

*"Getting rid of complex, paper based and duplicated processes will help to make the single market a reality in the digital age. It will make it easier for everyone to interact with governments based on openness and transparency. I am strong advocate of open government. Open, transparent and collaborative governments that make life easier for people and businesses –and for administrations themselves –also across borders."*

**Andrus Ansip**

*Vice-President of the European Commission  
for the Digital Single Market*

*"It has become vitally important to ensure free movement of data in Europe. Digital transformation of public services benefits EU citizens and businesses. EU local administrations improve thanks to digital services w/ direct benefit for citizens and businesses".*

**Mariya Gabriel**

*Commissioner for Digital Economy and Society*

## About ISA<sup>2</sup>

The ISA<sup>2</sup> Programme supports the development of digital solutions for the modernisation of public administrations. The solutions developed enable public administrations, businesses and citizens in Europe to communicate digitally saving time and costs for all parties involved.

**The ISA<sup>2</sup> Programme has a budget of 131 million Euros and is running from January 2016 to December 2020.**

**NOTE:** Funds are not allocated to entities outside the European Commission (i.e. in the form of grants). The European Commission services in charge of the various actions implement them in accordance with the European public procurement rules.

ISA<sup>2</sup>

# Check out our interoperability and open source solutions to cut red tape. More to come!

Key and generic interoperability enablers

Secure document exchange platform

e-TrustEX

Semantic interoperability

ArchiMate diagrams visualising e-Document lifecycle

e-Docs

Decision making and legislation

Tool facilitating the editing of legislative texts

LEOS

EU policies -Supporting instruments

To gather statements of support online

OCS for ECIs

Geospatial solutions

Communication and Information Resource Centre for Administrations, Businesses and Citizens

CIRCABC

Supporting instruments for public administrations

National Interoperability Framework Observatory

NIFO

Data model for describing public services and the associated life and business events

CPSV-AP

Data communication network service

TESTA

e-Procurement system for Public Administrations

Open ePrior

Tool facilitating participation in public procurement across the EU

ESPD

EU Interoperability Reference Architecture and EU Interoperability Cartography

EIRA & EICart

Open Project Management Methodology

Open PM<sup>2</sup>

Describe datasets on data portals

DCAT-AP

Commonly agreed models for public sector data

Core Vocabularies

Tool for mapping certificates necessary in public procurement

e-Certis

Tool to manage and share reference codes

Re3gistry

Tool for creating, managing and analysing online surveys and public consultations

EUSurvey

Open source licence

EUPL

Model to describe open source and reusable solutions

ADMS

Multilingual platform for collaborative thesaurus management

VocBench3

Common assessment method for standards and specifications

CAMSS

Platform for sharing and reuse of IT solutions for public administrations

Joinup

Interoperability Maturity Assessment of a Public Service

IMAPS

Interoperability and conformance testing platform

Interoperability TestBed
