A strong national commitment to develop measures which meet industry needs

- ✓ 15 national digitisation policies so far
- ✓ The national industry and ministerial voice in the EU for consultation, monitoring of the execution and decisions on orientations of EU strategy

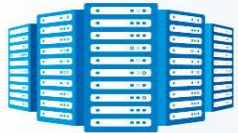

March Digital Day in Rome: Commitments for a Digital Future of Europe

11 Ministers & State Secretaries + industry leaders pledged to work jointly within the **EU Platform of National Initiatives**

In addition to commitment to

- build and deploy the next generation of **computing and data infrastructures** in Europe

- deploy **cross-border smart mobility corridors**

- participate in a pilot project to boost **cross-border digital work experiences**

- **Planned for October (date to be decided)**
- **Take stock of the achievements of the national initiatives**
- **Take stock of the outcome of the Working Groups:**
 - Digital Innovation Hubs
 - Digital Industrial Platforms
- **Prepare the next steps**
 - level of ambitions for the European Platform
 - future of existing Working Groups
 - future Working Groups on specific topics

- **A governance framework:**
 - High-level meetings of the European Platform, 2/year
also known as Roundtables
 - Stakeholder Forum, 1/year
 - Specific Working Groups
- **A collaborative website for sharing**
 - <https://ec.europa.eu/futurium/en/dei-implementation>
 - Catalogue DIH, reports, your uploaded contributions, ...
- **Catalogue of national initiatives**
 - Monitoring of the national initiatives (Futurium)
 - Digital Transformation Monitor and Reports, PwC
 - Analysis of the measures taken by national initiatives

Analysis of National Initiatives

**Monitoring and reporting back on the
development of National Initiatives for
Digitising Industry**

- Which kind of information Member States want to exchange regarding the best practices of National Initiatives, and in which format?
- Which collaboration mechanisms and exchange of best practices between countries should be set up?

- How should regular meetings such as this one in the preparation for the Roundtable be organised (overall, topic-specific, frequency of meetings, ...)?
- Which specific topics should the meetings address: best practices, standardization, investments, research and innovation objectives, etc.?

- What kind of additional Working Groups should to be launched at the Roundtable, with which mandate?

THANK YOU
