

## 2012-EU-50009-S

### Regional European Electronic Toll Service (REETS TEN)

#### Programme:

- **TEN-T Projects**

In compliance with and in support of the existing EC legislation regarding the interoperability of electronic road tolls the Action (REETS TEN) aimed to deploy EETS compliant services in a cross-border regional project. The Action covered the electronically tolled network of 7 Member States (Austria, Denmark, France, Germany, Italy, Poland and Spain) and Switzerland. The major Toll Chargers or Toll Charger Associations of these Member States were co-beneficiaries of the Action. The Action also included 12 prospective EETS providers represented by the applicant "Association of European Toll and Interoperable Services" (AETIS).

The project aimed to kick-start the actual deployment of EETS, taking into account the perspective of full European coverage as final objective.

---

**The action is closed.**

<b>EU contribution:</b> €1,264,829
