

Workshop on Digitising European Industry

EUROPEAN DIGITAL TRANSFORMATION AND STANDARDISATION

Antonio Conte

Project Manager

*Unit F3 - KETs, Digital Manufacturing
and Interoperability*

DG GROW

Emilio Davila

Head of Sector ICT standardisation

Unit F3 - Start-ups & Innovation

DG CONNECT

Digital Transformation of European Industry

A recognised yet untapped opportunity with positive outcomes

75% of respondents regard digital technologies as an opportunity

64% of companies investing in digital technologies have generated positive outcomes

44% of respondents have adopted at least two of the seven key digital technologies

Low adoption rate of the seven key technologies in the three surveyed industries

Mobile services
26%

Cloud technology
23%

Social media
23%

Robotic and automated machinery
22%

Internet of Things
19%

Big data and data analytics
19%

16%
Cybersecurity solutions

DIGITAL TRANSFORMATION AND STANDARDISATION

- **EU Digitising European Industry (DEI) package: ICT Standardisation Priorities for the DSM**
- **Joint initiative on Standardisation
Action 14: Standardisation to support digitisation of European industry**

THE ICT STANDARDISATION PRIORITIES

TWO PILLAR-PLAN

1.- Priority setting

**Identification of priority
building blocks**

1. Cloud Computing
2. Internet of Things
3. 5G
4. Cybersecurity
5. Data

2.- Delivery

**High-level political process
validation, monitoring , update of actions**

1. Working closely with ESO's & SDOs
2. Involving Council & Parliament
3. Improving EU support for priorities (H2020, CEF, pilots)
4. Fair and non-discriminatory access - (IPR/SEPs)
5. Stronger international EU's presence & cooperation

Pillar 2- Delivery process

1. Working closely with ESOs & SDOs to validate

1 → Joint input ESOs + MSP

2. Involving Council & Parliament

2 → Inter-institutional Report on the implementation of EU standardisation policy + EP reports

3. Improving EU support for priorities (H2020, CEF, pilots)

3 → EU funded projects contributing to standardisation

4. Ensuring Fair and non-discriminatory access - (IPR/SEPs)

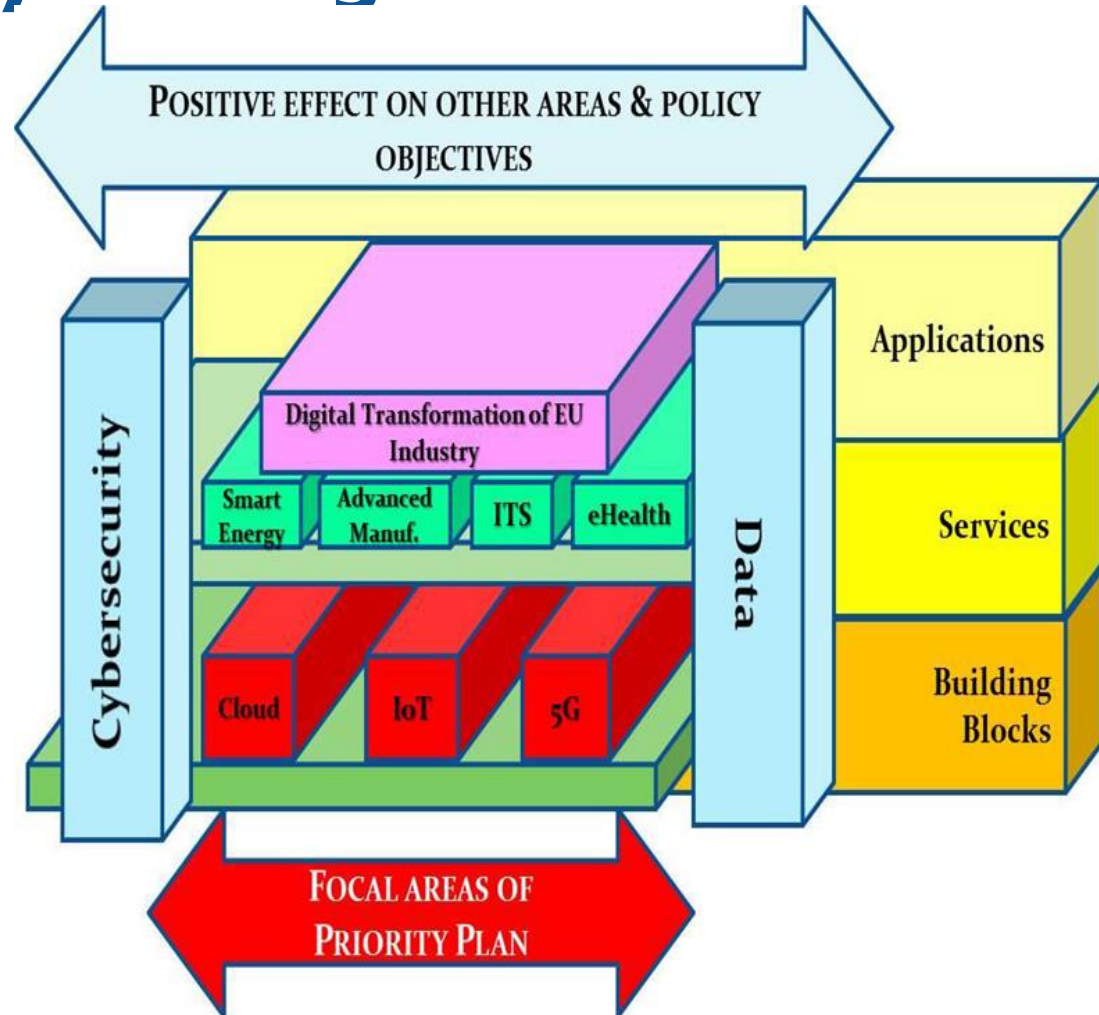

4 → Guidance on Standard Essential Patents (SEPs)

5. Stronger international EU's presence & cooperation

5 → CSA to Reinforce European presence in international ICT standardisation under evaluation

Pillar 1- Priority setting and vertical domains

- *Five key technology building blocks (5G, cloud computing, IoT, (big) data, cyber-security)*
- **Will benefit application areas (eHealth, smart energy and cities, ITS / connected & automated vehicles, advanced manufacturing ...)**
- For each: clear deliverable with deadline and who does what

DEI priorities

- Promote the development of:
 - Interoperability standards
 - European reference architectures
 - Open cross-sectorial platforms
 - Experimentation, validation, interoperability testing facilities
 - Trusted labels and certification schemes
- Launch lighthouse pilot projects
 - JU ECSEL
 - Standards Validation
 - Large scale test-beds

Current initiatives

IoT SDOs and Alliances Landscape

Home/Building Manufacturing/ Industry Automation Vehicular/ Transportation Healthcare Energy Cities Wearables Farming/ Agrifood

Horizontal/Telecommunication

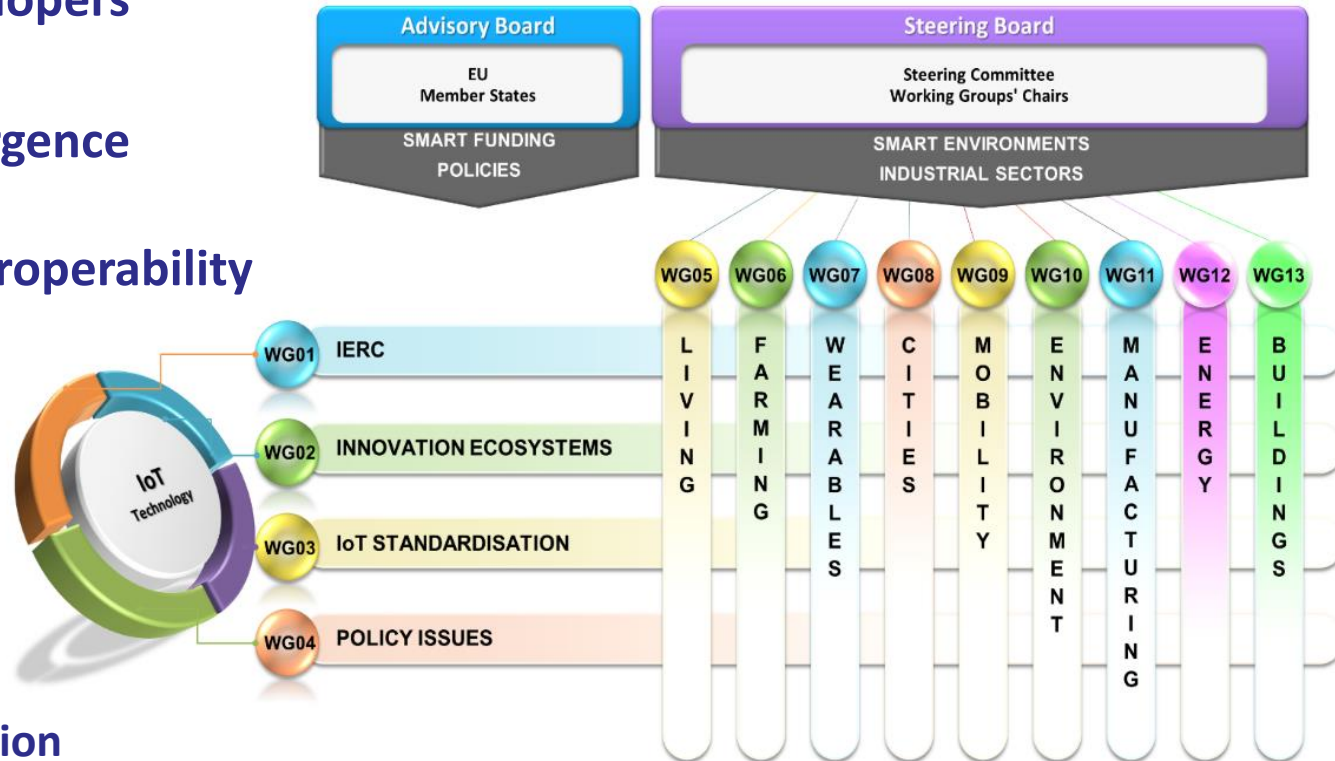

Alliance IOT Innovation – AIOTI.eu

Policy cooperation:

- **Open Platforms** that accelerate innovation by companies and communities of developers
- Advancing IoT convergence across verticals for **standardisation/ interoperability**
- Get connected on www.AIOTI.eu
- **WG03: IoT Standardisation**

ALLIANCE FOR INTERNET OF THINGS INNOVATION - AIOTI

Big Data Value PPP (BDV PPP):

- ✓ Create **Value** out of the **Data**!
- ✓ Boost **European Big Data research** and **Innovation**
- ✓ Strengthen **Competitiveness** and ensuring **Industrial Leadership**

- Work together to organize an **IMPACTFUL program**

- **Efficiency:** Further develop the EU big data ecosystem (**i-Spaces**)

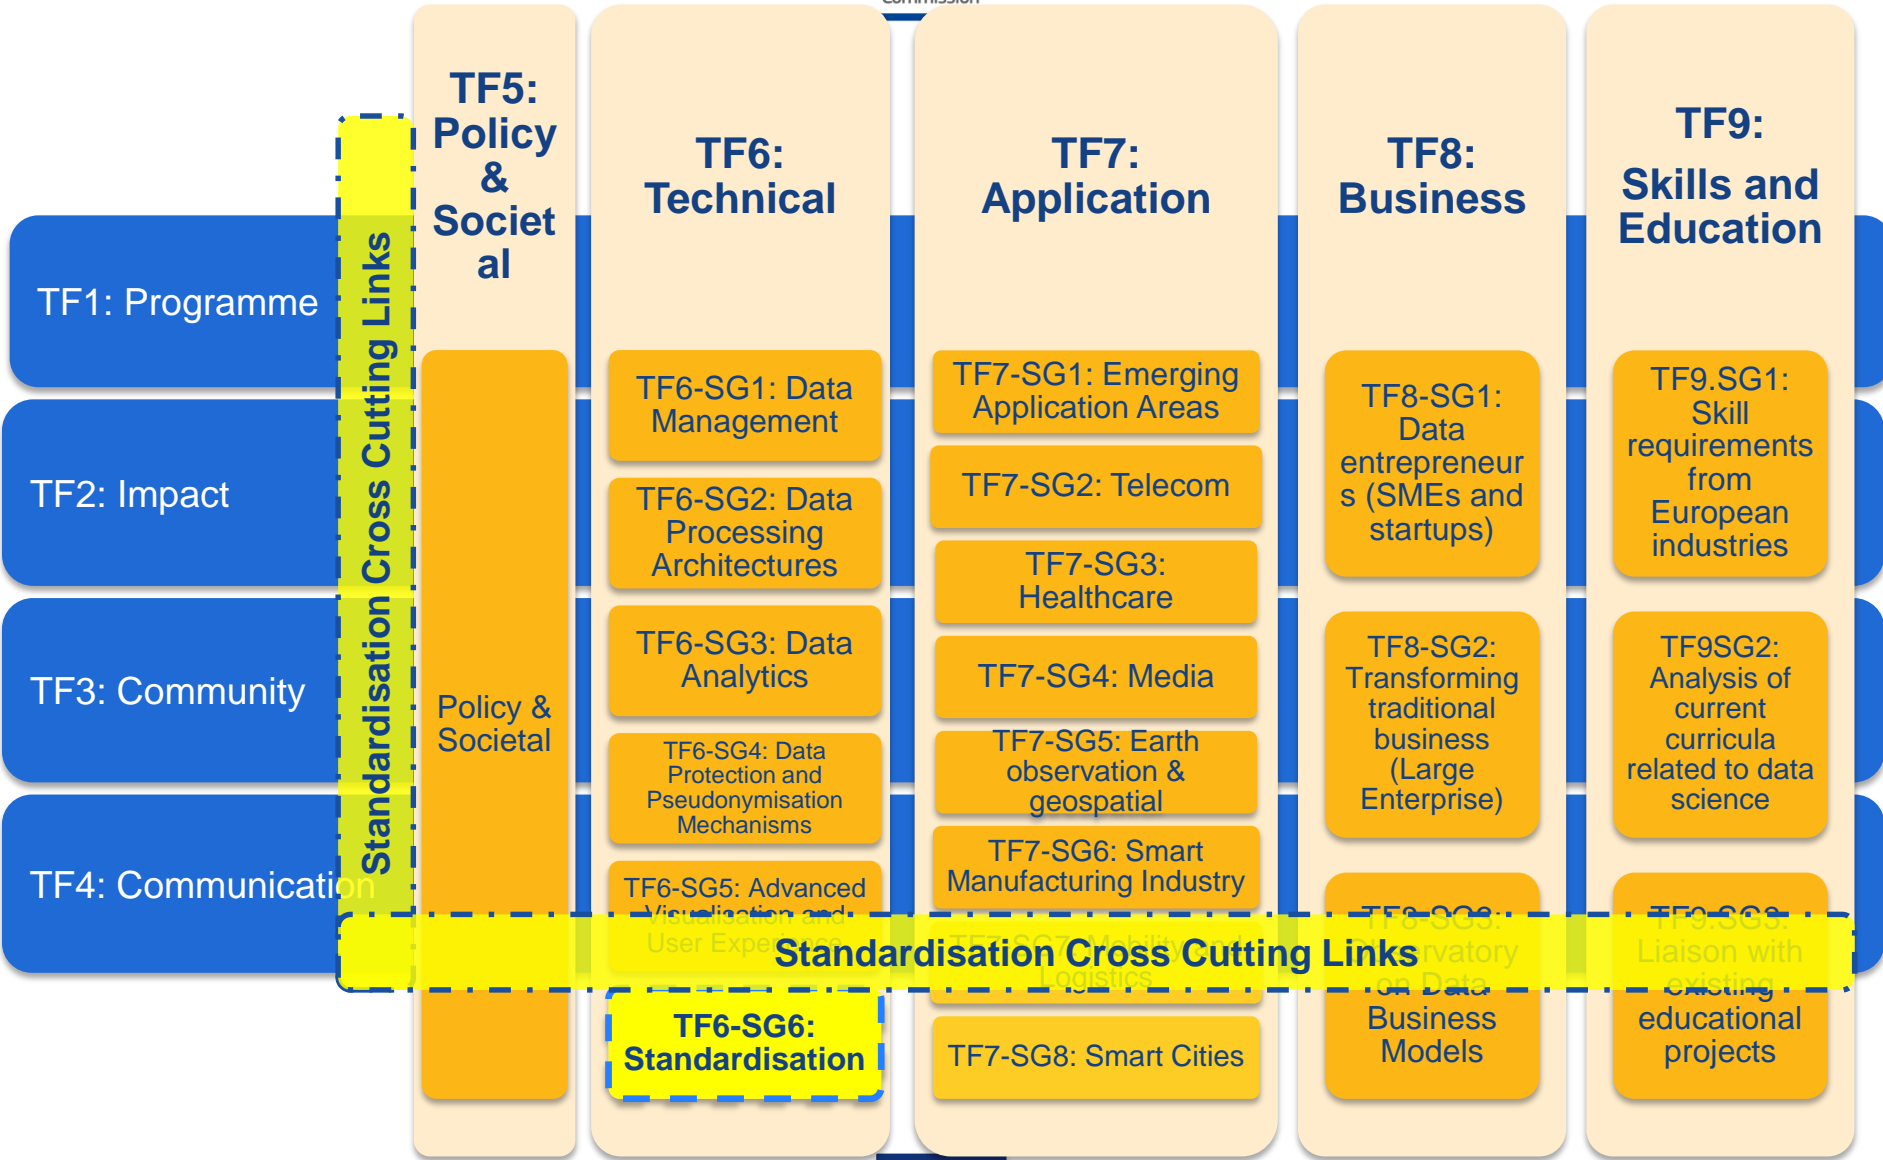

- Proof points: **Demonstrate the impact of Big Data** and show the value in **Lighthouse** projects

- **Innovation:** Create impactful **research results**

- Get connected on www.bdva.eu

Standardisation Cross Cutting Links

Standardisation Cross Cutting Links

Workshop 19 September 2017, BU25 S1

Purpose: *Involve national initiatives to build a European ecosystem on standardisation for digitalisation / Industry4.0 and propose a European approach with concrete actions.*

Content:

- *National initiatives & supporting infrastructures such as experimental test beds, fieldlabs etc.*
- *Landscape analysis of standardisation activities*
- *Identify the common contribution from ESOs*
- *Analysis manufacturing sector: showcase/pathfinder, gaps and how the European industry can bridge these gaps*
- *Present the Horizon-2020 approach to accelerate standardisation*
- *Industry and national initiatives to identify their contributions in order to best scale them up through European initiatives*

Conclusions – Reflection Points

- ***There is a need for more & better cooperation: Coordination of ESOs, stakeholders, including verticals***
- ***Support standardisation through LSP***
- ***Digitisation of industry brings challenges to be resolved through a collective EU-wide effort.***
- ***International cooperation, ensuring EU representation***
- ***We need agreement on common actions to support the EU standardisation strategy on DEI***
- ***First workshop 19th September: need speakers***

Thank you!
