eInvoicing Directive 2014/55/EU

<http://ec.europa.eu/growth/single-market/public-procurement/e-procurement...>

Implementing the European Standard in consolidated eInvoicing cloud platforms (EURINV)

2018-EU-IA-0073

The CEF eInvoicing building block supports public administrations in complying with the eInvoicing Directive 2014/55/EU, in particular the new European eInvoicing standard (EN16931).

The objective of this Action is to support the Electronic Data Interchange (EDI) providers of the EURINV consortium and their clients to meet the European Standard (EN).

7 consolidated EDI providers' eInvoicing cloud platforms from 7 Member States (Billit - Belgium; OpusCapita - Finland; SATA - Italy; Enxendra - Spain; Calvi - Netherlands; Generix - France; Webware - Germany), will be upgraded in order to be fully compliant with the EN, including both syntaxes approved by CEN (UBL 2.1 and CII) and in order to achieve advanced eInvoicing functionalities. All these eInvoicing platforms have their own certified Access Point fully aligned with the requirements set in the eIDAS Regulation, addressing eDelivery for cross-border communication.

In addition, two local public entities in two additional Member States (Dublin Simon Community - Ireland; and Ekonomická univerzita v Bratislave - Slovakia), will uptake an eInvoicing solution compliant with the EN.

The action also foresees appropriate dissemination activities among the EDI providers' clients and other stakeholders, which will contribute to a higher impact of this Action.
