

## Connecting Europe Facility ENERGY

### **Member State(s) involved:**

Ireland, UK

### **Implementation schedule**

Start date: May 2017

End date: November 2018

### **Budget:**

**Estimated total cost of the action:**  
€1,850,000

**Maximum EU contribution:**  
€925,000

**Percentage of EU support:** 50%

### **Beneficiary:**

Gas Networks Ireland

<http://www.gasnetworks.ie/>

### **Affiliated Entity:**

GNI (UK) Limited

### **Additional information:**

European Commission

## Physical reverse flow at Moffat interconnection point (IE/UK)

### 5.1.1-0005-UKIE-S-M-16

Part of Project of Common Interest 5.1.1

The Action contributes to the implementation of PCI 5.1.1 "Physical reverse flow at Moffat interconnection point (IE/UK)", which aims to allow reverse flow of gas between Ireland and the UK, by building a compressor station in Ireland and deodorisation facilities at Moffat in Scotland, UK. This would enable bidirectional flow of gas from Great Britain (UK) to Ireland and for the first time from supply sources in Ireland to Great Britain.

The objective of the Action is a comprehensive multi-disciplinary study (including Pipeline Routing & Environmental screening, Networks Analysis Modelling, Conceptual Engineering and Design, Preliminary Planning Stakeholder consultations and Financial Viability analysis), which will assess all aspects of the proposed project to facilitate physical reverse flow between Scotland (Moffat) and Ireland.

The Action is the next logical step in the PCI development and it represents a significant enabler for the development of the Islandmagee Underground Gas Storage (UGS) facility in Northern Ireland (UK) (PCI 5.1.3).

The Action is ongoing.
