

## Endorse the 2020 Thematic Networks' Joint Statements!

*Thematic Networks are set up for one year to cooperate and speak together with one voice on health topics suggested by the European Commission as priorities for EU health policy. The 2020 Thematic Networks have now finished their annual working cycle and will present their Joint Statements at the online EU Health Policy Platform annual meeting (registration will open soon).*

*These statements are now open for endorsement by the public health community.*

*The 2020 Thematic Networks with their corresponding Joint Statements up for endorsement are:*

- [\*Digestive Cancers Europe\*](#), which is calling for action on Colorectal Cancer Screening in the EU
- [\*Digital Doc\*](#), which advocates training future-proof doctors for the digital society
- [\*Health First Europe and the European Health Management Association\*](#), which are working towards Profiling and Training the Health workers of tomorrow

*By "endorsing" the Joint Statements you show your support for a particular initiative and to the organisation that is leading it. So how do you give your endorsement? Visit the thematic network of your choice - or all three of them! - in the Thematic Network section of the [Health Policy Platform](#) and contact their leaders. You will find them by checking their profiles under the "Network leader" column.*

*The Thematic Networks are accessible by all Agora users.*
