
Annex 5 – Information collection process

Isare 2 information collection process

During the meeting in Bordeaux, the countries group have suggested to set up a form for each country. The aim is to describe the information collection process and the difficulties met during the Isare 2 project in 2003. These forms will allow to improve the discussion section and to propose recommendations about the health database implementation at European regions level. The information collected with these forms will be included in the final report.

To collect these information, we would like you to answer to the following questionnaire
before the 31 of January

Describe the indicators collection process for all the regions of your country

- *through national or regional databases without contact with other persons*
- *by questioning persons working in national institutes*
- *by questioning contact persons in all or some regions*

Describe the indicators collection process for the selected region of your country

- *through national or regional databases without contact with other persons*
- *by questioning persons working in national institutes*
- *by questioning contact persons in all or some regions ...*

Describe the methods used to answer questions on the use and the quality of data

- *according to the similar point of views from professionals*
- *according to the personal point of view*
- *according to specific works in the country*

What were the difficulties you met with

- *in the data collection process*
- *regarding the contacts with your partners*
- *to provide a point of view on the use and comparisons of data*

Have you gave up communicating data which were potentially available?

If yes, which of them?

Could you assess the time you have needed to answer questionnaires and provide the data? If yes, could you forward us your assessment?

Have you some specific commentaries or some recommendations to formulate?

Thank you for your collaboration
