Regulation (1316/2013) establishing
the Connecting Europe Facility

«The European Interoperability Framework is supported by the ISA² Programme of the European Commission. ISA² is a EUR 131 million programme supporting the modernisation of public administrations in Europe through the development of eGovernment solutions. More than 20 solutions are already available, with more to come soon. All solutions are open source and available free of charge to any interested public administration in Europe.»
