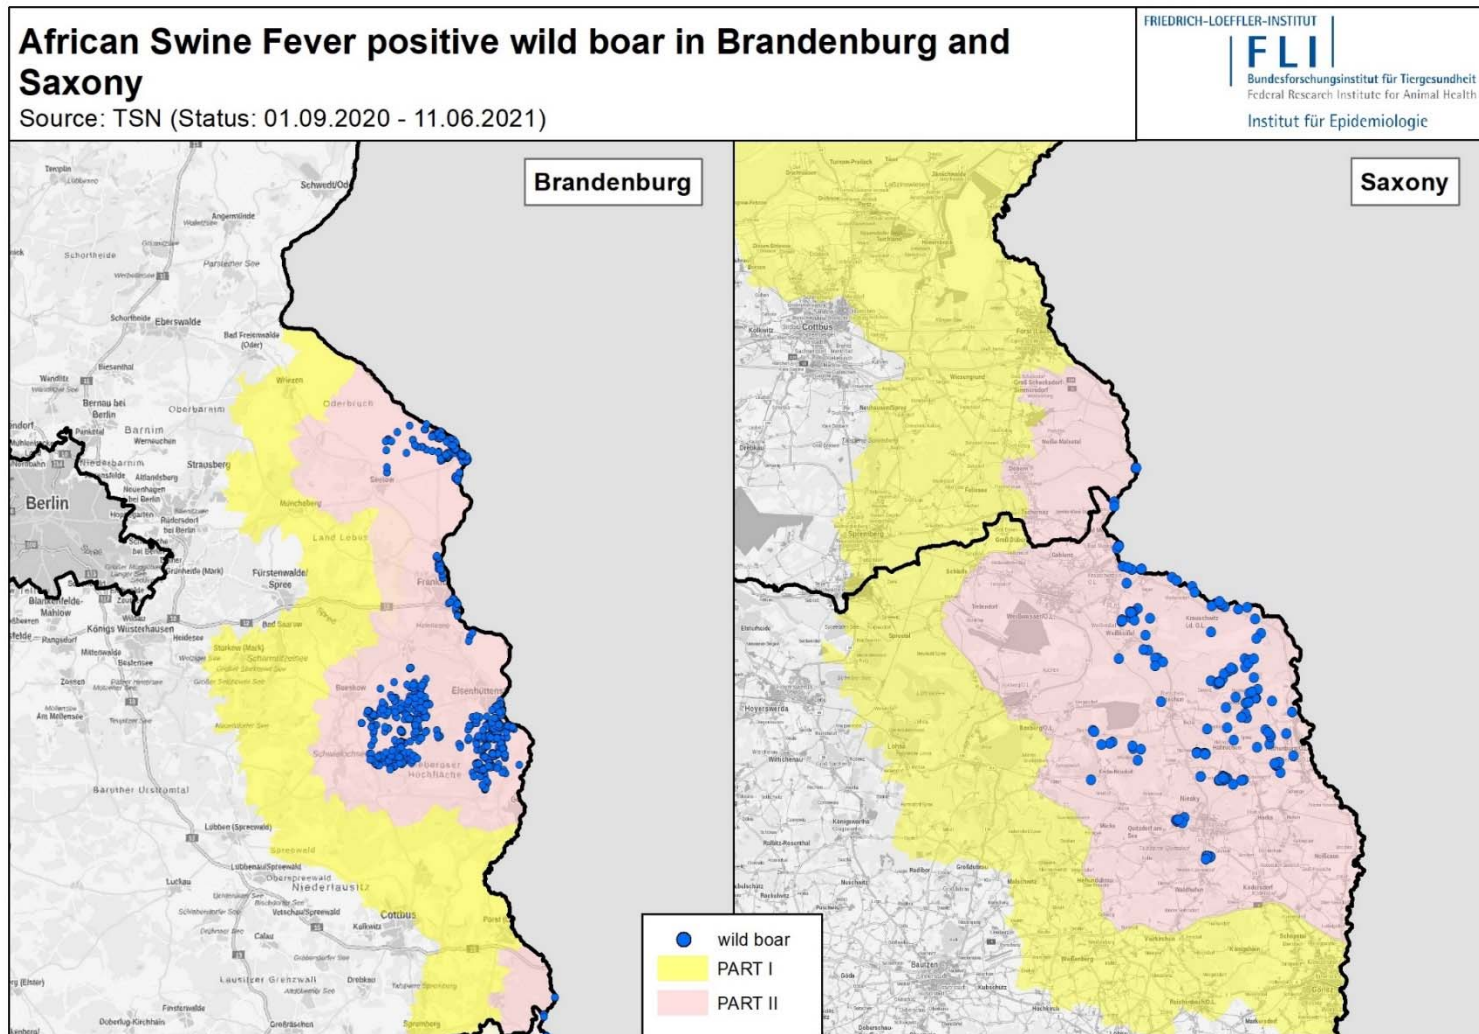

127

121

 No cases in domestic pigs!

ASF-cases in wild boar and part I and II zones as of June 11 - 2021

current enlargement of the part II zone in Brandenburg

- ✓ confluence of core zone Frankfurt/ Oder and Märkisch-Oderland (no. 4) as agreed with COM
- ✓ measures:
 - ✓ intensive and laminary search for carcasses
 - ✓ preliminary demarcation of the affected area with electronic fences/ hoardings
 - ✓ timely replacement of the electronic fences by solid fences after determination of the size of the affected area
- ✓ no need for enlargement of part I

restriction zones in Saxony

- ✓ measures:
- ✓ repeated and laminary search for carcasses supported by drones, trained dog teams (368 wild boar found dead (hereof 221 ASF-positive (ca. 60,1%))
- ✓ intensive efforts for removal of wild boar analog to Brandenburg (570 wild boars removed, hereof 30 ASF-positive (ca. 5,3%))
- ✓ ASF-testing in wild boar killed in car accidents: 1 of 56 ASF-positive (1,8%)
- ✓ use of traps with controlled triggering (30 traps in use since April 2021), activation dependent on expected hunting success, use only by trained hunters, 14 wild boar removed so far (ca. 2,6% of the total removals)
- ✓ enlargement of the restriction zones due to recent cases (14-6-2021) is in preparation (to south and western direction, > 10 km each)
- ✓ according to advice of EUVET experts the enlargement will be more extensive than before for precautionary reasons
- ✓ concrete scenario for the enlarged restriction zone

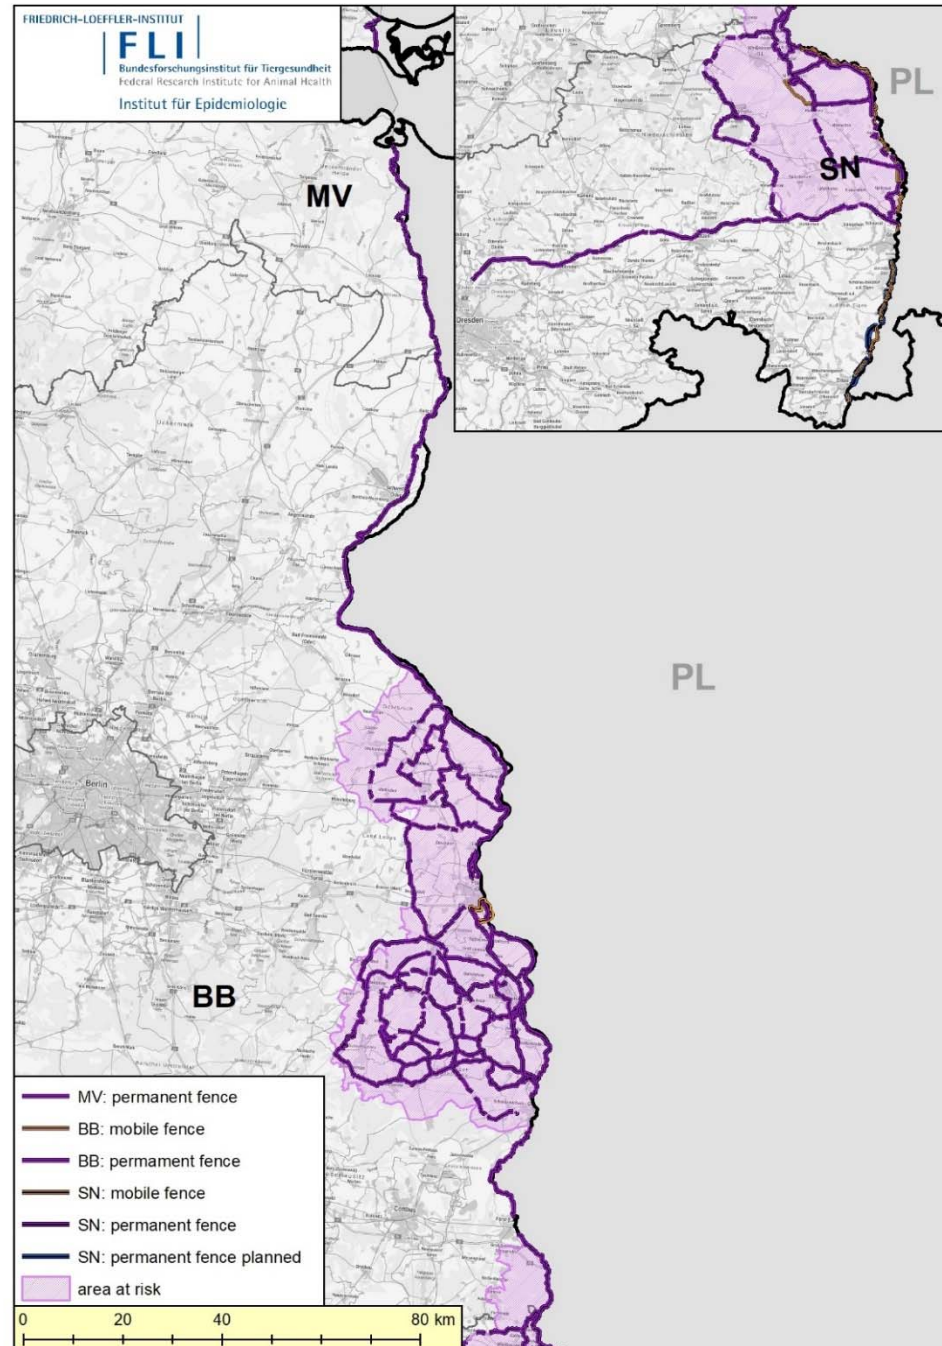

Fencing activities

Brandenburg:

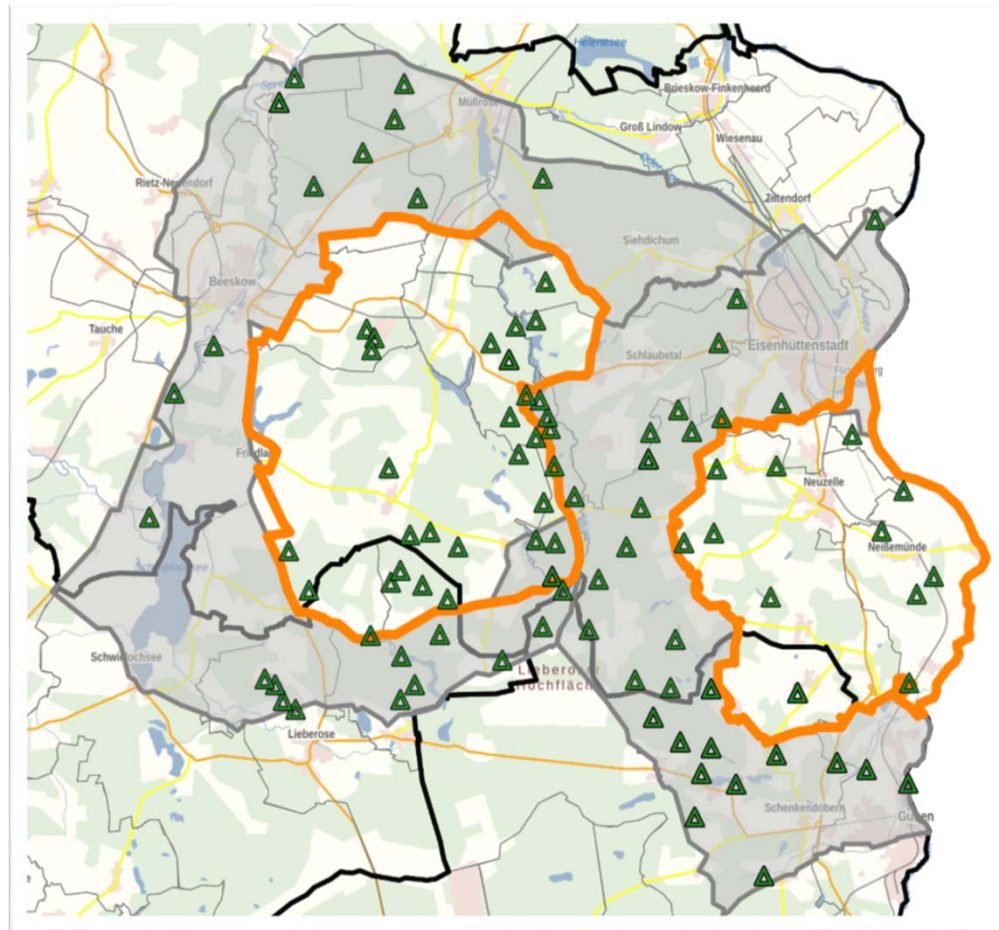

- finalization of replacement of the inner fence of the enlarged „white zone“ (electronic to solid fence) in LK Märkisch-Oderland/ Frankfurt/ Oder by June 1st
- demarcation of the outer solid fence of the „white zone“ almost completed
- (fencing of the „white zone“ in LK Spree-Neisse (LSN), Oder-Spree (LOS) and Dahme-Spreewald (LDS) was already finished in March)

Saxony:

- fencing with solid fences finalized in the critical areas
- due to vegetation period no new electronic fencing so far

Increased hunting activities in Brandenburg – trapping for wild boar

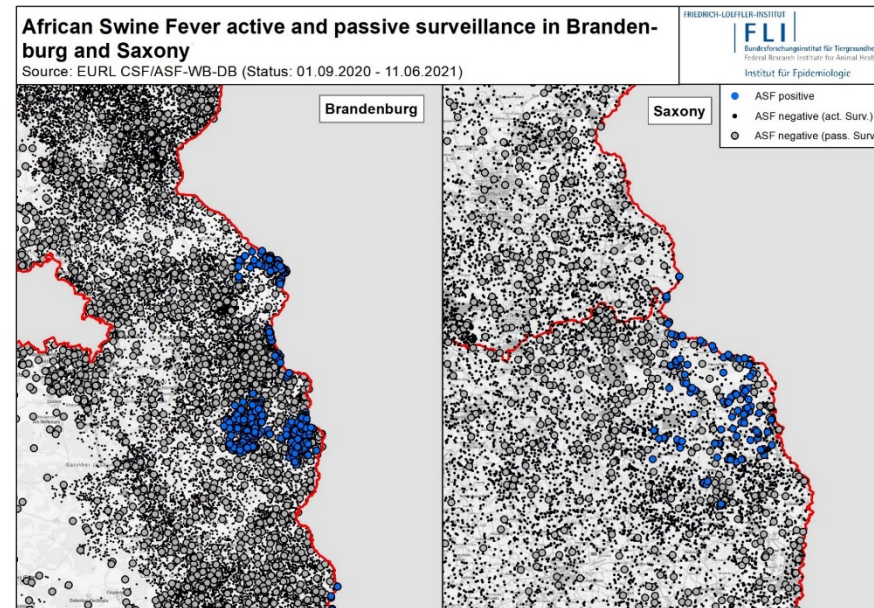

ictures: Land Brandenburg

f. e. in the „white zone“ LSN/ LOS/ LDS from February 1 to June 14 removal of 829 wild boar via trapping and single hunt in the „white zone“ and the core zones

ASF: CSF/ASF Database results in wild boar

Districts of the country considered free from ASF:

Districts of the country with parts being affected since September 10, 2020:

N° wild boar found dead	% PCR positive	% seropositive	N° wild boar found dead	% PCR positive	% seropositive
2.114	0	0	1.474	72,18	3.51
N° wild boar hunted	% PCR positive	% seropositive	N° wild boar hunted	% PCR positive	% seropositive
73.099	0	0	7.186	0,96	0
