JANUARY - JULY 2021: STABLE EU27 AGRI-FOOD TRADE IN EARLY SUMMER

During the first seven months 2021, EU27 agri-food trade (exports + imports) reached a value of **€183.8 billion**; i.e. 3.2% more than in January-July 2020. EU27 exports increased by almost 6% compared to the corresponding period in 2020, reaching **€111.4 billion**. EU27 imports attained **€72.4 billion**, 0.2% less than the corresponding value for the first seven months in 2020. Looking at monthly developments, EU agri-food export values in July 2021 were 2% lower than the previous month, while EU import values in July 2021 were 5% lower than June 2021.

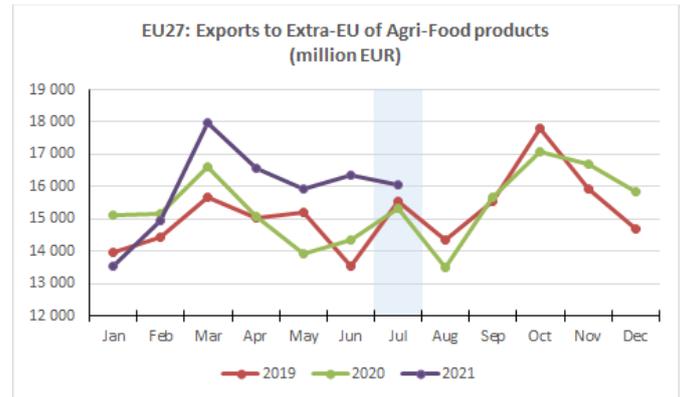

EU27 EXPORTS: INCREASING EXPORTS TO THE US, DOWNWARD TREND IN EXPORTS TO THE UK

On a year over year basis, for the period January-July 2021, EU27 export values increased most to the **United States** (↑€1 632 m, ↑13%), when compared with the same period in 2020. While the majority of EU agri-food products to the US reported higher export values, the biggest increases were noted for wine (↑€666 m, ↑31%), spirits and liqueurs (↑€421 m, ↑28%), and chocolate and confectionery (↑€126 m, ↑26%).

China (↑€857 m, ↑9%) came second with higher EU export values for the majority of products. In particular, good performance was noted for spirits and liqueurs (↑€236 m, ↑100%), coarse grains (↑€230 m, ↑112%), and wine (↑€194 m, ↑61%). Chinese imports of EU pig meat, after very high export values last year, have however declined in value in June and July 2021 compared to the same months the year before, and the cumulative trade value for the period January-July 2021 is still 1% higher than for the same period in 2020. Other destinations, for which the values of EU27 agri-food exports have increased most since January 2021 compared to the first seven months of 2020, include **Switzerland** (↑€450 m, ↑8.5% - mainly due to higher exports of beverages and spirits), Norway (↑€352 m, ↑13%), South Korea (↑€328 m, ↑18%), and Israel (↑€257 m, ↑21%).

On the other hand, for the first seven months of 2021, the EU27 export values fell most to the **United Kingdom** (↓€411 m, ↓2%) compared to the same period in 2020. Exports were particularly depressed in the beginning of the year, after which they rebounded. Exports of cigars and cigarettes (↓€203 m, ↓58%) and pig meat (↓€127 m, ↓22%) decreased most. However, for other products exports have increased in value compared to the same period in 2020, such as for wine (↑€377 m, ↑27%).

Other destinations, for which the value of EU27 agri-food exports has decreased most since January 2021 compared to the same period last year, include **Saudi Arabia** (↓€399 m, ↓16% - in particular driven by lower exports of wheat, barley and infant food), **Algeria** (↓€141 m, ↓8% - milk and cream), Hong Kong (↓€110 m, ↓8%), and Kuwait (↓€104 m, ↓24%).

The main EU27 export destinations in the first seven months of 2021 were the United Kingdom, the United States, China, Switzerland and Japan. 52% of EU agri-food exports went to these five countries.

EU27 EXPORTS: STRONG PERFORMANCE OF EU EXPORTS OF WINE, SPIRITS AND LIQUEURS

Looking at product categories, the rise in EU export values was driven, in particular, by trade in **wine** (↑€2 200 m, ↑30%), and **spirits and liqueurs** (↑€1 105 m, ↑32%). Other noteworthy increases were observed for rapeseed and sunflower oils (↑€506 m, ↑27%) and chocolate and confectionery (↑€505 m, ↑12%).

On the other hand, EU exports of **wheat** (↓€1 300 m, ↓29%) and **infant food** (↓€718 m, ↓14%) saw the biggest declines compared to the same period in 2020. Significant decreases were also reported for **butter** (↓€163 m, ↓18%), vegetables (↓€161 m, ↓5%), milk powders and whey (↓€145 m, ↓5%).

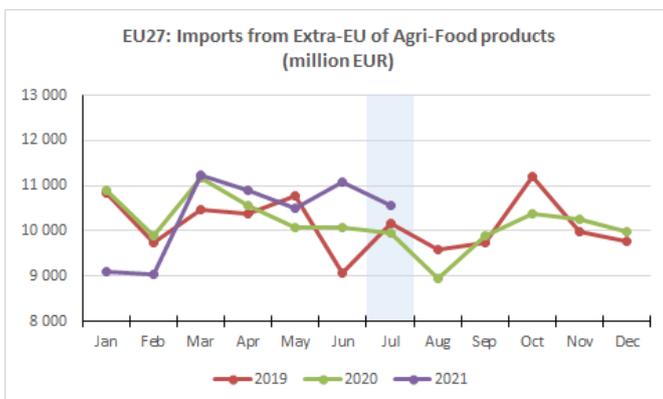

The EU agri-food product categories with highest export values in the period January-July 2021 included wine, pig meat, pasta and pastry, chocolate and confectionery and unspecified food preparations. These products accounted for more than 27% of EU27 total agri-food exports.

EU27 IMPORTS: STRONG DECLINE IN EU IMPORTS FROM THE UNITED KINGDOM

During the period January-July 2021, the value of EU27 agri-food imports decreased by 0.2% compared to the first seven months of 2020. While in January and February imports were lower than in years before, they bounced back to higher than usual levels in June and July. The reduction has been driven by a large-scale fall in the value of EU imports from the **United Kingdom** (▼€2 439 m, ▼29%). While lower import values from UK were reported for almost all agri-food product categories - except for notably spirits and liqueurs (↑€89 m, ↑19%), those with the most significant import reductions in value include tropical fruits, nuts and spices (▼€171 m, ▼88%), wine, vermouth, cider and vinegar (▼€130 m, ▼67%), pet food (▼€127 m, ▼30%), vegetables (▼€123 m, ▼54%), chocolate and confectionery (▼€112 m, ▼23%). Monthly import values from the UK in July 2021 were 23% lower compared to the same month in 2020, after having fallen sharply since January 2021 (▼18% in June, ▼10% in May).

A further decrease was also observed in EU imports from the **United States** (▼€525 m, ▼9%) compared to the first half of 2020. This was primarily driven by reduced imports of tropical fruit, nuts and spices (▼€469 m, ▼27%). On the other hand, a notable increase in value of EU imports was reported for US soya beans (↑€318 m, ↑46%).

Other destinations, for which the value of EU27 agri-food imports fell most since January 2021 compared to the first seven months of 2020, include **Ukraine** (▼€202 m, ▼6% - important reductions of EU imports of maize and rape seeds), Viet Nam (▼€178 m, ▼13% - coffee) and Moldova (▼€138 m, ▼42%).

On the other hand, countries for which the EU27 import values have kept increasing most since January 2021 include **Brazil** (↑€839 m, ↑12% - soya beans), **Australia** (↑€476 m, ↑55% -

rapeseed), **India** (↑€340 m, ↑23% - soya bean oilcakes), Serbia (↑€248 m, ↑30% - maize), and Argentina (↑€189 m, ↑8% - soya bean oilcakes).

The top origins for EU agri-food imports in the first seven months of 2021 included Brazil, United Kingdom, United States, Ukraine and China. These countries accounted for 35% of EU27 agri-food imports in value terms.

EU27 IMPORTS: STRONG INCREASE IN EU IMPORTS OF OILCAKES AND SOYA BEANS IN VALUE TERMS

Looking at product categories over the first seven months of 2021, the highest decreases in import values continued to be reported for **tropical fruit, nuts and spices** (▼€814 m, ▼10%), **unroasted coffee and tea** (▼€230 m, ▼6%), **citrus fruits** (▼€181 m, ▼17%), fruit juices (▼€178 m, ▼14%) and raw tobacco (▼€158 m, ▼12%).

On the other hand, import values increased most for **soya beans** (↑€929 m, ↑29%), **oilcakes** (↑€901 m, ↑25%), **fatty acids and waxes** (↑€299 m, ↑17%), palm and palm kernel oil (↑€277 m, ↑8%) and coarse grains (↑€164 m, ↑9%).

The EU agri-food import products with highest import values in the period January-July 2021 included fruit (tropical and other than citrus), oilcakes, soya beans, unroasted coffee and tea. These products accounted for nearly 33% of EU27 agri-food imports.

EXPANDING SURPLUS IN EU27 AGRIFOOD TRADE

During the period January-July 2021, the EU27 agri-food trade surplus' value stood at **€39 billion**, an increase of 18% compared to the corresponding period in 2020. This net trade balance remained to be driven by high exports of wine, pig meat, infant food, chocolate and confectionery, pasta and pastry.
