The IMAPS v1.1.0 is an online self-assessment tool that allows public service owners to measure the Interoperability Maturity of their Digital Public Services.

**Features**

- Helps public service owners evaluate, improve and consider all key interoperability aspects of their public service, looking at the context of their service and assessing how the service is delivered, how it consumes existing services in order to be delivered, and how it is managed
- Fully compliant with the 2017 version of the European Interoperability Framework (EIF)
- Covers interoperability across all four EIF interoperability views (Legal, Organisational, Semantic and Technical)
- A compact and highly user-friendly online self-assessment survey

**Expected Benefits**

- Provides immediate insight into a public service’s interoperability and tailored recommendations on how to improve its interoperability where necessary
- Measures how well a digital public service is able to interact with other organisations to realise mutually beneficial and agreed common goals through the exchange of information and reuse of services
- Provides an opportunity to know and improve the interoperability of a public service at any point in time throughout the lifecycle of the public service
- Provides on-demand peer comparisons with other public services’ interoperability maturity
- Applicable to any national digital public service in the European Union across any domain from open data portals, to eVoting platforms, to public procurement services, and more
