Transport links get us to where we need to be, energy systems power our homes and businesses, and digital networks allow us to communicate. The Western Balkans region is surrounded geographically by EU Member States. Improving transport and energy links – both in the region and with the EU – is vital to stimulate economic growth and integration and for business to thrive. Connectivity is the foundation upon which our economies can prosper.

LOOKING FORWARD – INVESTING FOR THE FUTURE

Connectivity is at the heart of the Economic and Investment Plan for the Western Balkans, presented by the European Commission in October 2020. The Plan aims to spur the long-term economic recovery of the region, and accelerate regional integration and convergence with the EU.

Ongoing support to connectivity is vital for the lives of people, for businesses and the economies of the region. The Plan foresees up to €9 billion in EU grants for flagship investments in areas including energy, transport, and the twin green and digital transitions. In addition, the EU can provide guarantees to help reduce the cost of financing for both public and private investments and the risk for investors, through the proposed Western Balkans Guarantee Facility. This is expected to raise up to €20 billion of investment.

The Economic and Investment Plan identifies ten investment flagships in six areas:

- Sustainable transport
- Clean energy
- Environment & climate
- Digital future
- Private sector
- Human capital

The Economic and Investment Plan should help transform the Western Balkans into one of the most attractive regions for investment in the world.

CONNECTIVITY AGENDA – FIVE YEARS OF SUCCESS 2015-2020

In 2015, the EU launched the Connectivity Agenda for the Western Balkans. Since then, over €1 billion from EU pre-accession funds has been allocated through grants to high priority connectivity projects. This has not only delivered better infrastructure across the Western Balkans region, but also driven forward integration with core transport and energy Trans-European Networks. These grants, together with loans of partner Financial Institutions, have generated almost €4 billion in investments and created over 45,000 jobs in the Western Balkans region.

This builds on three decades of EU investment in the Western Balkans, which has led to dozens of major road and rail interconnections, upgrades at ports, and transformational energy projects. The EU has contributed more than €11 billion to transport and energy projects through grants and loans provided by the European Investment Bank, which has leveraged €22 billion in total investment.

Key achievements 2015 - 2020

- Over €1 billion from EU grants in 45 projects in total
- 37 transport projects / 8 energy projects
- Almost €4 billion in investments
- Over 45,000 jobs created

Snapshot of results 2015 - 2020

- 560 km of 400kV electricity transmission lines
- 40 km of waterway navigability improved
- 176 km of gas pipeline connecting the region and neighbouring EU Member States
- +200 km of motorways built or upgraded
- +300 km of railway lines benefitting 2 million people and modernisation of a joint railway border station
- Renovation of 1 maritime port and 1 inland port

Connectivity Agenda - Sector Support 2015 - 2020 (€ million)
