

DENMARK

The Danish National coalition defines common objectives, invites relevant parties to join and to co-create an action plan to bridge the skill gap. Even though Denmark is among the most digitized nations, research shows that more than 1 million Danish citizens aged 16 to 65 years of age are lacking in digital skills. In the ICT sector, Denmark also has a critical skills gap, which seems to be growing looking into the future.

Digital skills...

Main achievements and projects

- The ITTA platform which is an open e-learning platform that contains adaptive assessment, learning and certification. The platform can be used as a standalone solution or as blended learning and complementary to existing programmes (e.g. the national workforce education programme). A “freemium based” competence scan that assesses the gap between your ICT profile and your personal skills.
- Digitalisation courses offered through local libraries <https://www.ekurser.nu/>
