

Political and sOcial awareness on Water EnviRonmental challenges

POWER Project 01/12/2015-30/11/2019

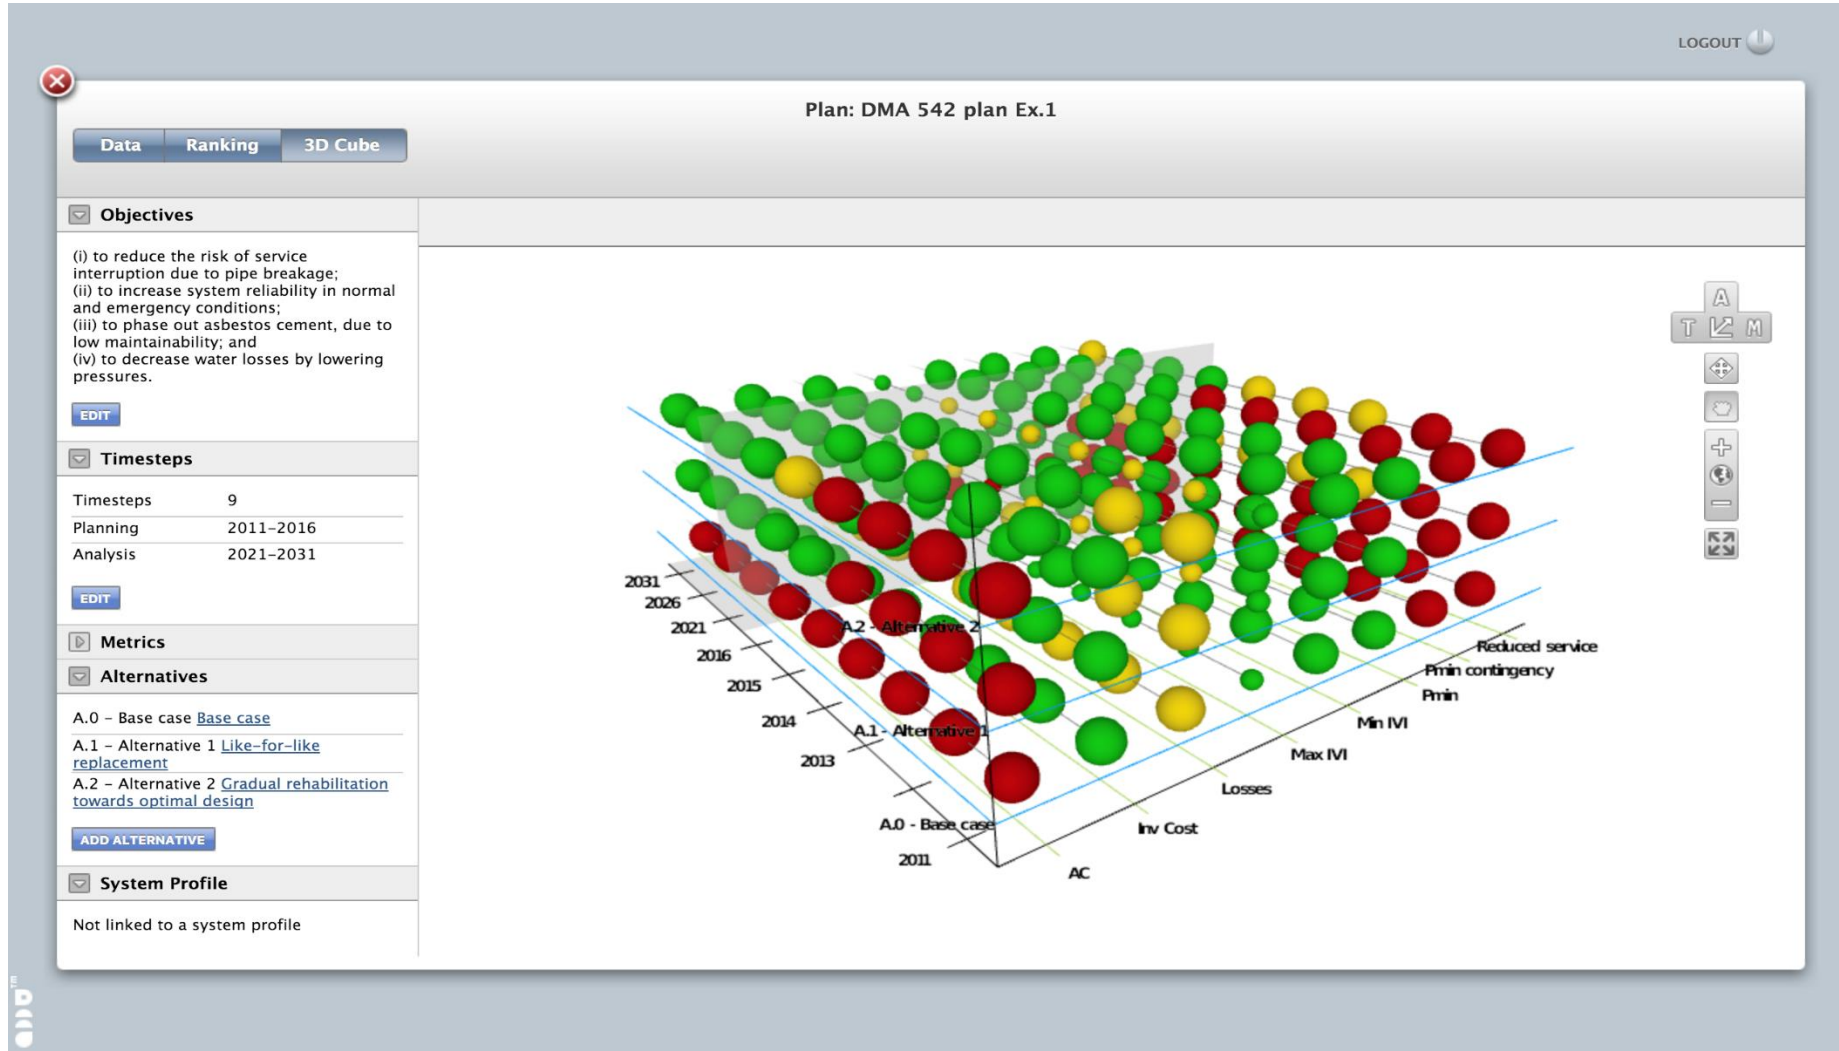

H2020-ICT10c-2015
Grant Agreement nr. 687809

POWER is an EIP Water Action Group related project pioneering the DSP approach to share the knowledge and experience of water scarcity, security, quality and water consumption-related issues in different EU local authorities, thus creating an important tool for EU water policy.

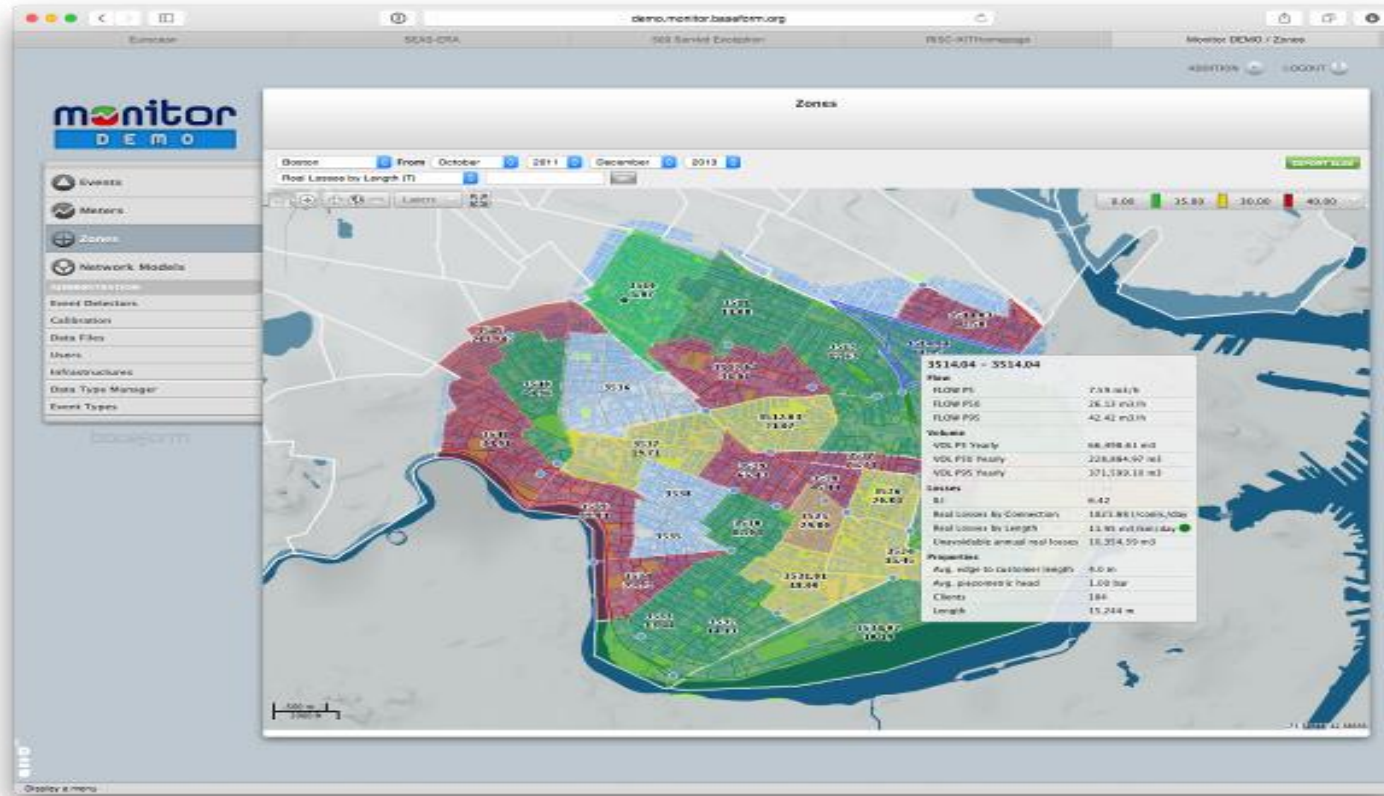

POWER is a user-driven project to share the knowledge and experience of water scarcity, security, quality and water consumption-related issues in different EU local authorities, thus creating an important tool for EU water policy.

POWER will:

- **increase the transnational municipal network effect** by facilitating unrestricted communication and community involvement and by creating collective intelligence on ways of addressing urban climate change mitigation and adaptation, targeting water related concerns
- **influence related policy planning and decisions** and expand related socially innovative behaviour

The **POWER Digital Social Platform** will support decision making at strategic and policymaking levels.

The POWER Consortium:

1. De Montfort University – Coordinator (United Kingdom)
 2. Consortium Ubiquitous Technologies – CUBIT Scarl (Italy)
 3. Fundacio CTM Centre Tecnològic CTM (Spain)
 4. KWR Water B.V. (The Netherlands)
