

DG HEALTH AND FOOD SAFETY (DG SANTE)

Migration and Health related Initiatives (last updated: 1/12/2019)	Keywords
<p>DG SANTE provides financial support for:</p> <ul style="list-style-type: none"> • Improving healthcare for vulnerable migrants • Integrating migrants into national healthcare systems • Training of healthcare and other workforce working with migrants <p>The following terms are used through this document and refer in/to an EU context:</p> <ul style="list-style-type: none"> ▪ <i>Refugee</i>: An asylum seeker who has been granted refugee status or subsidiary protection status in an EU Member State. ▪ <i>Migrant</i>: Any third country national - without an EU passport. <p>Background: In 2015, EU member states were faced with a particularly high influx of newly arriving migrants and refugees. In response, the EU provided around €6.7 million that year to support EU countries with associated health challenges. In 2016, €7.5 million was provided for the training of healthcare professionals and enforcement officers, as well as sharing best practices on healthcare models for vulnerable migrants. In 2017, the EU provided €1.1 million to assess the health status of the newly arrived migrants and refugees, the feasibility of a European Expert Network for rare pathologies linked to migration, and, to support the implementation of tools for integration of migrants and refugees in EU health systems. In 2019, the most vulnerable migrant populations (children) will receive specific attention.</p> <p>DG SANTE coordinates activities through the Health Security Committee by:</p> <ul style="list-style-type: none"> • Collating requests for vaccines and other health supplies from EU countries most affected, so that other EU countries can help • Improving monitoring of communicable diseases via the Early Warning and Response System • Bringing together national contact points for health with those in charge of civil protection and asylum, migration and integration funds. <p>DG SANTE works with the European Centre for Diseases Prevention and Control (ECDC), the World Health Organization (WHO) Europe, United Nations International Children's Emergency Fund (UNICEF) and the International Organisation for Migration</p>	<ul style="list-style-type: none"> - Health promotion - Disease prevention - Improving health status - Training of health and other professionals.

(IOM) to better identify and address the needs of EU countries and refugees. DG SANTE also develops training programmes for healthcare professionals. These will help healthcare professionals learn; about diseases that they are not familiar with, provide cultural appropriate information and identifying specific needs among the people arriving. DG SANTE produced a Personal Health Record and an accompanying Handbook to help healthcare professionals in the receiving countries to build medical histories of incoming migrants and refugees and identify their immediate needs.

Resources and planned actions related to migration, migrants and health are yearly determined and set out in the Annual Work programme, part of the (First, Second or)Third Health Programme 2014-2020. The annual or multiannual work programme is a planning document explaining how the budget allocated for certain policies or funding programmes will be spent.

Developing projects: Since 2003, the EU has been active in addressing and reducing health inequalities. Addressing health inequalities for migrants was included in this work. Related projects focused on measuring differences in health and access to healthcare, but also aimed to facilitate the integration of migrants into national healthcare systems.

<https://publications.europa.eu/en/publication-detail/-/publication/b0d8f065-e951-11e8-b690-01aa75ed71a1>.

The unparalleled influx of refugees and other migrants since 2015 caused pressure on health systems in EU Member States. In response, the EU Health Programme initially provided financial support to the Member States under highest pressure and subsequently pulled resources to improve healthcare, to integrate migrants into health systems and to train the health workforce across the EU.

In **2015**, the annual work programme included actions which aimed to support EU Member States with the direct challenges associated with the large number of new arrivals in the EU. This included assessing the health status of migrants, their specific health needs and the potential risks of an increase of infectious diseases. Simultaneously, actions aimed to support Member States with the planning and capacity building of health care providers and health services (especially EU first line arrival countries).

In **2016**, the annual work programme included actions on Migrants' health: best practices in care provision for vulnerable migrants and refugees, procurements for pilot specific training modules for health professionals, border guards and trainers in migrants' and refugees' health and a training programme for first-line health professionals, border officers and trainers working at local level with migrants and refugees.

In **2017**, DG SANTE supported further implementation of actions on migration and health. Not only in the first line arrival countries but also in the transit and destination countries. The Annual Work Programme 2017 included actions on migrants' health in the context of promoting health, preventing diseases and fostering supportive environments for healthy lifestyles

('health in all policies' principle). DG SANTE supported two tenders on the 'Assessment of the feasibility of establishing a European expert network for rare communicable diseases and other rare pathologies in the context of globalisation and migration' and 'The health status of newly arrived migrants and refugees in Europe', as well as a direct Grant to the International Organisation for Migration for the implementation of the Personal Health Record across Europe. Under the Joint Action on health inequalities, a work package focuses on advancing migrant health through effective communication strategies for health promotion and disease prevention in migration and their social integration. These strategies will be designed to improve healthy behaviours and guide in the use of healthcare services

In **2018**, no new actions were initiated and the focus was on the full implementation of ongoing actions. More specifically; the training of health and other professionals, consolidating a corpus of training materials and coordinating with International Organisation messages and actions, and also linking current EU health policies with activities in the area of migration.

In **2019**, most of ongoing action have been finalised and the focus has been the continuation of the training of health and other professionals and the most vulnerable populations in first line and transit countries. More specifically, a direct grant enabling a project on strengthening the health status of migrant children in front line and transit countries arrival countries was negotiated.

All the training materials for health (and other) professional can be found at the **health policy platform** (<https://webgate.ec.europa.eu/hpf/>) and the European **Virtual Academy of the ECDC** (<https://eva.ecdc.europa.eu/>).

The Commission's Consumers, Health, Agriculture and Food Executive Agency (**CHAFEA**) is responsible for executing actions under the Health Programme.

In 2015, the ECDC published a report on the public health needs of irregular migrants, refugees or asylum seekers across the EU's southern and South-eastern borders. A working group on was established and provided in 2018 a "Public health guidance on screening and vaccination for infectious diseases in newly arrived migrants within the EU/EEA". <https://www.ecdc.europa.eu/sites/default/files/documents/Public%20health%20guidance%20on%20screening%20and%20vaccination%20of%20migrants%20in%20the%20EU%20EEA.pdf>

DG SANTE also promotes the WHO Global Code of Practice on the International Recruitment of Health Personnel to mitigate the negative effects of migration on (third-country) health systems. The Commission proposals to reform the common European asylum system include healthcare measures and particularly access to healthcare, including both physical and mental care.

Actions - DG SANTE and ECDC		
Direct Grant Agreement to UNICEF under the Third Health programme (2014-2020): Support to children migrant populations in front line and transit countries	Annual Work Programme 2019	<p>Objective: to identify and promote the uptake of best practices for health improvement, especially related to nutrition and psychological wellbeing and to check and update the vaccination schedule to counteract possible outbreaks of vaccine preventable diseases. The focus is on refugee and migrant children, considered as a highly vulnerable group.</p> <p>The areas of work will be:</p> <ul style="list-style-type: none"> - Immunization, prevention/promotion, health assessment (including nutrition) on arrival and departure; - Promotion of mental health through psychosocial support and working on PTSD (post Traumatic stress syndrome) and violence prevention. - To increase knowledge of the migrant children (and mother) themselves on health issues. <p>The action will be closely coordinated with national authorities and with the Joint Action (JAHEE) Health Equity Europe</p>
Feasibility of expert networks for rare pathologies linked to mobility and globalisation. Contract under the Third Health Programme 2014 - 2020. (EURaDMoG)	Annual Work Programme 2017	<p>Objective: to assess the feasibility and options for the creation of a European Expert Network for rare communicable diseases and other rare pathologies in the context of mobility and globalisation. This network will not intend to replace the work of the networks of epidemiological surveillance of diseases. It is primarily intended to patient's diagnosis and treatment.</p> <p>The contract will:</p> <ul style="list-style-type: none"> - Identify the areas on rare pathologies in the context of globalisation and migration where establishing a European expert network could be an added value - Organise a workshop with experts to identify the European centres able to provide expertise in the identified areas - Identify the feasibility of an EU expert network in those areas - in case identified diseases are in the scope of an existing ERN, propose cross-linking mechanisms
Health status of newly arrived migrants and refugees in	Annual Work Programme 2017	<p>Objective: to evaluate existing data on the health condition of migrants and refugees who have reached the European Union since 2015, in order to obtain accurate information on their actual health status upon arrival and be able to adapt the health services provided at national level and the EU support to the MS actions.</p>

Europe. Contract under the Third Health Programme 2014-2020.		<p>As the integration of third country nationals is a priority for the EU, as approved in the skills agenda, and as access to services, including health services, is key to ensuring effective integration of refugees, knowing the current use of health services and actual health status will provide a more accurate knowledge of the situation and, therefore, facilitate integration.</p> <p>The aim of this action is to ensure:</p> <ul style="list-style-type: none"> - Contribution to the knowledge of the state of health of the EU - Better adaptation of health systems to real needs - Combat stereotypes via accurate information - Integrate different data sources - Showing the importance of coordinated data collection
Joint Action on Health Equity Europe (JHAEE) - Work Package (WP7) on migration and health. Part of the Third Health Programme 2014-2020	Annual Work Programme 2017	<p>A three-year grant for providing a policy framework for improved monitoring, governance and evaluation of measures on health inequalities, including living and working conditions, social protection, as well as migration. The work package on migration and health is based on recognising the critical role of effective, timely and well-researched communication strategies for health promotion and disease prevention in migration and their social integration. The aim will be to identify effective communication and training models and strategies designed to improve healthy behaviours and guide in the use of healthcare services.</p> <p>https://jahee.iss.it/</p> <p>https://jahee.iss.it/wp-7-migration-and-health/</p>
Re-Health2 Direct Grant to IOM under the Third Health Programme 2014-2020	Annual Work Programme 2017	<p>Support to IOM for the implementation of the Personal Health Record (PHR) across Europe. This action aimed to develop a revised version of the PHR/e-PHR according to recommendations resulting from the pilot phase of the Re-Health project (2015) and to assess the feasibility for the tool to be used across Europe following the journey of the newly arrived migrants from their receiving countries until their destination country.</p> <p>The action will also enhance the capacities of health mediators selected from the migrant/refugee population.</p> <p>http://re-health.eea.iom.int/</p>
MIHKMA - Migration and	Annual Work Programme	<p>A two-year grant to develop a knowledge management system to raise awareness, foster knowledge, and increase uptake of migrant health good practices and evidence-based approaches for supporting Member States efforts to</p>

<p>Health Knowledge Management. Direct grant to WHO under the Third Health Programme 2014-2020</p>	<p>2016</p>	<p>integrate migrant populations into the national health care systems.</p> <p>The project aims to:</p> <ul style="list-style-type: none"> - Develop technical guidance and policy briefs in priority issues (health promotion, prevention and control of non-communicable diseases, promotion and care for mental health, migrant children, pregnant women and new-born children, and elderly) of refugee and migrant health, which will include research, and development and dissemination of various tools and resources; - Develop distance-learning webinars and associated training materials, videos, tools and resources; - Develop and implementing coordinated communications on migrant health and promote access to the knowledge, good practice tools and resources researched and developed, and to the webinars. <p>http://www.euro.who.int/en/health-topics/health-determinants/knowledge-hub-on-health-and-migration/about/migration-health-knowledge-management-mihkma</p>
<p>Pilot training of professionals specifically addressing mental health problems and communicable diseases, MIG-H Training. Call under the Third Health Programme 2014 - 2020</p>	<p>Annual Work Programme 2016</p>	<p>The action aims to develop, pilot and evaluate a training package for health professionals, law enforcement officers and trainers of trainers'. On the topic of mental health and post-traumatic stress detection & the implementation of triage and screening for communicable diseases, in migrants and refugees. This action involves 10 European selected countries (Bulgaria, Croatia, France, Greece, Italy, Malta, Norway, Serbia, Slovenia, Spain).</p> <p>Results and knowledge gathered could help facilitate early identification of potential cases or carriers of communicable diseases, which could benefit from prophylaxis or are in need of treatment for acute and chronic infectious diseases. Good practice gained from the activities coordinated by the ECDC and other networks funded under the Health Programme might be of benefit in implementing the rapid diagnosis of rare communicable diseases in the EU.</p> <p>https://webgate.ec.europa.eu/hpf/ https://webgate.ec.europa.eu/hpf/network/home/77 https://webgate.ec.europa.eu/hpf/document/directoryview</p>
<p>Training of professionals working at local level with</p>	<p>Annual Work Programme 2016</p>	<p>The action aims to develop a training programme for health professionals, social workers, law enforcement officers or professionals with functions in refugee and migrant centres (especially those working at the local level). With the aim of developing or reinforcing their skills, promote understanding and positive attitudes, and follow a holistic approach when working with migrants and refugees at first points of arrival, transit and destination countries. This</p>

<p>migrants and refugees. TRAIN4 M & H. Tender call under the Third Health Programme 2014-2020</p>		<p>action will also include training of coach trainers. Such training covers amongst other things: the different cultural and health needs of migrants and refugees, health professionals and law enforcement officers' cultural competencies; managerial and administrative competencies; and knowledge of communicable diseases and mental health problems prevalent in migrant and refugee populations.</p> <p>Through the trainings, the health literacy of non-health professionals related to the health needs of migrants and refugees can be improved. And at the same time tackling potential misbeliefs and myths about the potential health risks for the professionals personal health and how to better use personal protective health measures, like vaccination and personal protective equipment (PPE).</p> <p>Trainings will be hosted by the virtual academy of ECDC: https://eva.ecdc.europa.eu/course/index.php?categoryid=34</p>
<p>Mig-Health Care. Project under the Third Health Programme 2014 - 2020</p>	<p>Annual Work Programme 2016</p>	<p>A three-year project to improve physical and mental health care services, support the inclusion and participation of migrants and refugees in European communities and reduce health inequalities.</p> <p>The project will:</p> <ul style="list-style-type: none"> - Describe the physical and mental health profile of vulnerable migrants/refugees including needs, expectations and capacities of service providers; - Develop a comprehensive roadmap/toolbox for the implementation of community based care models including prediction models, best practice examples, algorithms and tailored made health materials; - Pilot test, assess community care models, and produce guidance and recommendations. <p>http://www.mighealthcare.eu/</p>
<p>MyHealth project under the Third Health Programme 2014 - 2020</p>	<p>Annual Work Programme 2016</p>	<p>A three-year project to improve healthcare access of newly arrived vulnerable immigrants and refugees, by developing and implementing models based on the know-how of an European multidisciplinary network.</p> <p>The project will:</p> <ul style="list-style-type: none"> - Develop a complete interactive map of health systems in the involved countries; - Clearly define the current health problems of migrants; - Define and develop health intervention strategies in mental health, communicable diseases and NCDs; - Develop an ICT based platform to support new tools, enhance health applications development and health

		<p>information;</p> <ul style="list-style-type: none"> - Implement the defined strategies and models in a pilot trial; - Ensure training and involvement of all the key actors. <p>http://www.healthonthemove.net</p>
ORAMMA - Operational Refugee and Migrant Maternal Approach. Project under the Third Health Programme 2014 - 2020	Annual Work Programme 2016	<p>A two-year project to promote safe motherhood, improve access and delivery of maternal healthcare for refugee and migrant women, and improve maternal health equality within the European Union.</p> <p>The project will develop, pilot, implement and evaluate by comparative analysis an integrated and cost- effective approach on safe motherhood provision for migrant and refugee women, taking into consideration:</p> <ul style="list-style-type: none"> - Best practices - The special risks and characteristics of the target group - The transferability of the model in different healthcare systems across EU <p>http://oramma.eu/</p>
Risk of importation and spread of malaria and other vector-borne diseases associated with the arrival of migrants to the EU	2015	<p>ECDC report. Risk assessment on the occurrence of malaria or other vector-borne diseases in mobile populations such as migrants, refugees and in travellers in the EU.</p> <p>https://www.ecdc.europa.eu/sites/portal/files/media/en/publications/Publications/risk-malaria-vector-borne-diseases-associated-with-migrants-october-2015.pdf</p>
Infectious diseases of specific relevance to newly-arrived migrants in the EU/EEA	2015	<p>ECDC report. This document provides a checklist of infectious diseases to be considered among migrant populations and serves as a reminder for frontline healthcare workers of the risks of infectious diseases for newly arrived migrants</p> <p>https://www.ecdc.europa.eu/sites/portal/files/media/en/publications/Publications/Infectious-diseases-of-specific-relevance-to-newly-arrived-migrants-in-EU-EEA.pdf</p>

<p>SH-CAPAC Addressing health needs under the Third Health Programme 2014-2020, the call "Supporting Member States under particular migratory pressure in their response to health related challenges"</p>	<p>Annual Work Programme 2015</p>	<p>SH-CAPAC (Supporting health coordination, assessments, planning, access to health care and capacity building in Member States under particular migratory pressure) intended primarily to support MS to strengthen their health systems for addressing the health needs of the refugee, asylum seekers and other migrant populations.</p> <p>Deliverables:</p> <ul style="list-style-type: none"> - Report on seven country assessments; - Training programme for health managers and health professionals; - Report on framework for the development of action plans to strengthen countries' health systems and training workshop; - Report on design, development and evaluation of the training course. <p>https://www.sh-capac.org/</p>
<p>8 NGOs in 11 States Addressing health needs under the Third Health Programme 2014-2020, the call "Supporting Member States under particular migratory pressure in their response to health related challenges"</p>	<p>Annual Work Programme 2015</p>	<p>8 NGOs for migrants/refugees' health needs in 11 countries supported the health authorities of 11 EU Member States (BE, BG, DE, EL, ES, FR, HR, IT, NO, SE, SI) in providing adequate and accessible health services to newly arrived migrants with a specific focus on children, unaccompanied minors and pregnant women.</p> <p>Deliverables:</p> <ul style="list-style-type: none"> - Health booklet & individual assessment template; - Health promotion materials; - Monthly situation reports; - Materials prepared to raise awareness among stakeholders; - Common data collection questionnaire. <p>https://webgate.ec.europa.eu/chafea_pdb/health/projects/717307/summary</p>
<p>EUR-HUMAN Addressing health needs under the Third Health</p>	<p>Annual Work Programme 2015</p>	<p>EUR-HUMAN (European Refugees - Human Movement and Advisory Network) project has enhanced the capacity of EU Member States accepting migrants and refugees in addressing their health needs.</p> <p>Deliverables:</p>

<p>Programme 2014-2020, the call "Supporting Member States under particular migratory pressure in their response to health related challenges"</p>		<ul style="list-style-type: none"> - Report on views, experiences and expectations of refugees regarding their health and social needs and access and use of services; - Set of guidelines, guidance, training and health promotion materials for optimal primary care for newly arrived migrants including refugees; - Protocol with procedures, tools and interventions; - Model of integrated care; - Report about the results of the assessment of local resources available; - Summary report about the run by the different implementation site countries <p>http://eur-human.uoc.gr/ https://ec.europa.eu/knowledge4policy/projects-activities/eur-human-european-refugees-human-movement-advisory-network_en</p>
<p>Re-HEALTH addressing health related challenges for MS under the Third Health Programme 2014–2020, the call "Supporting Member States under particular migratory pressure in their response to health related challenges"</p>	<p>Annual Work Programme 2015</p>	<p>Re-HEALTH: Supported Member States under particular migratory pressure in their response to health related challenges. The RE-HEALTH project implemented the Personal Health Record (PHR) to promote health care provision with assessment of the health status/health needs of the arriving refugees and other migrants, as well as continuity in health care provision. To facilitate data collection and transfer of data, the e-PHR version was developed.</p> <p>Deliverables:</p> <ul style="list-style-type: none"> - An electronic Personal Health Record and health database to store patient data collected through the PHR - Training to health personnel on using the PHR and the database; - Inception report providing rapid situational assessment of the pre-selected countries; - A feasibility report aiming at assessing the acceptability, feasibility, impact and transferability of the introduction the PHR; - Health promotion materials and campaign that will support the implementation of the PHR <p>https://www.re-health.eea.iom.int/</p>
<p>CARE - Common Approach for REfugees and other migrants'</p>	<p>Annual Work Programme 2015</p>	<p>One year project aimed at promoting a better understanding of refugees and migrants' health condition as well as to supporting the adaptation of the appropriate clinical attitude towards refugees and migrants' health needs, especially of fragile subgroups, such as minors, pregnant women and victims of violence.</p>

health- under the Third Health Programme 2014 - 2020		<p>Deliverables:</p> <ul style="list-style-type: none"> - Hotspots and migrants' centers health management, including health data collection for syndromic surveillance; - Tools/models to ensure the rapid detection of disease outbreaks and potential public health emergencies in hotspot/reception centers; - Digital health record to assess migrant health; - Tools to raise knowledge and awareness in general public and health professionals regarding myths about migrants and refugees health issues; - Development of integrated Public Health plans for migrant and refugee health <p>http://careformigrants.eu/the-project/</p>
Assessing the burden of infectious diseases among migrant populations in the EU/EEA	2014	<p>ECDC report. This is the first comprehensive report on the burden of infectious diseases among migrants in the EU/EEA that covers; HIV, TB, hepatitis B and C, gonorrhoea, syphilis, measles and rubella, malaria and Chagas disease, taking data from the European Surveillance System</p> <p>https://www.ecdc.europa.eu/sites/portal/files/media/en/publications/Publications/assessing-burden-disease-migrant-populations.pdf</p>
Health Inequalities brochure under the second Health Programme 2008 - 2013	2013	<p>Migrants and ethnic minorities results and tools can be found in the Health Inequalities brochure available at Chafea publications:</p> <p>https://op.europa.eu/en/publication-detail/-/publication/5d461209-5cea-48d1-9092-cfab460a632a/language-en?WT.mc_id=Selectedpublications&WT.ria_c=19980&WT.ria_f=3170&WT.ria_ev=search</p>
Training packages for health professionals to improve access and quality of health services for migrants and	Annual Work Programme 2013	<p>The Training packages for health professionals to improve access and quality of health services for migrants and ethnic minorities, including the Roma (MEM-TP) contract, led by the Andalusian Public Health School (EASP). The training package was developed in English and piloted in ES, PL, DK, IT, PL, RO and SK.</p> <p>The Training package for health professionals aims to improve access and quality of health services for migrants and ethnic minorities, including the Roma is composed of four core modules covering:</p> <ul style="list-style-type: none"> - module 1: Sensitivity and awareness of cultural and others forms of diversity,

<p>ethnic minorities, including the Roma, MEM-TP, under the second Health Programme 2008 - 2013</p>		<ul style="list-style-type: none"> - module 2: Knowledge about Migrants, ethnic minorities and their health, - module 3: Professional skills and - module 4: Knowledge application. <p>Additional modules have been created to allow adaptation to the local needs. They focus on different target groups and specific health concerns.</p> <p>A. Target groups (Ethnic minority groups, including Roma and Sinti communities, among them those who migrate (mobile populations), Migrants in an irregular situation (“Irregular” migrants), Refugees and Asylum seekers and Vulnerable groups</p> <p>B. Specific health concerns (chronic diseases, Communicable diseases, mental health and Sexual and reproductive health).</p> <p>The Training of trainers (ToT) workshops additional module focuses on improving the teaching methods and includes trainings programme evaluation.</p> <p>https://www.mem-tp.org</p>
<p>EQUI HEALTH under the second Health Programme 2008-2013</p>	<p>Annual Work Programme 2013</p>	<p>The EQUI HEALTH (Fostering health provision for migrants, the Roma, and other vulnerable groups) project implemented by the International Organisation for Migration (IOM) has created training materials for health professionals and law enforcement officers (LEO) and provided these in the Southern and Eastern EU countries, in close collaboration with the National authorities.</p> <p>The EQUI-HEALTH project aims to improve the access and appropriateness of health care services, health promotion and prevention to meet the needs of migrants, the Roma and other vulnerable ethnic minority groups, including irregular/illegal migrants.</p> <p>These training packages for Health Professionals in Migration and Health were piloted in Portugal and were rolled out in collaboration with the Ministry of Health of Italy and Greece.</p> <p>Training packages for continuing education on migrant health for law enforcement, were piloted in Italy and implemented in Greece. The training materials on migration and health constitute of three modules:</p> <ol style="list-style-type: none"> 1. Module 1: Migration and Health 2. Module 2: Well-being: Public/ Individual Health 3. Module 3: Intercultural Competence
