

Workshop on Evaluation of Evidence

The aim of this Parallel Session is to review and discuss approaches for the evaluation and incorporation of evidence in the risk assessment process focusing in particular on the following:

- the identification and selection of relevant publications for analysis;
- weighing the data;
- Application for risk assessment purposes.

The discussion will involve the short presentation of a draft document prepared by the European Commission Scientific Committee on Emerging and Newly identified Health Risks (SCENIHR) and an open discussion on the above mentioned themes and possibly other items of the report, with a view to identify areas of further elaboration and possible international collaboration.

This paper was produced for a meeting organized by Health & Consumers DG and represents the views of its author on the subject. These views have not been adopted or in any way approved by the Commission and should not be relied upon as a statement of the Commission's or Health & Consumers DG's views. The European Commission does not guarantee the accuracy of the data included in this paper, nor does it accept responsibility for any use made thereof.
