WG2 Strengthening leadership in digital technologies and in digital industrial platforms across value chains in all sectors of the economy

Implementation of the
"*Digitising European Industry*" initiative (COM(2016)/180)

4 May 2017, 10:00-16:00
Centre de Conference Albert Borschette, Rue Froissart 36, Brussels
Room CCAB 4A

Expected outcome

The working group should develop a Report on the alignment of priorities and programmes and mobilisation of investments towards platform/standardisation initiatives.

Results so far

The working group kicked off with a first workshop on 21 October 2016, where the roles of digital industrial platforms were clarified. The first workshop focused on four key issues:

- What is the current landscape of activities in Europe?
- What is the vision for where we should go next?
- How do we bridge the gap between what we have and what we want to achieve?
- Who are the main stakeholders to be involved?

Building on the results of the first workshop and the inputs received, the second workshop on 8 December 2016 was structured around:

- Developing further ideas for next-generation platforms
- Supporting initiatives: what kind of large scale federating initiatives are needed? What platforms to be tested and demonstrated in large-scale pilots
- Action planning: roadmap of needed actions, including possible contributions by PPPs and MSs, and links with national initiatives
