

Digital Industrial Platforms Action line

Outcome of the Working Group on Digital Industrial Platforms

European
Commission

WORKING GROUP 2

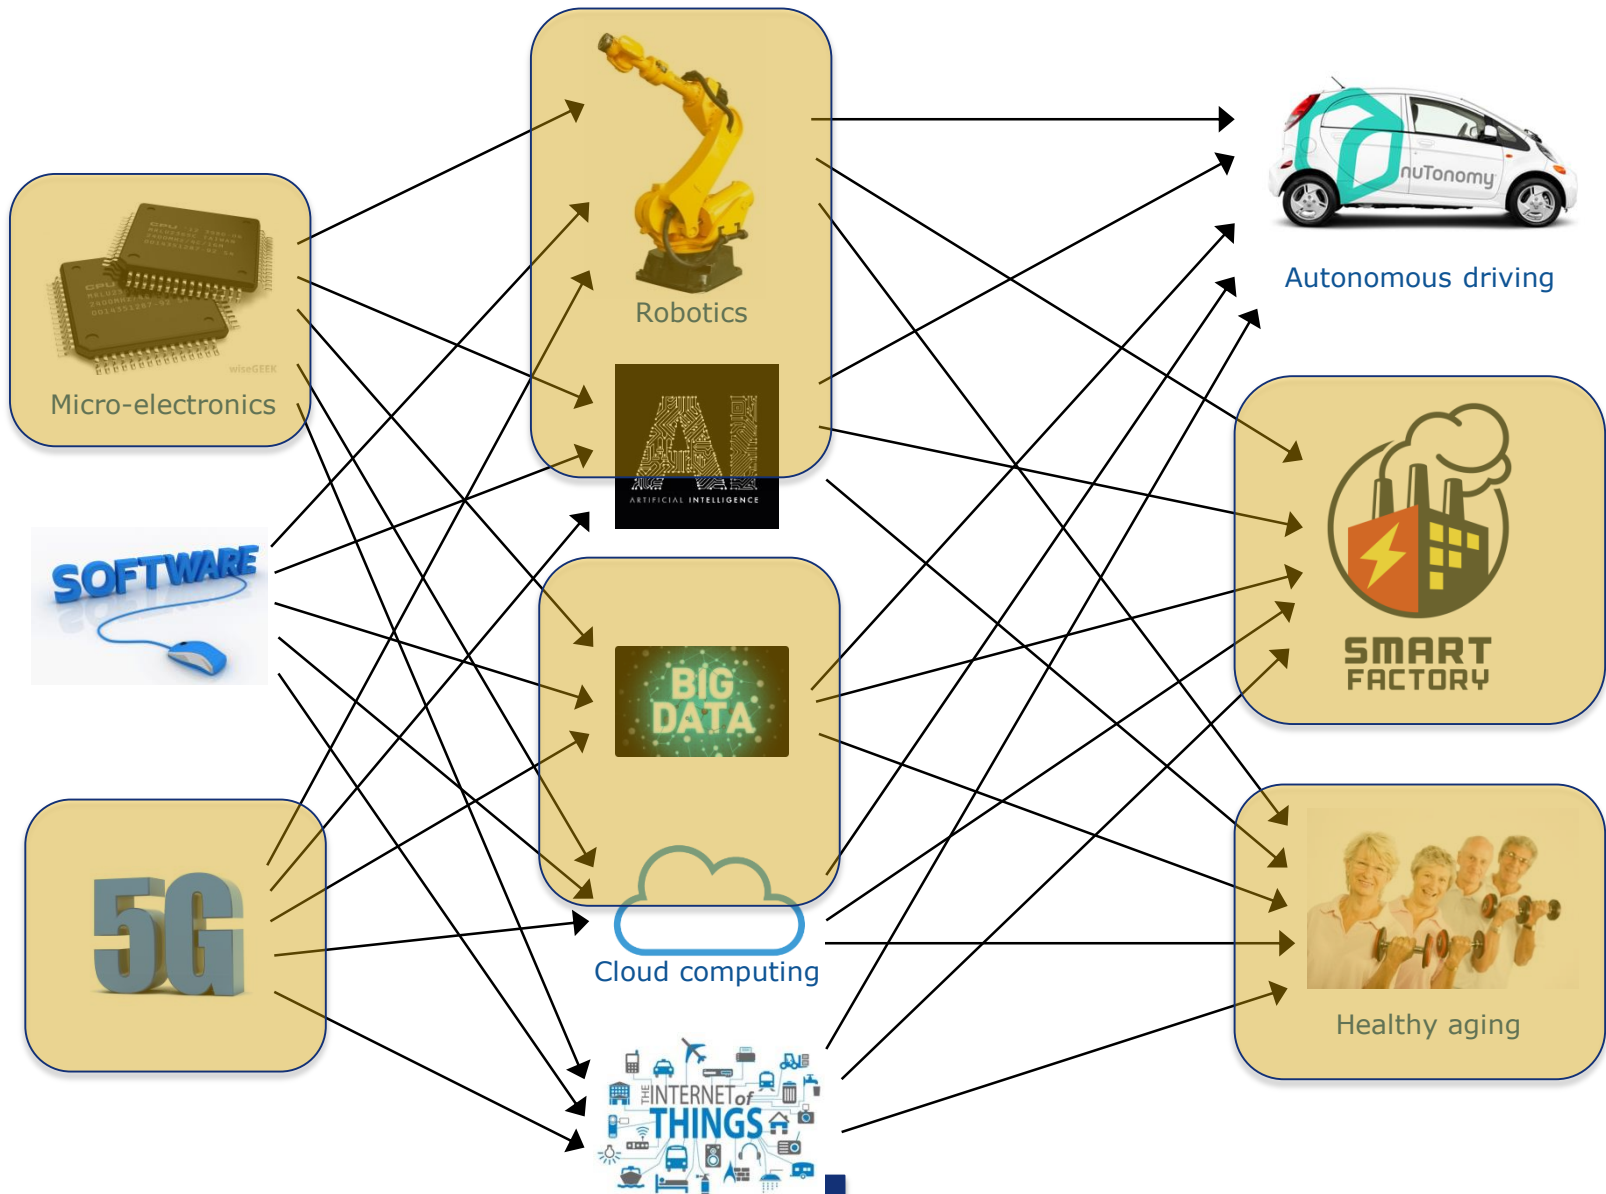

SETTING THE SCENE

European
Commission

INDUSTRIAL PLATFORMS

Technology Value Chains

POOLING EU, NATIONAL, REGIONAL, AND INDUSTRIAL INVESTMENTS

WORKING GROUP 2

OUTCOME

X *A place or opportunity for public discussion*
e.g. European Platform of National Initiatives

✓ *An **operating system** that **integrates** different technologies and various applications and services*

X *Online platforms*
in the consumer world
e.g. Facebook, Nest, Android

✓ *Industrial platforms*
*in the **business** world*

In different ways and to varying degrees they may take in:

- 1) a **community** role
- 2) an **infrastructure** role
- 3) a **data** role

European Commission

INDUSTRIAL PLATFORMS

Examples

Community-led sector-specific (vertical)

AUTOSAR

ISOBUS

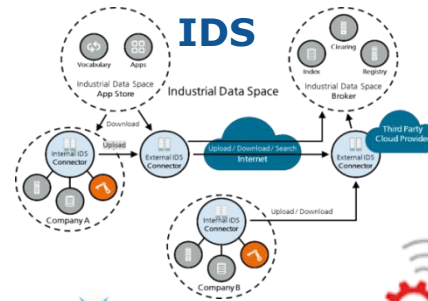

FITMAN

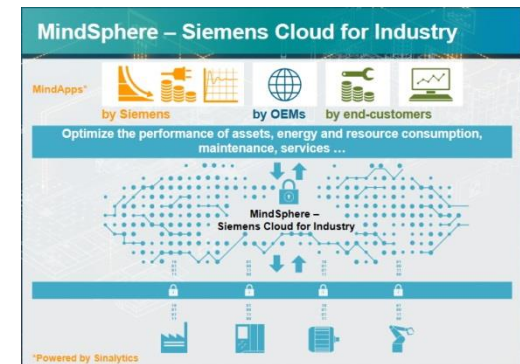

Community-led cross-sector (horizontal)

S3P
SMART, SAFE & SECURE PLATFORM

Proprietary with open interfaces

DASSAULT SYSTEMES

- Social and Collaborative apps**
Related brands: ENOVIA, 3DSWYM
- Information Intelligence apps**
Related brands: EXALEAD, NETVIBES
- Content and Simulation apps**
Related brands: 3DVIA, DELMIA, SIMULIA
- 3D Modeling apps**
Related brand: CATIA, GEOVIA, SOLIDWORKS
- Real time 3DEXPERIENCE Platform**

Subgroups within the WG2

**CONNECTED
SMART
FACTORIES**

**SMART
AGRICULTURE**

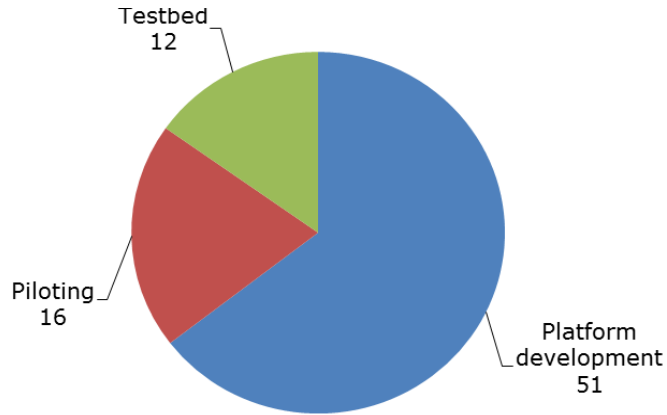

**DIGITAL
TRANSFORMATION
OF HEALTH & CARE**

Internet of Things (IoT)

Industrial Data Platforms

67 respondents – **12** national authorities / **55** experts from **14** countries

WG2: Strengthening Leadership in Digital Technologies and in Digital Industrial Platforms

OF HEALTH & CARE**

Internet of Things (IoT)

Industrial Data Platforms

Industry-Driven Platforms *Strategic Requirement for Europe*

- **FoF PPP** – discrete manufacturing
- **SPIRE PPP** – industrial processing

- **Cooperation agreements among national initiatives**

NL & DE – CPO certification roadmap

FR & DE – Joint Working Program & Common List of Scenarios

- **The importance of an "open" approach**

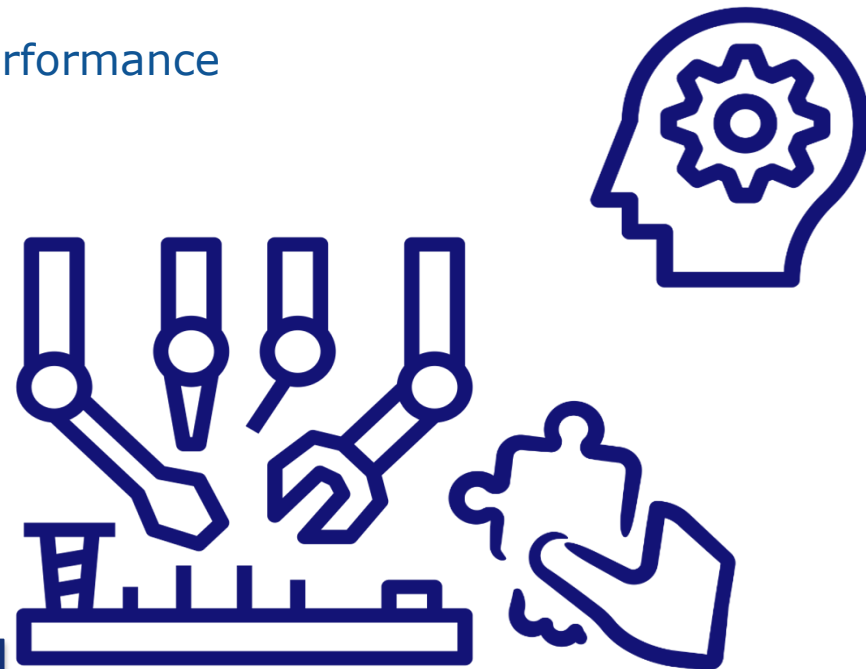

IIC – Industrial Internet Consortium (US-led)

Made in China 2025 & Internet Plus – Chinese investment level exceeds the level of investment in the EU

Some federating initiatives already exist joint mapping together with the PPPs

- ✓ **FoF project clusters** – ‘plug and produce’ approach
 - RIA** – on specific challenges (security, data liability, data analytics)
 - IA** – on bringing validation as close as possible to the manufacturing
- ✓ **SPIRE**
 - Cognitive production** – improved performance
 - Industrial Symbiosis** – optimization
 - Process Decision Making**

More details about the
national actions are still
needed!

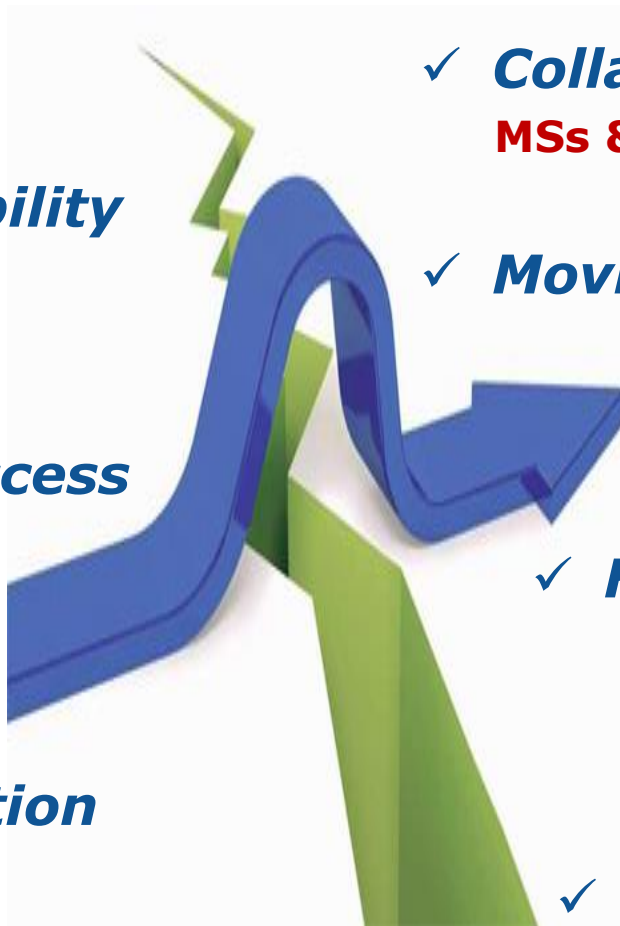

Interoperability & Integration of legacy systems in testing and validation efforts

❑ **Lack of interoperability**

❑ **Limits to access**

❑ **Fragmentation**

✓ **Collaboration & Joint efforts**

MSs & EC – detailed assessment of National Initiatives

✓ **Moving into realistic facilities**

Labs / testbeds / pilot lines / digital twin factories

Emphasis on validation, demonstration & experimentation

✓ **Federation**

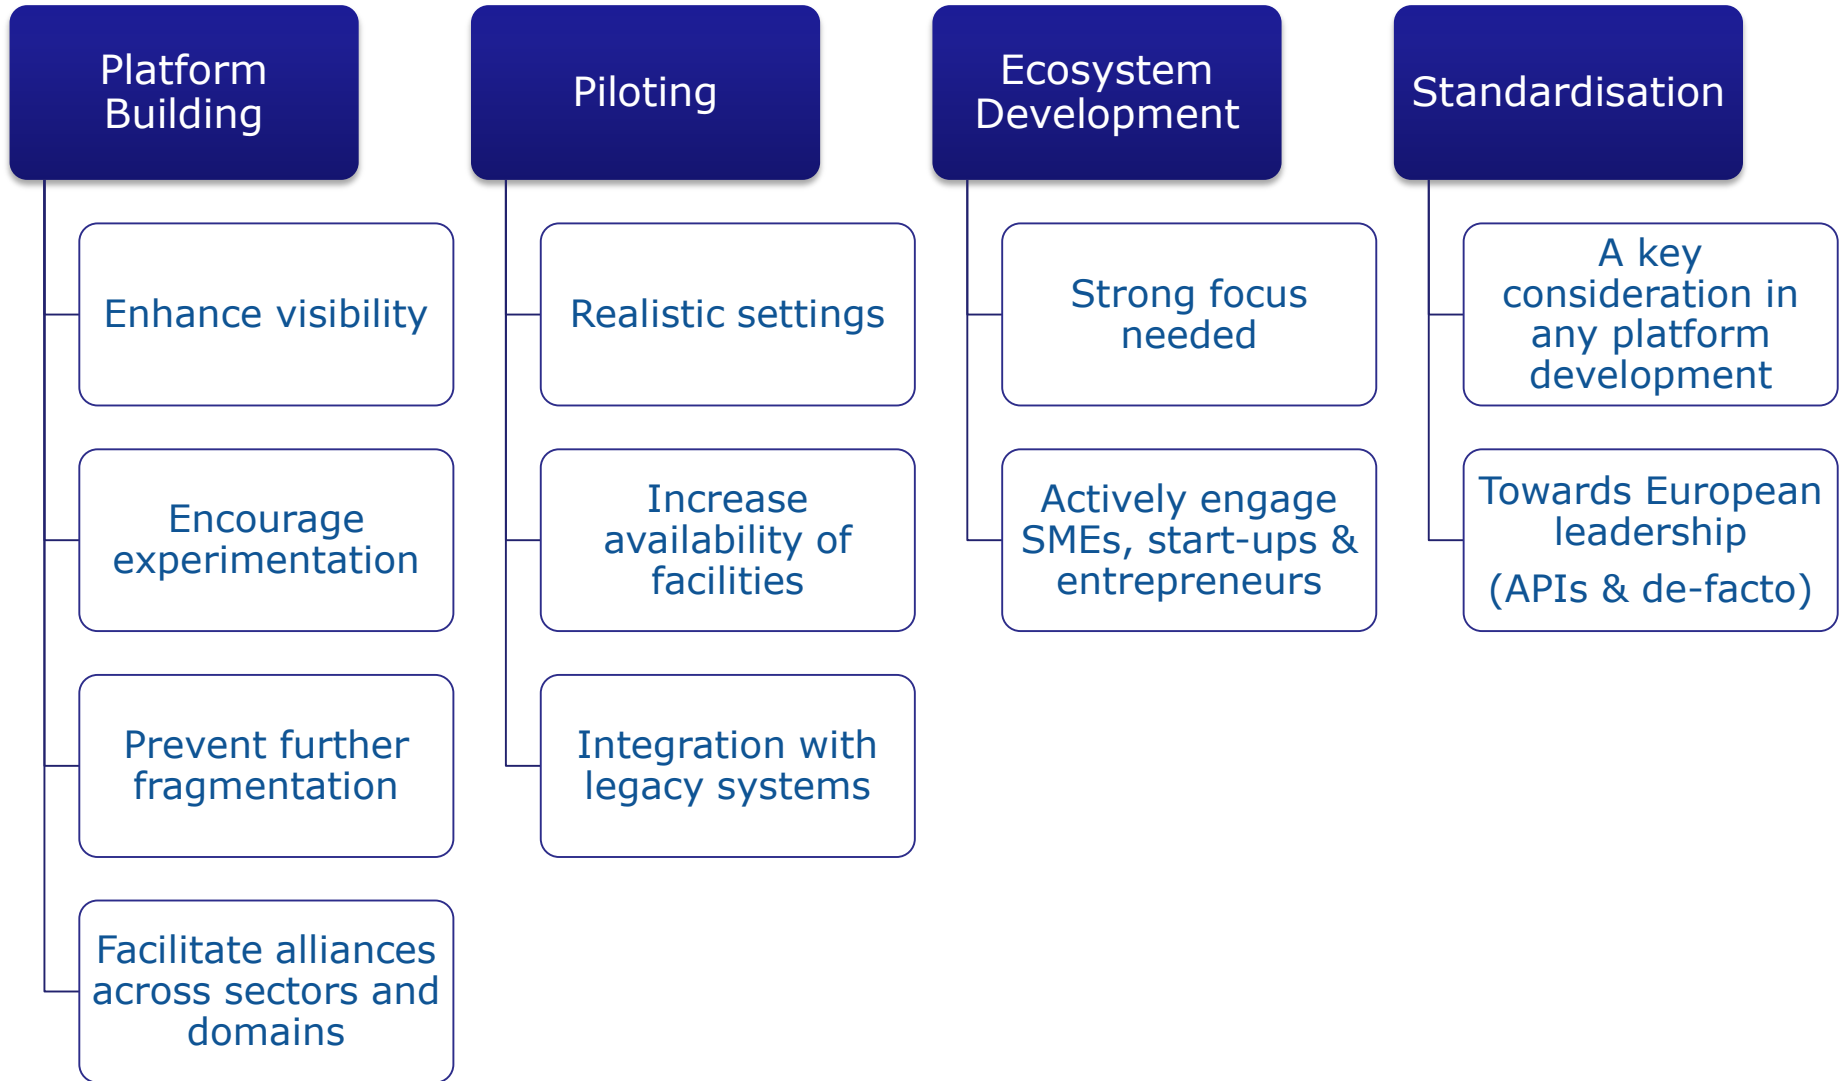

Increased acceptance

Connection & Leverage

Open APIs

Enhanced Security

✓ **Addressing economic, legal & social issues**

WG2: Strengthening Leadership in Digital Technologies and in Digital Industrial Platforms

**DIGITAL
TRANSFORMATION
OF HEALTH & CARE**

Internet of Things (IoT)

Industrial Data Platforms

Cloud-computing & Robotics *Technologies driving the sector*

- ***EIP-AGRI***
funded by MSs through Rural Development Programmes
Focus Group on Precision Farming
- ***BIODATA***
funded via the Big Data Value Association
Addresses data for agricultural applications
- ***IoT Large Scale Pilot (IoF2020)***
Real demonstrations in the agri sector
Promotes interoperability and standardisation
- ***euROBOTICS***
Planning to set up an Agri Food Lighthouse Project
- ***SMAG***
Farm management application for French Farmers
- ***Global Open data for Agriculture and Nutrition (GODAN)***
400 partners from national governments, NGOs and private sector
- ***Netfarming, a subsidiary of AGRAVIS***
German co-operative has developed an application for its members
- ***Commercial platforms***
 - **365FarmNet** – linking together applications and services of different providers
 - **MyJohnDeere** – access to agri machinery data
 - **PLM Connect** Farm Management Information and Decision System

Creating a consensus

- ✓ ***A number of PPPs*** – address issues of key relevance
Big Data PPP, FoF PPP, 5G PPP, euROBOTICS and Cyber Security PPP
- ✓ ***BDVA*** – task force addressing the Agri-Food Sector
- ✓ ***AIOTI*** – collaborating with the PPPs through:
 - WG06* – smart farming and food security
 - WG03* – standardisation
 - WG04* – policies

In regions which have identified agri-food priorities in their Smart Specialisation Strategies (**RIS3 plans**), measures can also be supported by **EARDF funds** implementing Public Procurement of Innovation (**PPI**)

Farmers at the center of collecting and processing of data

❑ ***Lack of interoperability***

❑ ***Existing data flows are not exploited***

❑ ***Links with co-operatives at the regional level***

❑ ***Requirements not based on the size & needs of the farm***

✓ ***Plug-and-play freedom***

Farmers easily shift to use other platforms

✓ ***Transparency***

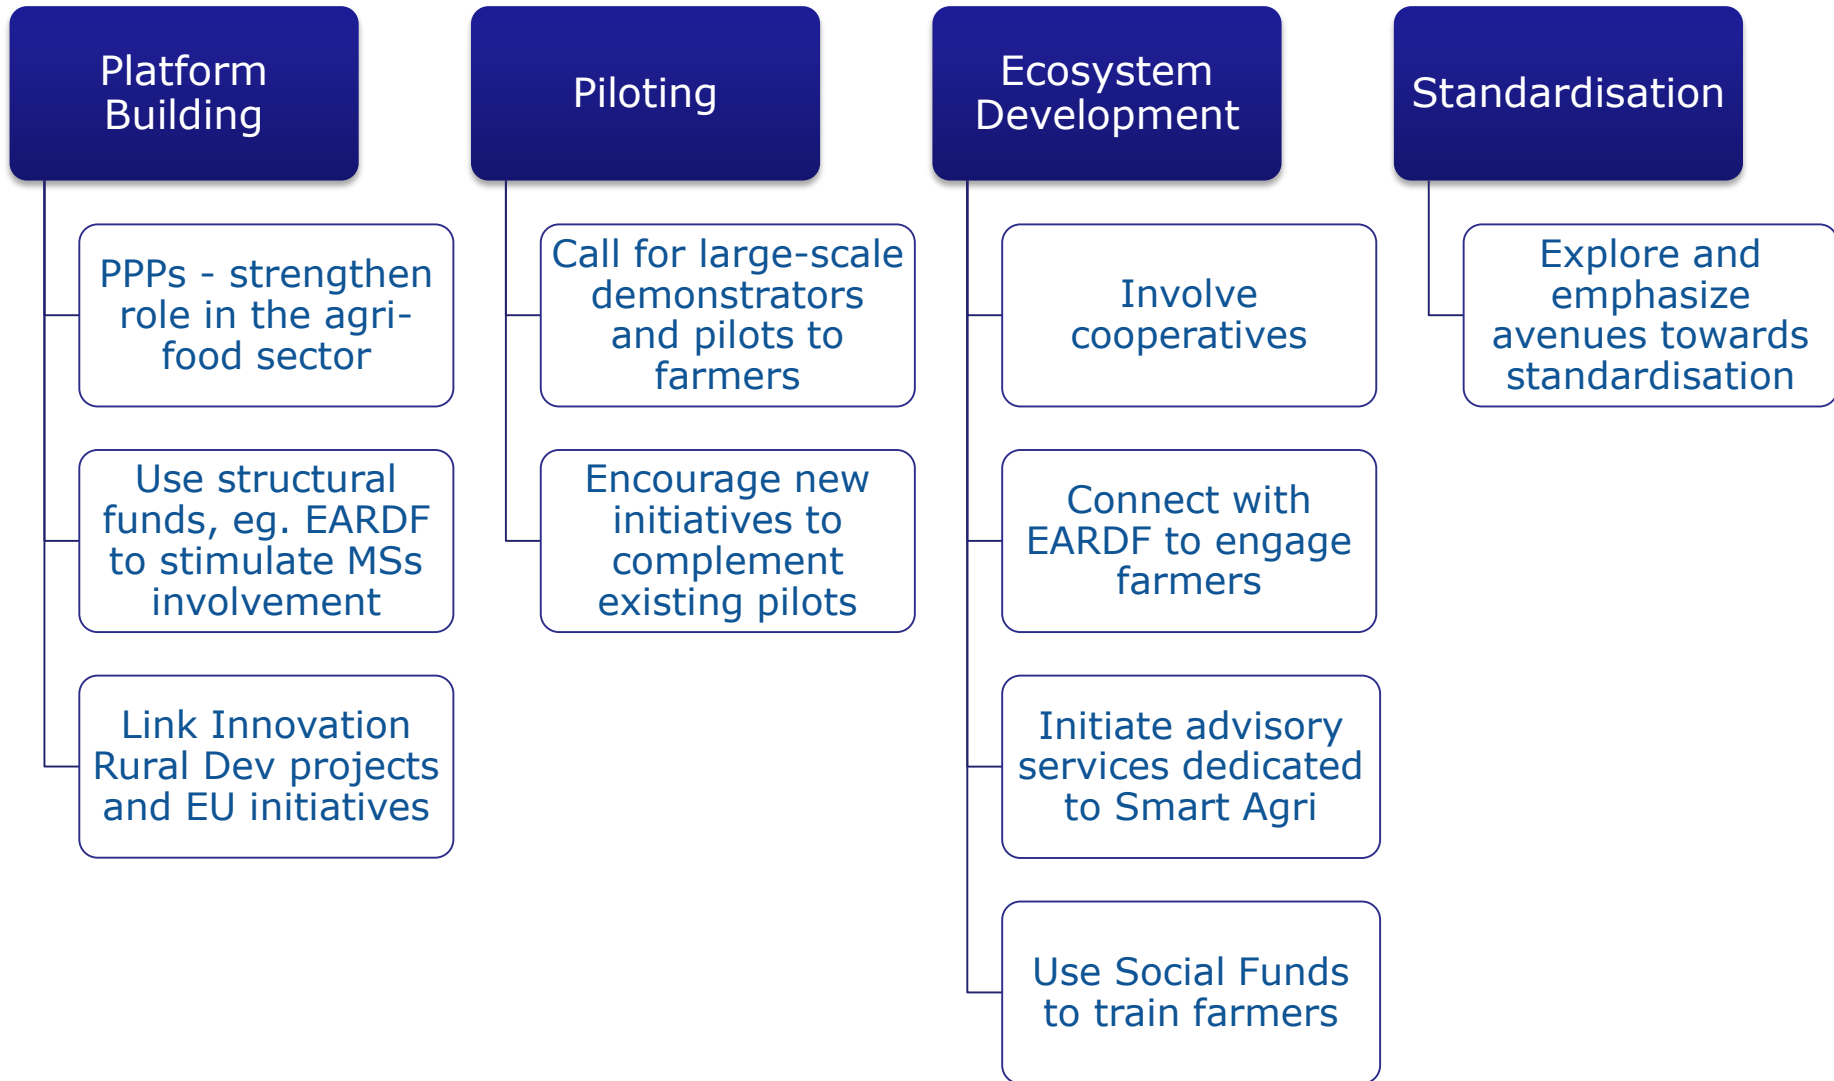

Clarification of rights to access and process data

✓ ***Hands-on experience***

Open Living Labs engage farmers and developers

✓ ***Platforms for optimisation***

Fertiliser / pesticide / water usage / quality

WG2: Strengthening Leadership in Digital Technologies and in Digital Industrial Platforms

**CONNECTED
SMART
FACTORIES**

**SMART
AGRICULTURE**

**DIGITAL
TRANSFORMATION
OF HEALTH & CARE**

Internet of Things (IoT)

Industrial Data Platforms

***Addressing 'social gradient' is key
(the link between income and health)***

EU initiatives

MSs initiatives

to federate their R&D and business development in this domain
Top Sector initiative Health in the Netherlands

Regional initiatives

Within the EIP-AHA
74 regions and initiatives with status of Innovation Reference Sites based on their local initiatives in health and care innovation

Large Industrial Companies

Embracing the domain of health and care

HealthSuite by Philips

Siemens investing substantially to position as a provider of medical technology

PPPs are important asset

to advance collaboration and quick market uptake

- ✓ ***A number of PPPs*** – address issues of key relevance

Big Data, HPC, 5G, euROBOTICS and Cyber Security PPPs

- ✓ ***Large projects***

scale up what is working and test what is new

- ✓ ***74 Reference Sites from EIP-AHA***

willing to spearhead upscaling of innovative solutions

- ✓ ***Member States***

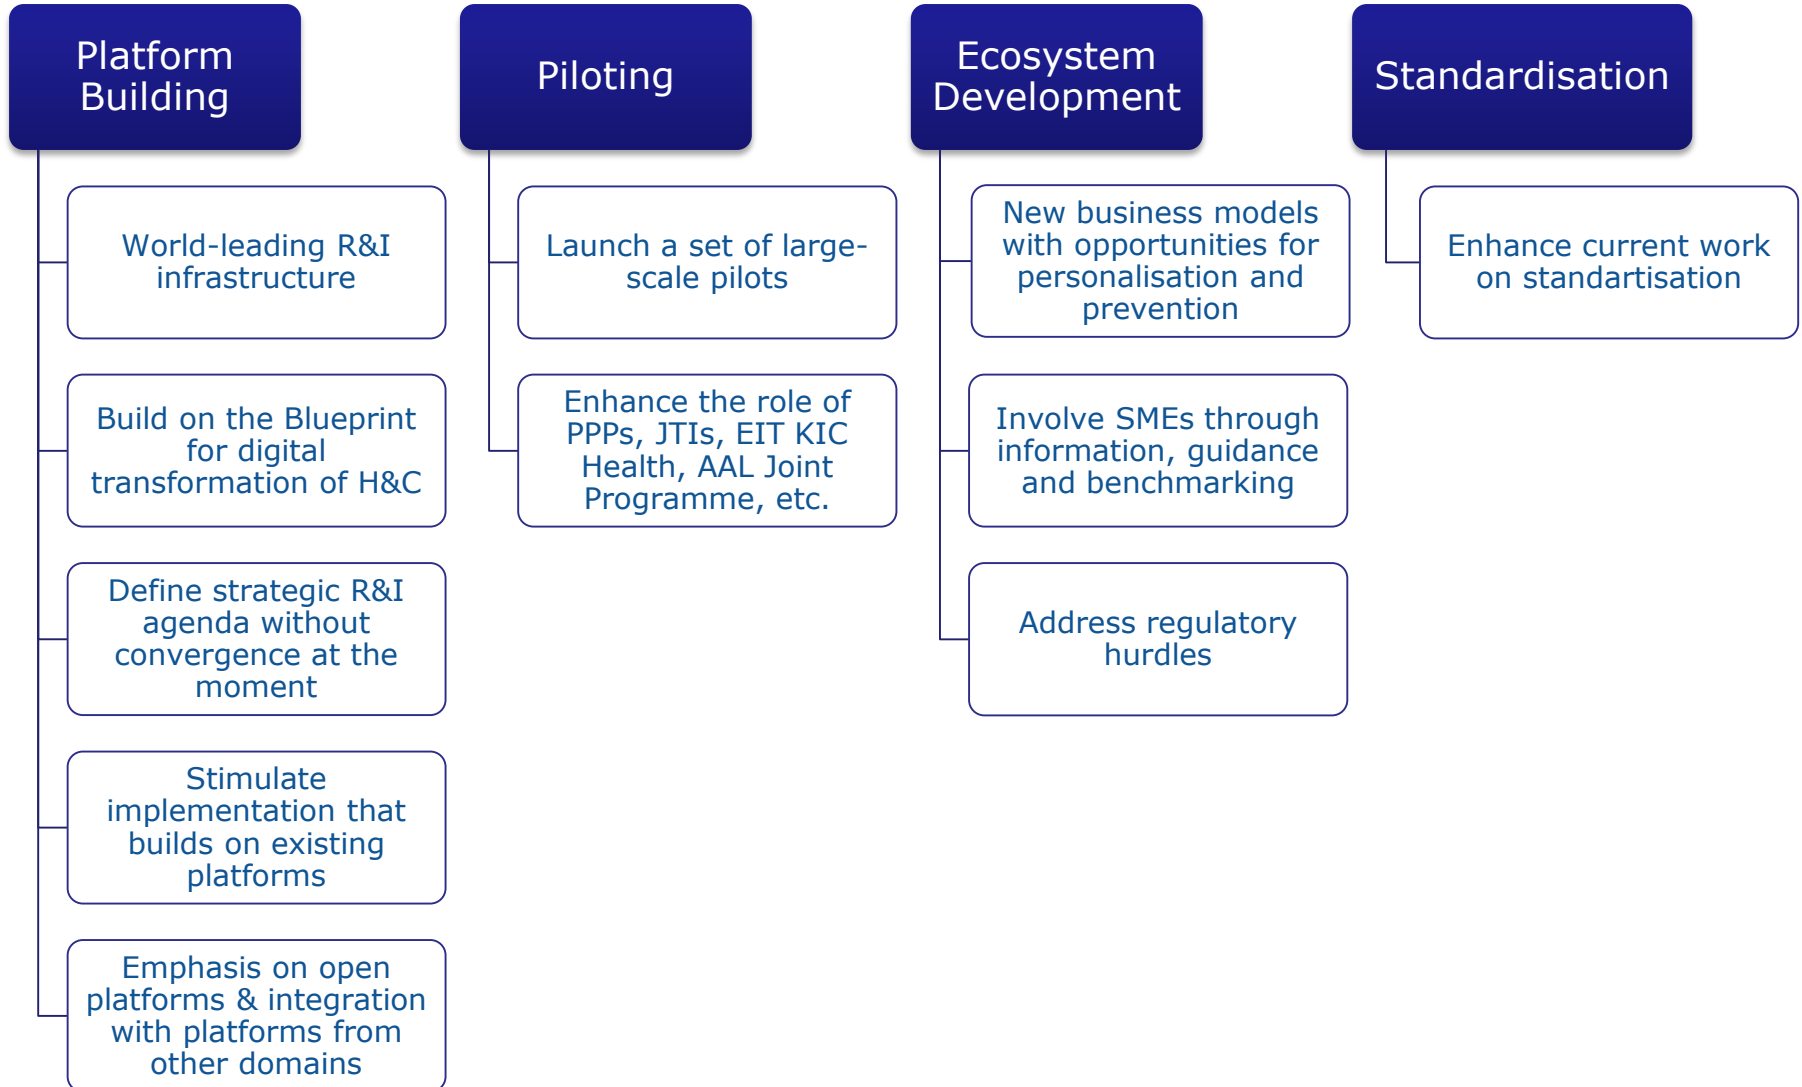

important role in addressing and harmonising regulatory, legal, and ethical aspects of digitisation in the domain

Member States are invited to **mobilize relevant national initiatives** to take this vision forward.

Interaction and strong synergies among current EU and national/regional initiatives

- ❑ **World-leading infrastructure**
build on the European Cloud Initiative and European Open Science Cloud
- ❑ **Large-scale market creation**
support from the ESIF; regional innovation "twinning schemes"
- ❑ **Enabling conditions**
reduce fragmentation of national legislation & the uncertainty of access, use & sharing of data
- ❑ **Constraint within national platforms**
Ethics and privacy to be taken into account at an international level
- ❑ **Big Data Importance**
address issues of data storage and processing
- ❑ **Cross-disciplinary research and clinical validation**
Blueprint – *Shared political vision on DSM transforming Europe's aging society*

The European Open Science Cloud, Free Flow of Data Initiative,
High performance Computing

WG2: Strengthening Leadership in Digital Technologies and in Digital Industrial Platforms

**CONNECTED
SMART
FACTORIES**

**SMART
AGRICULTURE**

**DIGITAL
TRANSFORMATION
OF HEALTH & CARE**

Internet of Things (IoT)

Industrial Data Platforms

Industrial Data Platforms (IDPs) *crucial for the digitisation of industrial production*

✓ **Private sector**

MindSphere by Siemens and SAP

✓ **Big Data initiatives**

Germany, Denmark, the Netherlands, and Spain

✓ **Cross-border membership**

Industrial Data Space, launched in Germany with members from other countries

✓ **European Network**

European Network of National Big Data Centres of Excellence

✓ **PPPs contributions**

i-Spaces by BDV PPP – incubators for new business models and skills

Lighthouse projects by BDV PPP – incubators for whole data-driven ecosystem

FoF PPP – data management for increased production performance

Cooperation with **MSs** is essential to reinforce the role of **PPPs**
as coordinators of **EU-wide R&I effort**, national initiatives
and industrial strategies

Industrial Data Platforms ***prompt transparent discussion on trust***

❑ **Legal issues – right to access and process data**

✓ **Relevant laws**

IP law including database and design law

Privacy law

Competition law

COM (Jan 2017) - 'Building a European data economy'

❑ **Technical challenges of sharing data**

✓ **Technical solutions for legal issues**

Model contracts respecting the rights and interests of the parties

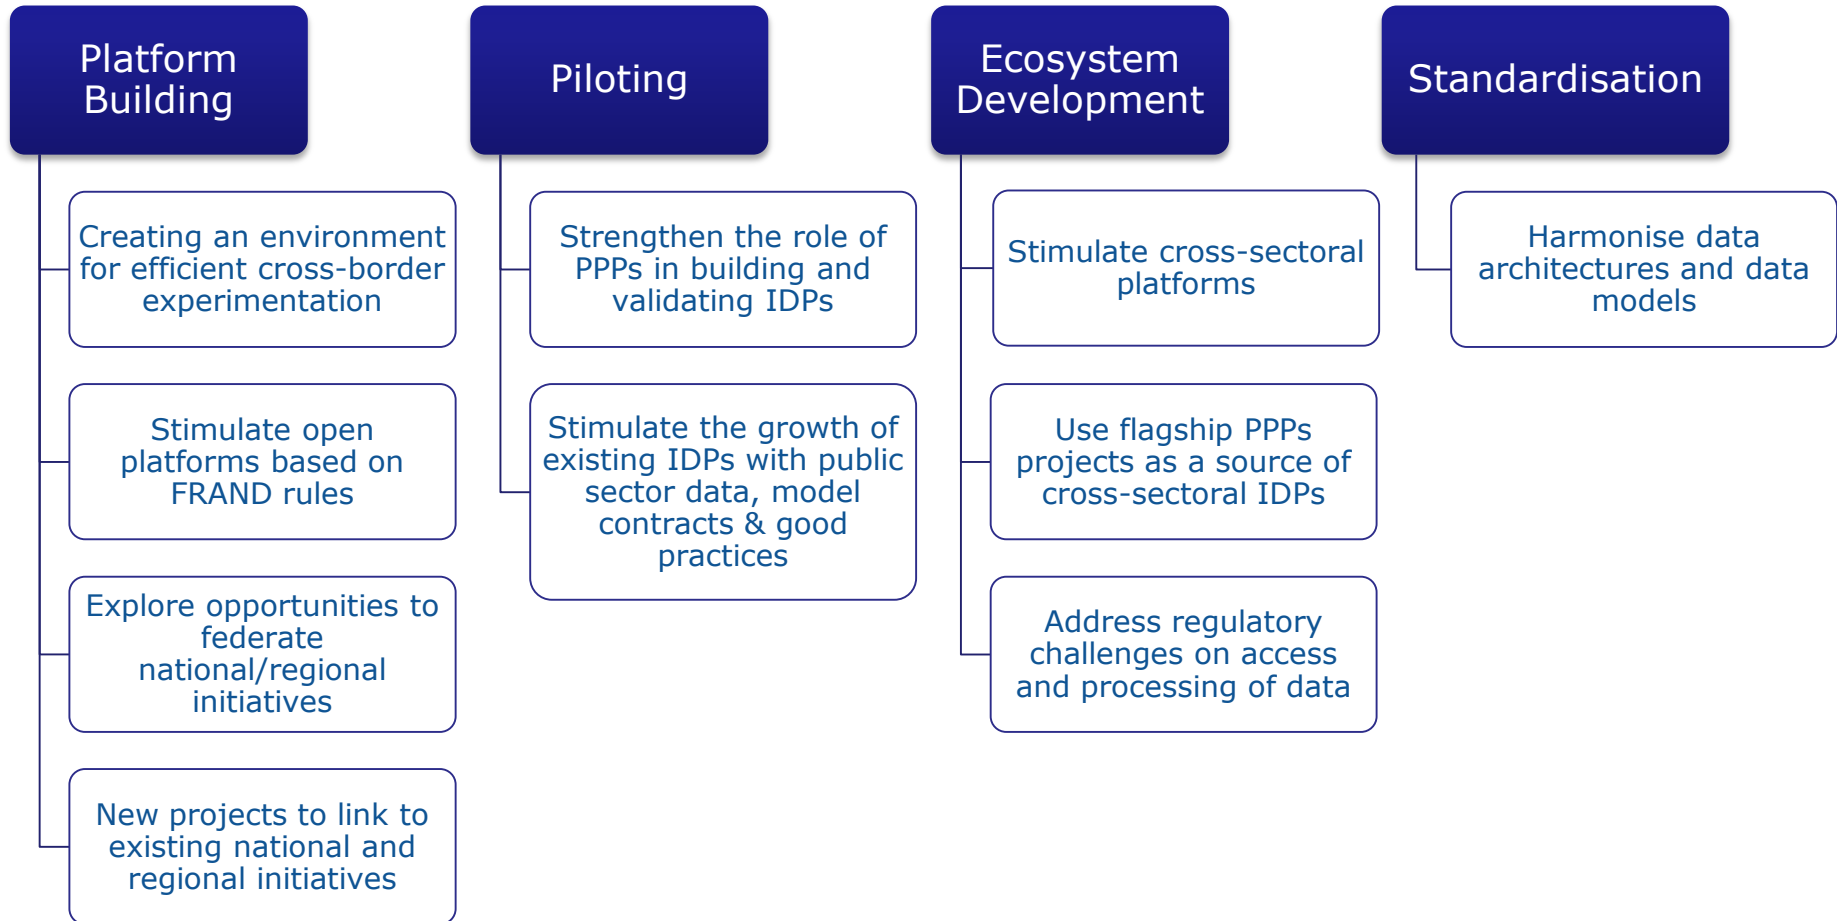

Possibility of **certification** of parties to ease the organisation of data exchange

Collaboration b/n MSs and the EU to encourage experiments

Clarification of rules at EU level: security, confidentiality, international transfer

Benefits of the data economy to reach **SMES** in all sectors

Skills development

WG2: Strengthening Leadership in Digital Technologies and in Digital Industrial Platforms

**CONNECTED
SMART
FACTORIES**

**SMART
AGRICULTURE**

**DIGITAL
TRANSFORMATION
OF HEALTH & CARE**

Industrial Data Platforms

Internet of Things (IoT)

- **European Initiatives**

- **IoT-EPI cluster**

- **FoF** and **ECSEL** (ARTEMIS-IA, EPoSS, Aeneas)

- Alliance in the Internet of Things Innovation (**AIOTI**) – acting as a technology platform

- **National Initiatives for IoT**

- **'La French Tech'** – with a number of supporting regional initiatives

- **Industrie4.0, Germany** – supports IoT-related research for manufacturing

- **International Initiatives** - **>360 known platforms exist**

- **US vs EU** – lower barriers to deployment; IoT are driven by private investment and therefore less interested in international cooperation

- **Industrial Internet Consortium (IIC)** – GE, Bosch and Microsoft are members

- **Coordinating activities among PPPs**

- **ECSEL, Big Data, 5G**, etc. on cross-sectorial and integrated digital platforms

- **AOITI** and **ETSI** with an important role in horizontal coordination for scaling up

Some MSs are keen to have a **common standard platform for IoT** that is agnostic of hardware

Convergence driven by the market *a focus on a European approach to standards*

❑ **Platform development is driven by different sectors**

⇒ *differences in national initiatives*

- ✓ *Initiatives that foster more explicit actions between MSs are needed*

❑ **Proliferation of platform offerings**

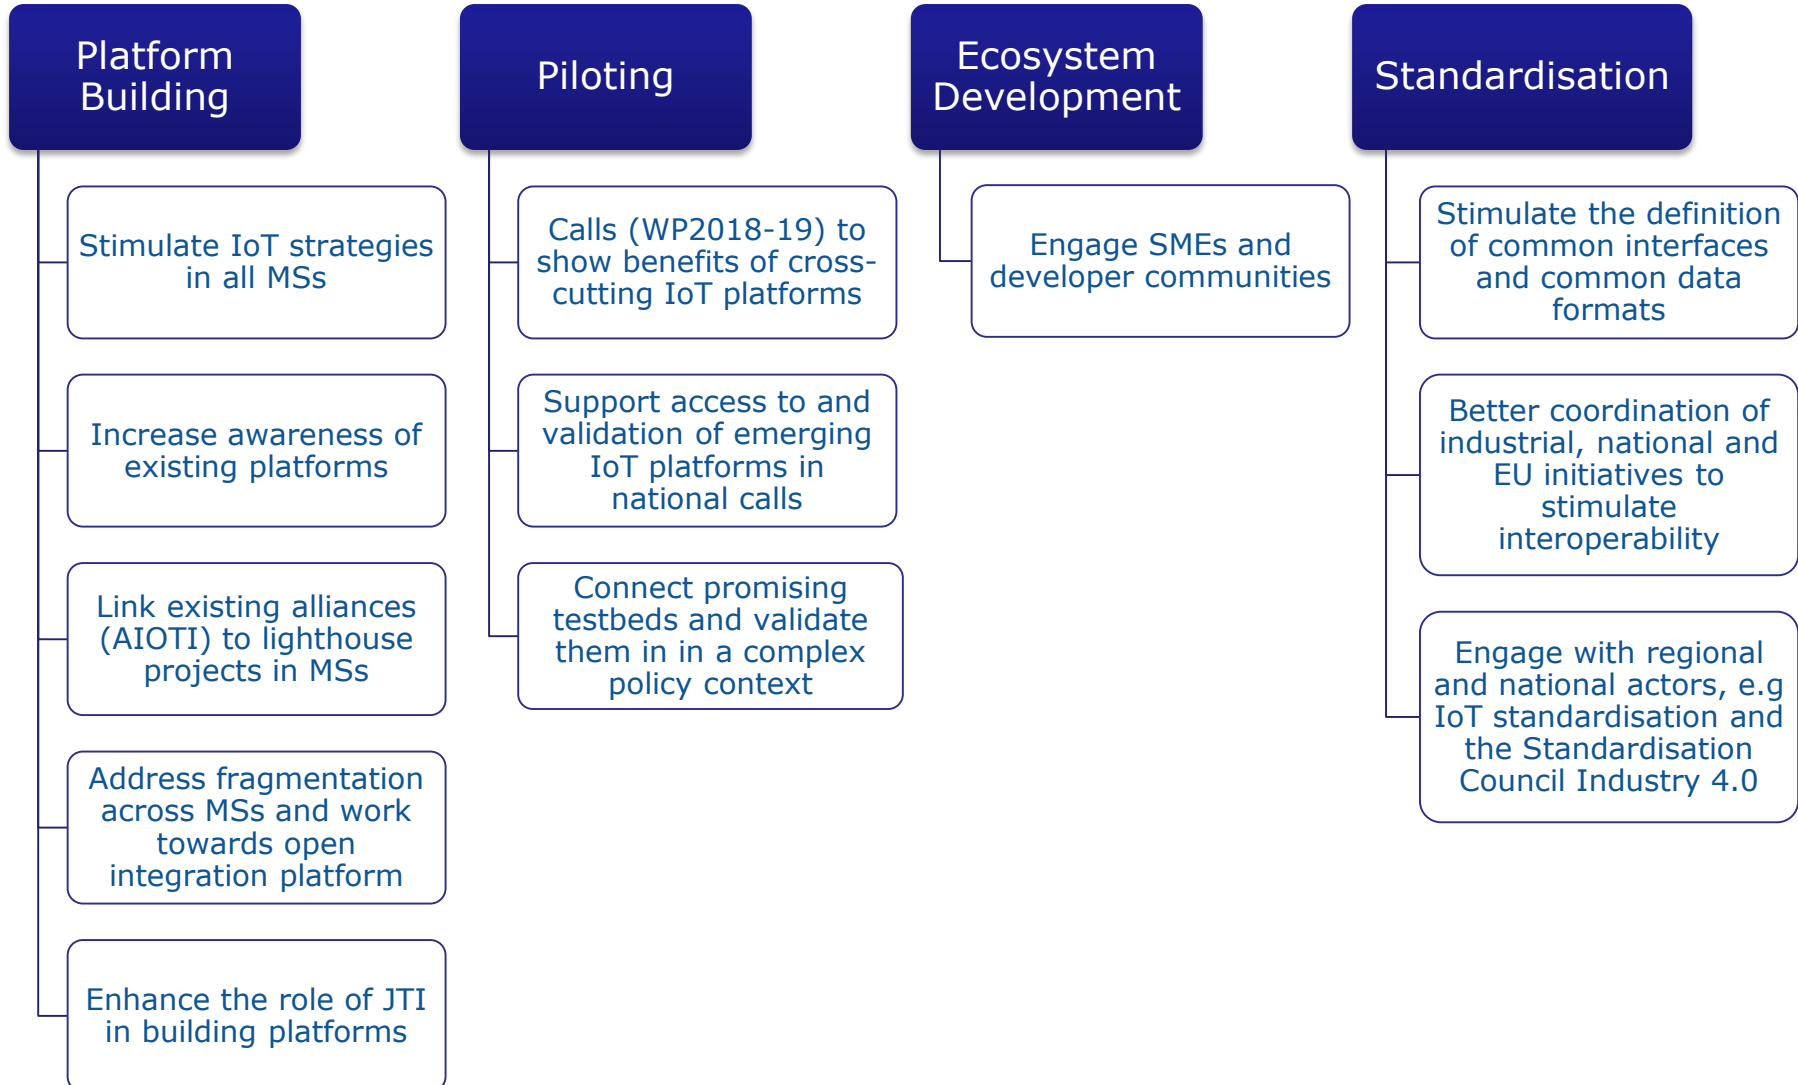

⇒ *considerable fragmentation*

- ✓ *Harmonised European market for IoT interoperability standards and open APIs is a prerequisite to reduce dependencies and barriers for SMEs*
- ✓ *SMEs have a role in leveraging the potential in IoT innovation – faster in developing applications and exploring less conventional solutions*
- ✓ *Large-scale pilots to get the SMEs and start-ups involved*

❑ **Number of developments underway**

⇒ *silos of security, standards, applications and infrastructure*

- ✓ *A need for clustering to create scale*

PLATFORMS AND PILOTS

WORK PROGRAMME 2018-2020

Key objectives

- Future global standards & platforms driven by **interests of EU actors**
- EU actors **join forces** along common interests
- European industry needs to come to **agreements on functions and interfaces** for those platforms, reference architectures and interaction protocols that have the potential to create markets and market opportunities leading to ecosystems and standards

EU investments of 300 M€ in 2018-20

**DIGITAL
MANUFACTURING
PLATFORMS**

- Agile Value Networks: Lot-size One
- Zero-defect Processes and Products
- Machines & Human Competences
- Sustainable Value Networks

**PLUG & PRODUCE
EQUIPMENT
PLATFORM**

...

**AGRICULTURAL
DIGITAL
INTEGRATION
PLATFORMS**

- Optimize farm operations
- High-precision farming

**DIGITAL SERVICE
PLATFORMS FOR
RURAL ECONOMIES**

...

**SMART HOSPITAL
OF THE FUTURE**

- SMART AND
HEALTHY LIVING
AT HOME**
- Healthy & independent living
- Early risk detection and intervention

...

**INTERNET OF

Cross-cutting issues, IoT, Big Data, Security...

Focus Area 'Digitising and transforming European industry and services', Platforms and Pilots

LEIT-ICT

DT-ICT-07-2018-2019: Digital Manufacturing Platforms for Connected Smart Factories

95 M€

DT-ICT-08-2019: Agricultural digital integration platforms

15 + 15 M€

DT-ICT-09-2020: Digital service platforms for rural economies

15 + 15 M€

DT-ICT-10-2018-2019: Interoperable and smart homes and grids

15 + 15 M€

DT-ICT-11-2019: Big data solutions for energy

15 + 15 M€

DT-ICT-12-2019: Smart and healthy living at home

25 + 35 M€

DT-ICT-13-2020: The smart hospital of the future

25 M€

DT-ICT-14-2019: Digital Platforms/Pilots Horizontal Activities

3 M€

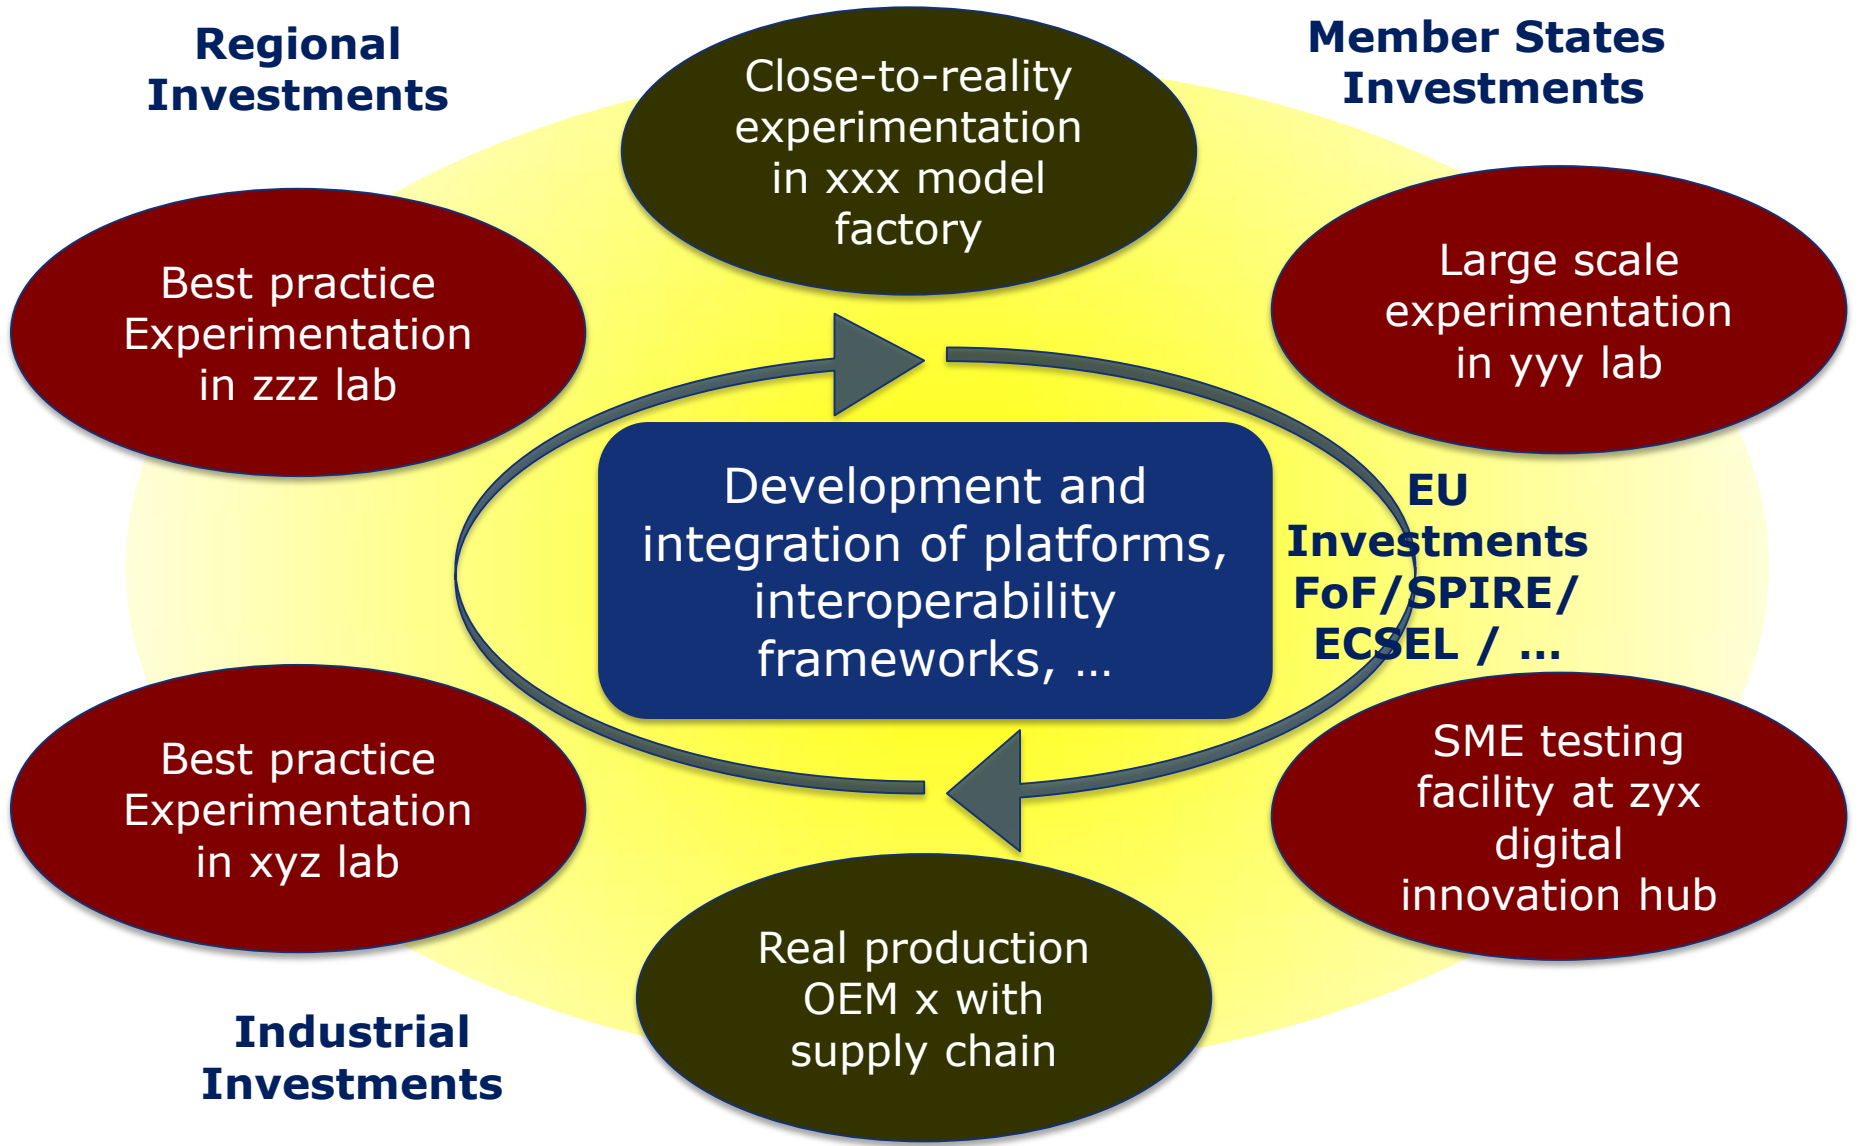

LEIT-NMBP:

- **DT-NMBP-20-2018: A digital 'plug and produce' online equipment platform for manufacturing** **20 M€**

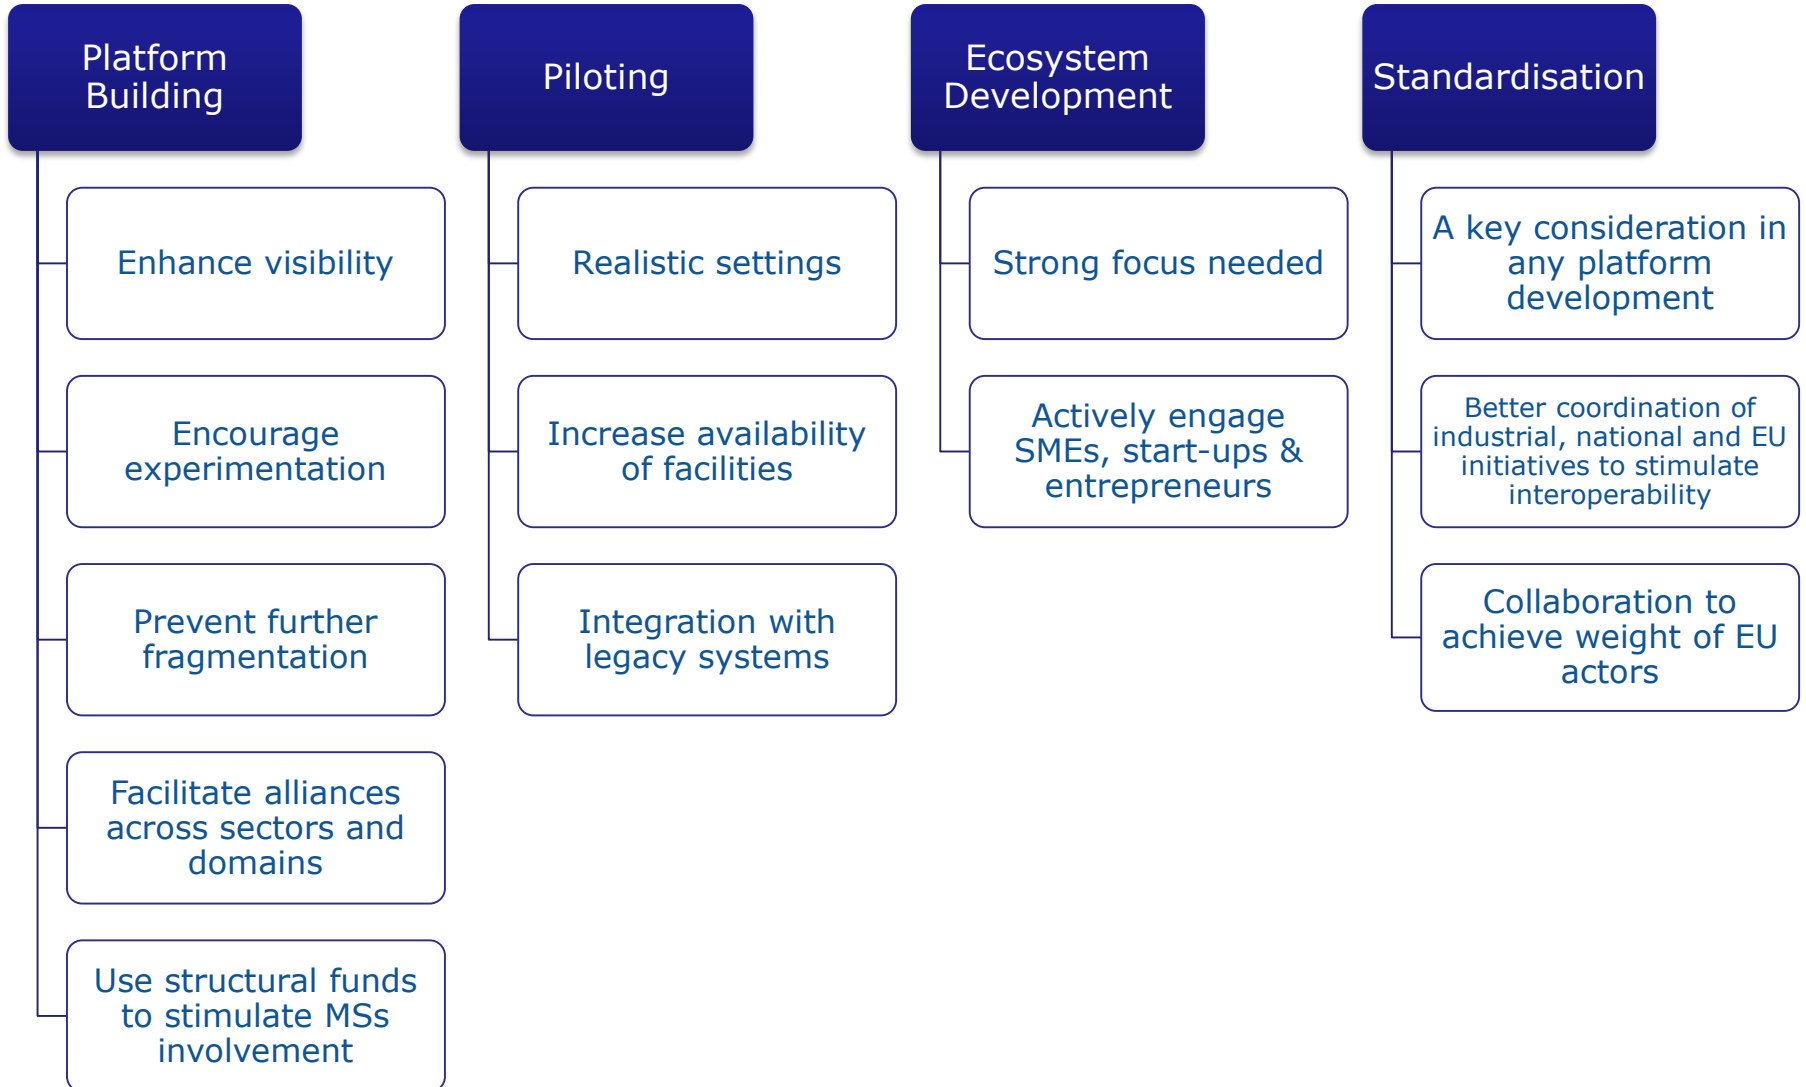

POOLING EU, NATIONAL, REGIONAL, AND INDUSTRIAL INVESTMENTS

European
Commission

CONCLUSIONS & NEXT STEPS

- **Q to MS:** Which **initiatives and investments** do you envisage in your MS in the next 5 years for programs on digital industrial platforms, piloting, and testbeds? Do you see needs and **possibilities for linking** these programs to activities on EU level and by other MSs?
- **Q to cPPPs:** cPPPs are organised by digital technology focused. How do you see **your role in integrating** all relevant digital advances in vertical/sector-specific platform initiatives, which cut across technology silos?
- Do you see any **promising platform initiatives** and **pilot projects** that should be scaled up to full deployment, with enlarged ecosystems? For such scale-ups, how do you see **the role** of several sources of EU, national, regional and private **financing**?
- Do you see the need for **a partnership instrument** to implement joint industrial digital strategies across the EU, that allows for pooling of substantial resources to tackle grand challenges, involving large industry and SMEs, startups, RTOs, and academia.

- Provide specific **support to start-ups, SMEs and mid-caps**
- Reinforce **national/regional activities** and link them to EU activities
- Promote the approach of **open platforms and piloting** towards **standardisation**
- Trigger **co-investment**

Cooperate with EC to **coordinate strategy and finance** at regional, national and EU levels
