Semantic Interoperability Conference

14 June – Valletta – Malta

Learn from the pioneers

SEMIC 2017 brings together inspirational talks and presentations on data and information management initiatives from European public administrations, EU institutions and agencies, as well as the private sector. It is your chance to learn more about those initiatives, to be inspired by real-life implementations and to share your own experience.

What to expect on the day

SEMIC 2017 offers an opportunity to learn how leading organisations in Europe are creating value from data and information, for themselves and their stakeholders, by:

- Investing in data and information governance and management activities;
- Rethinking information retrieval and delivery within and beyond organisational boundaries;
- Sharing information and collaborating;
- Using data and information to improve decision-making.

The conference will be held in Valletta on 14 June 2017, in collaboration with the Malta Information Technology Agency.

This one-day conference is organised by the ISA² Programme of the European Commission:
ec.europa.eu/isa2

Attendance is free of charge, but registration is required as places are limited.

Key reasons to attend SEMIC 2017

- Become part of the most comprehensive community of semantic interoperability
- Discuss face-to-face with thought leaders and innovators
- Discover new semantic interoperability solutions
- Learn about real-life implementations
- Enlarge your network of professional contacts
