Poor persons are more likely to suffer from malnutrition, and very often other important needs, like heating or a medical consultation has to be postponed in order to buy food. Since 1987, the EU has provided a free distribution of food from intervention stocks, which has since become an important pillar of the work of charitable organisations. In absence of intervention stocks, this measure has to be reshaped in order to keep supplying food to the persons in need.

MARKT	Adopté le 16 juillet 2008 [COM(2008)464; SEC(2008)2287; SEC(2008)2288];[2008/0157 (COD)]	Traité instituant la Communauté européenne: 47(2), 55 and 95	codécision (COD)	X		The proposal suggests extending the term of protection for sound recordings and performers beyond the currently applicable 50 year term. The objective is to give a fairer deal to performers since authors are protected for 70 years after their death. Performers have an income gap later in their lives and have no say in how their performance is used after the 50 years. The extension will bring some financial benefit to both performers and record producers. The latter need added income to offset losses due to internet piracy. The added income will ensure record companies continue to spend money on new European acts. This initiative should be good for European culture.

The aim is to create a more business-friendly regulatory framework for issuing E-Money, in line with the objectives of the original EMD and consistent with the PSD.

It appears that the application of these rules will afford the same guarantees as those provided by EU legislation. Therefore, it is appropriate to submit a proposal to the Council to establish an equivalence regime for the importation from countries participating in that Scheme.
