

# The Digital Single Market and the role of Interoperability

## *European Interoperability Framework revision*

### *Call for action!*

eGovernment

Luxembourg, December 2015

Stephen Quest

Director General

European Commission

# Benefits of Interoperability

- Cost savings for users
- Increased revenue for owners
- Reduced operational costs for owners
- Vendor lock-in avoidance for owners
- Facilitate reuse, sharing and adoption of future solutions

- Foster innovation
- Increase transparency
- Impact on growth and competitiveness
- Protection of fundamental rights for users and society
- Reduced CO<sub>2</sub> emissions
- Better decision making
- Furthering public and private policy goals

- Owner time savings
- User time savings

- Higher services satisfaction for users
- Improved compliance for owners
- Better data quality for owners
- Better data availability for users
- Improved security for owners

Interoperability

## 3 Creating an European Digital Economy and society with growth potential

### Big data and cloud

Digital data stored in cloud:  
**2013: 20% - 2020: 40%**

The use of big data by the top 100 EU manufacturers could lead to **savings worth €425 billion**

## 1 Better access for consumers and businesses to digital goods and services across Europe

### Unlocking e-commerce potential

**15% of consumers** bought online from other EU countries in 2014 while **44%** did so **domestically**

## 2 Shaping the right environment for digital networks and services to flourish

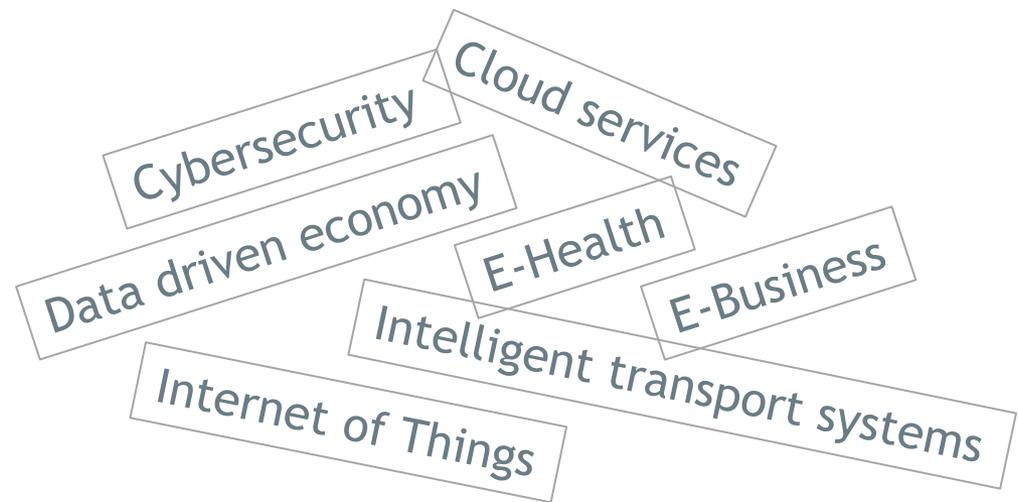

### Strong European data protection rules to boost the digital economy

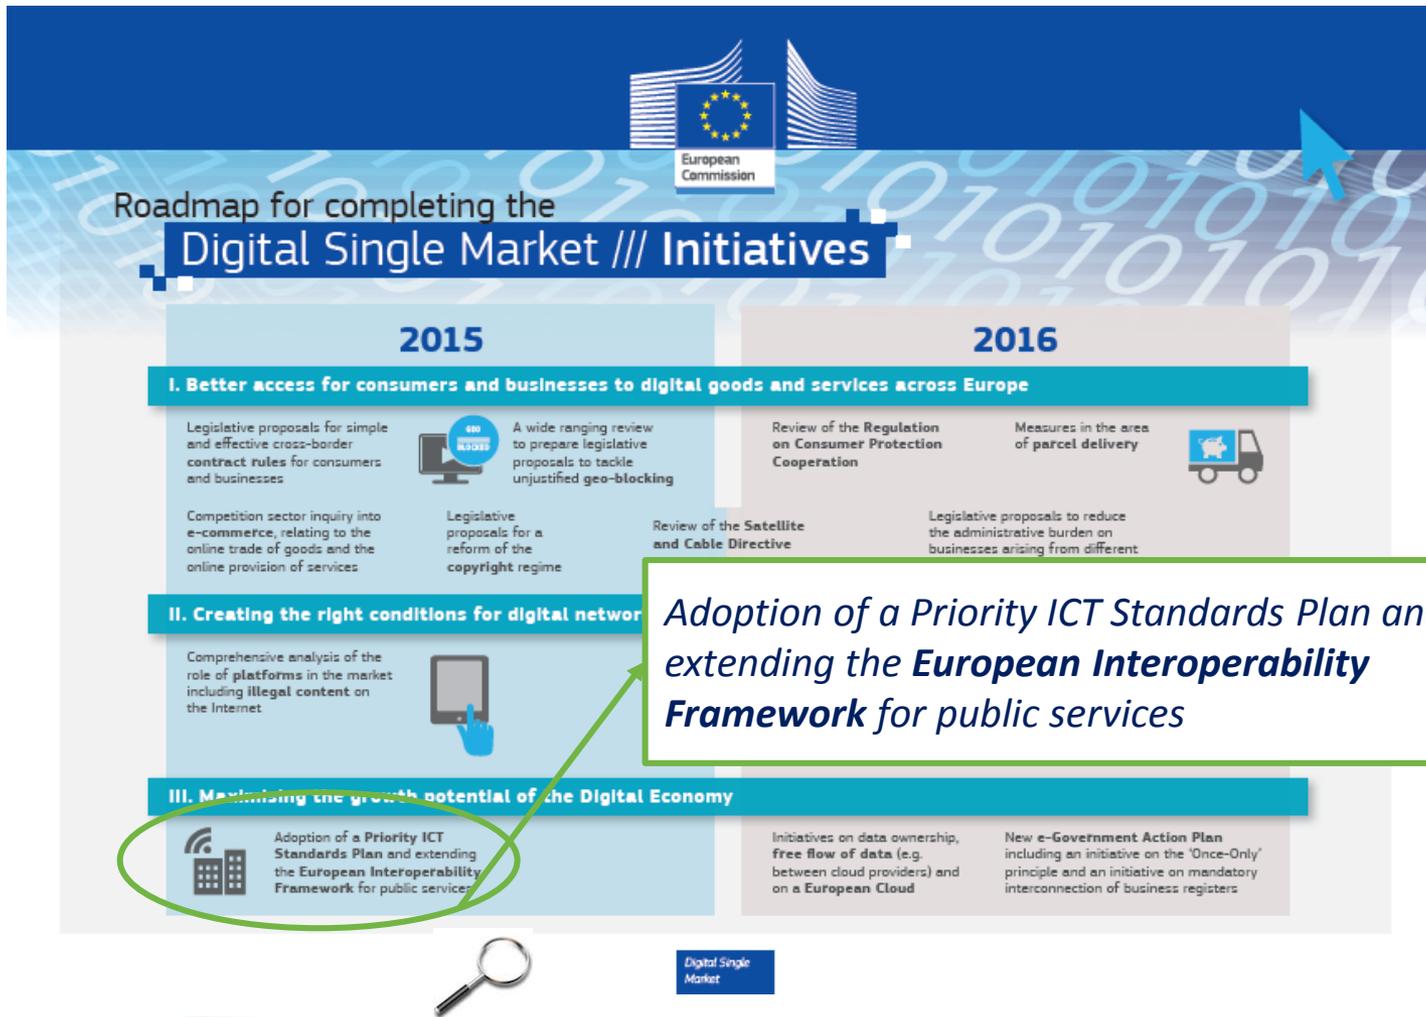

**72% of Internet users** in Europe still worry that they are being asked for too much **personal data online**

## Creating an European Digital Economy and society with growth potential

**Interoperability** is strategic for

Global challenges require multidisciplinary  
approaches

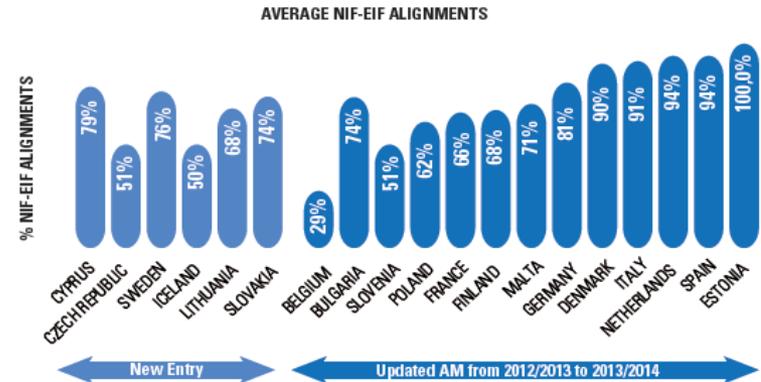

# Current State-of-Play

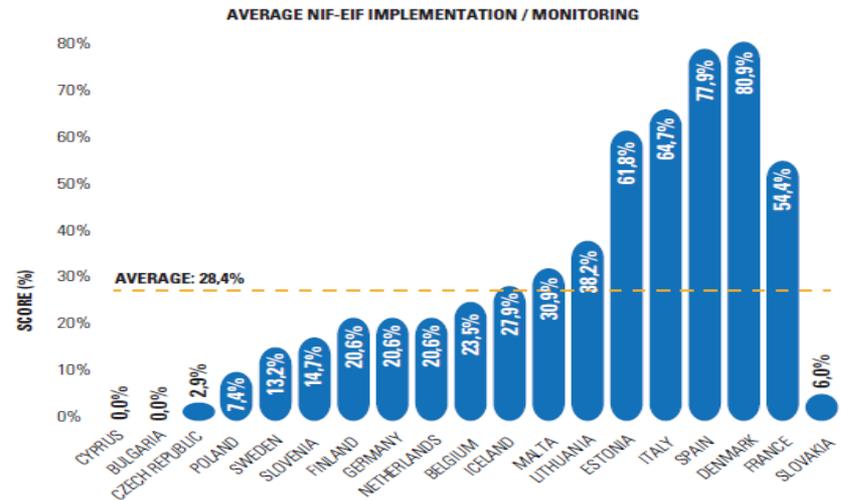

## The European Interoperability Framework - EIF

*Well accepted as a framework by the MS*

*Still some way to go to have it implemented*

# European Interoperability Framework Revision

Guidance

Support

Best practices

Avoiding the creation of new electronic barriers or silos when modernising public administrations in Europe

Facilitating the interconnection of public services for citizens and businesses at national and EU level

Improving quality of public services and transparency

Coherence of open data from various sectors and countries

# European Interoperability Framework Revision

## Policy

A policy described government, private "Statement of Intent" important organization

### Alignment with policy development

- › Policies having a strong linkage with IOP have been either recently launched (e.g. DSM strategy) or revised (e.g. PSI Directive).

### Extend and align with emerging trends

- › Include the European Reference Interoperability Architecture (EIRA) and Cartography (EIC)
- › ICT (e.g. Cloud)
- › Information management (e.g. Big data, Open data)
- › Security
- › Organisational and governance structures

### More focus on EIF implementation is needed

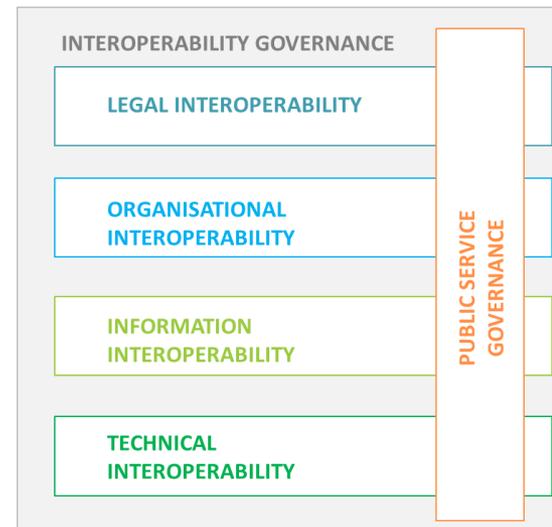

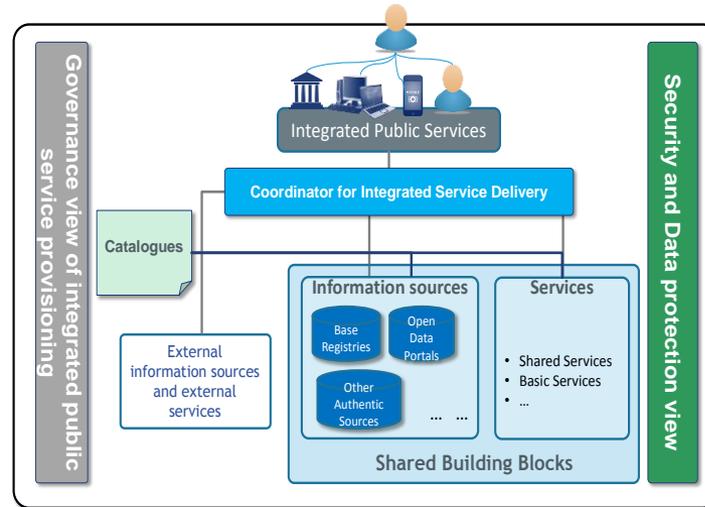

- › NIFs aligned with EIF to a large extent (72%)
- › Application (implementation and monitoring) of NIFs still lags behind (28%)

# European Interoperability Framework Revision

**Updated Interoperability  
PRINCIPLES**

**Updated Interoperability  
RECOMMENDATIONS**

**Updated Interoperability  
MODELS**

# Strategy and Framework together

## Strategy - EIS

## Framework EIF

Recommendations  
and  
Conceptual models

*to guide*

*to implement in*

# The European Interoperability Strategy

## Priorities

Move from **alignment of national approaches with the EIF** to **real implementation**

From **political willingness** on IOP to **practical implementation**

**Confronted challenges**

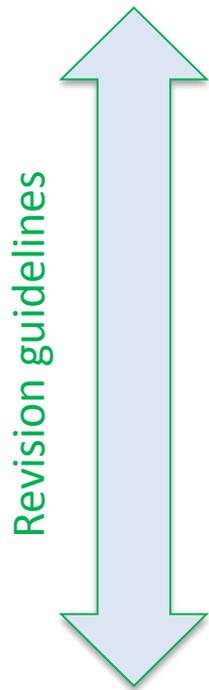

Deal with **legal barriers on iop** through "impact assessments" and "digital checks"

**Put in place IOP Governance** at EU level and nationally && **ensure coordination** among various actors

Deal with the **low uptake of digital public services including** through a "user-centred" approach

Provide **tools and guidance** to overcome **resources constraints** && deal with **shortage of skills** on IOP

- 1 EIS should be more “concrete” with a clear shift towards “implementation”.
- 2 Definitions, objectives and clusters of the EIS should be simplified and clarified.

Set up an implementation **roadmap** with milestones and measurable goals

**Plan** and **prioritise** roadmap's activities

**Monitor** implementation (e.g. uptake and reuse) both, EIS and EIF

# EIS Focus areas

Priorities for the period 2016 -2020

(work in progress)

## FOCUS AREA N°1

Governance &  
Coordination

1. **Governance structure for IOP coordination** (EU, MS)
2. Put at place a **monitoring of the EIS implementation (i.e. observatory)** (EU, MS)
3. Identify and liaise with other relevant policies and their governance structures at EU and national level

## FOCUS AREA N°2

Organisational  
interoperability

5. Mechanism for **measuring IOP benefits** (EU, MS)
6. Identify **organisational structures for digital public services** (EU, MS)

## FOCUS AREA N°3

Engagement/  
Raising awareness

7. **Communication campaign** promoting the importance and benefits of interoperability (EU)
8. **GO LOCAL** in MSs. Liaise with EU country desks for dissemination (EU, MS)
9. **Platform (JOINUP)** for best Practice Centre of Excellence (EU)
10. **Platform for user engagement / community building** (EU, MS)

## FOCUS AREA N°4

Key enablers

12. Define common specifications on the terms and conditions to access **base registries** (EU, MS)
13. Data specifications to support the EU **open data initiative** (EU)
14. Make available **catalogues of services** across the EU (EU, MS)

## FOCUS AREA N°5

Supporting  
instruments

15. Identify legislation that hampers IOP (including **legal screening**) / Perform digital check (EU, MS)
16. Develop and maintain **EIRA and the cartography of solutions** (EU)

Include actions coming from the ISA<sup>2</sup> legal basis

All actions should be user centered and needs driven

Proposed actions at both national and EU levels

## Financial instruments to consider for the EIS/EIF

ISA <sup>2</sup>	Horizon 2020	Connecting Europe Facility	ESIF and SRSP	INTERREG Europe
<ul style="list-style-type: none"><li>› Facilitating efficient and effective electronic cross-border or cross-sector interactions</li><li>› Developing a EU holistic approach to IOP;</li><li>› Maintain and monitor implementation EIS/EIF/EIRA</li><li>› Contributing to the development of e-administration</li><li>› Developing IOP solutions</li></ul>	<ul style="list-style-type: none"><li>› Addressing innovative ways to use ICT in the public sector</li><li>› Supporting piloting activities on a large scale and several sectors addressing different technological areas</li><li>› Building on Member States' initiatives.</li></ul>	<ul style="list-style-type: none"><li>› Supporting the deployment and operation of key cross-border digital services for businesses and citizens</li><li>› Electronic identification and procurement, interoperable health services....</li></ul>	<ul style="list-style-type: none"><li>› Supporting national, regional, local administrations in the implementation of their national operation and reform programmes</li></ul>	<ul style="list-style-type: none"><li>› Addressing ICT as a cross-cutting theme that links in with the other thematic objectives</li></ul>

# Revision Process

## How it is organised

### *Consensus-building process with*

- ✓ The Member States
- ✓ The concerned Commission Services
- ✓ The other European Institutions

*Working with experts from the academia for the EIF*

### *Other stakeholders*

- ✓ Standardisation bodies
- ✓ Industry representatives
- ✓ Academia

*Public consultation  
From January to March 2016*

# ISA<sup>2</sup> coming up !

(successor of the ISA programme)

## Objective

Shall facilitate efficient & effective electronic cross-border or cross-sector interaction between European **public administrations** & between them, **citizens & businesses**.

- Will run from 2016 until 2020, aligned with the Multi-annual Financial Framework (MFF)
- Will have a financial envelope of approx. 131 M€
- Will receive proposals from Member States and Commission services
- Will be executed by the European Commission

The screenshot shows the Joinup website interface. At the top, there is a navigation bar with the Joinup logo and the tagline 'Share and reuse interoperability solutions for public administrations'. Below this, there is a search bar and a 'Login or Sign up' button. The main content area displays the 'European Interoperability Architecture (EIA)' project page. The page includes a 'Description' tab, a 'Download' button, and a 'Propose your...' button. The description text reads: 'With the growing amount of information exchanges between public services (across borders and sectors), the need for interoperability in Europe is higher than ever. The ISA Action 2.1 (EIA) introduces a reference architecture to guide public administrations in their work to provide interoperable European public services to businesses and citizens.' There is also a 'Related Content' section on the right side of the page.
