# Why a European Large Collaborative AI Platform and Ecosystem ?

---

## To bring together all stakeholders

- around the creation of a large European initiative
- to structure, support and grow the use of AI in ICT and day to day life
- To allow business to innovate with it

## Main stakeholders

- Researchers
- Developers
- Users
- Innovators
- Teachers, Educators and trainers
- Societal specialists (legal, ethics, ...)
- Funding companies
- ... **and all other interested ones**

## WHAT WE INTEND TO DO ?

---

- **Set up and animate a large, strong and active European AI ecosystem**
- **Collectively provide world class AI elements of tools, components, modules, knowledge, algorithm and example of use**
- **Make them directly & easily usable in applications without theoretical knowledge (for SMEs and industry)**
- **Ensure access and usage by the vast European ICT community**
- **Promote products enhancements and value creation in multiple business domains**
- **Assist AI driven start-ups, entrepreneurs and SMEs to go to business**
- **Address Ethical, Societal and Privacy issues in accordance with European values**

## Business Domains that may be addressed “simultaneously” within the R&T challenges

---

- Banking, Insurance
- Energy, Environment
- Retail, luxury goods, tourism
- Health
- Transport
- Telecoms
- Robotics
- Autonomous vehicle
- Medias
- Industry automation
- Electronic & Digital technology
- ... and Standard ICT apps

The selected R&T topics should help to progress within one or more of these domains to create products or value

# Please come and talk with us !

---

**We have started to setup a large European group of research, industrial and business organisations to support this initiative**

**We are inclusive. Everybody may contribute and participate, there is room for good ideas, proposals and suggestions**

**Participate to this enthusiastic programme, rewards will come in many forms !**

## Thank you
