

2.5.137 Release notes

Créé par Jonathan MARSIGNY, dernière modification il y a juste un instant

Introduction

This release contains mainly Bugfixes.

The upgrade of Views module required action from the customer.

Actions required

1) Playground is available with this release installed to make some tests.

2) North Macedonia denomination is changed.

If you used the taxonomy EC World Countries, you need to update the denomination manually.

You should update the denomination in Drupal at > structure > Taxonomy > Ec World Countries

If is not already set, please update "The former Yugoslav Republic of Macedonia" to "North Macedonia".
