eIGOR - eInvoicing GO Regional

2015-EU-IA-0050

The CEF eInvoicing building block supports public administrations in complying with eInvoicing Directive 2014/55/EU, in particular new European standard on electronic invoicing (EN).

The action supported the enhancement of the Italian e-invoicing system. In particular, the national e-invoicing exchange system (SDI) managed by the Italian Revenue Agency was upgraded to ensure that Italian public sector is able to receive EN compliant e-Invoices. This extension was carried out through the integration of the Invoice Mapper Framework in the SDI. Moreover, other e-invoicing tools of Unioncamere, Intercent-ER (main Italian service provider of e-procurement service for public administrations) and Infocert's (key player in the e-invoicing and trust services) were upgraded to support the EN (by integrating the e-invoice converter component).

Finally, the action supported a core e-invoicing semantic mapping from national to/from standard mandated by Directive 2014/55/EU (and its syntaxes), coupled with the implementation of an e-invoicing format converter framework.

This action is followed up by the Action 2017-IT-IA-0150, which consolidates the Italian Core Invoice Usage Specifications (CIUS) of the EN.

Beneficiaries:
