Following the publication of the European Commission’s new Circular Economy Package on 2 December 2015, the government of the Netherlands, in cooperation with the European Commission, will host the “Unwrapping the Package - towards a Circular Economy in Europe” conference as part of the Dutch EU presidency in 2016.

Stakeholders from business, civil society and public authorities across the EU will discuss challenges and opportunities for a circular economy in Europe and the impact of the new proposals from the EU Commission.

The Conference aims to present the context within which the recently launched Circular Economy package has been designed. Key measures and targets included in the package will be presented. The second day is dedicated to a workshop for policy makers and aims at discussing how existing policy instruments could be improved to better support the European Circular Economy.

The JRC will share its expertise based on recent achievement and ongoing activities in support to Circular Economy.
