Enterprises (EASME)
Unit B1 Energy

Research and
Innovation

LC-SC3-EE-2-2018-2019: "Integrated home renovation services"

CSA
100%

- **Why?**

- Many project promoters lack the skills and capacity to set up, implement and finance ambitious sustainable energy projects
- In addition, many lack access to attractive and adequate financing products from the market

- **How?**

- Create (or replicate) "integrated home renovation services", operational by the end of the action
- Cover the whole "customer journey": from technical and social diagnosis, technical offer, contracting of works, structuring and provision of finance, to the monitoring of works and quality assurance.
- Create more demand for holistic approaches as a result of improved offer by trustful market operators and better awareness from homeowners

LC-SC3-EE-2-2018-2019: "Integrated home renovation services"

• What?

- Optimise the services required along the renovation process
(based on a thorough analysis of the local needs and actors in place),
- Reduce renovation costs and time on-site through standardised approaches
(e.g. optimized business processes, standardised contractual arrangements, branding of the proposed services, ...),
- Mainstream innovative technical solutions adapted to the local context,
- Improve trust and awareness of homeowners towards such services,
- Help improve the legal and regulatory environments and
- Overall improve financing conditions for energy renovation.

• More information

- **Webinar** on "Home Renovation": **21 November 2017** (11:00 – 12:30)
