Learning as a social experience
Is the person next to you standing too close? They’re mainly empty space.
Is the person next to you standing too close? They’re mainly empty space.
THE MOON IS ESCAPING THE EARTH...

The moon has been the Earth’s nearest neighbour since around 4.5 billion years ago. And since humanity’s earliest recorded history, it’s been a source of fascination, myth and wonder. But our constant companion is leaving Earth’s orbit... at the rate of four centimetres a year.
THE MOON CAN HAVE QUITE THE PULL ON YOU
Nuclear NUTRIENT

10% of foods are radioactive!
BLING BEGAN WITH A BANG

Nuclear NUTRIENT
lots of foods are radioactive!

The Earth:
JUST RIGHT
Are you at a standstill? You're travelling through space.
Cracks form in the pavement when rainwater freezes.
Thanks 😊
