

Connecting Europe Facility ENERGY

Member State(s) involved:

Croatia

Implementation schedule

Start date: March 2017

End date: December 2017

Budget:

Estimated total cost of the action:

€1,494,000

Maximum EU contribution:

€747,000

Percentage of EU support: 50%

Beneficiary:

LNG Hrvatska d.o.o.

Studies for the LNG terminal Krk FSRU solution

6.5.1-0014-HR-S-M-16

Part of Project of Common Interest 6.5.1

The Action contributes to the project of common interest (PCI) 6.5.1, which consists of the phased development of an LNG terminal on the island of Krk in Croatia. The Action covers the preparation of a series of comprehensive multi-disciplinary studies, which will assess all remaining aspects of the project in order to reach the Final Investment Decision (FID) and to start the construction of the floating LNG terminal (1st phase of PCI).

As a result of the Action, the following requests will be submitted to the competent authorities:

- Request for the development consent
- Request for the location permit
- Request for the construction permit
- Request for adoption of LNG terminal services tariffs
- Request for Update of the Rules of Operation

The deliverables of the Action will be, *inter alia*, the Environmental Impact Assessment, Front-End Engineering Design, Conceptual and Main designs completed for the floating unit's jetty, the connecting pipeline and related infrastructure as well as preparatory documents for the FSRU procurement.

This Action is complementary to the studies carried out under other CEF Actions (6.5.1-0037-HR-S-M-14 and 6.5.1-0026-HR-S-M-15) and precedes the construction of the FSRU terminal, also financed by CEF under Action 6.5.1-0018-HR-W-M-16.

The Action is ongoing.
