

THE NETHERLANDS

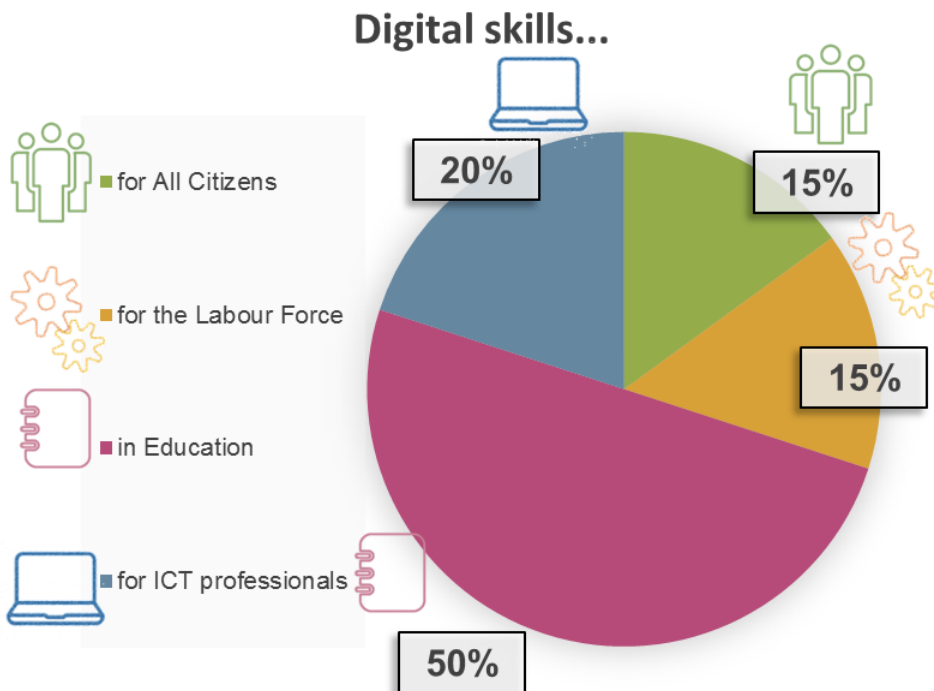

The Dutch coalition aims to develop a movement in the Netherlands targeting and leading digital skills for inclusion, innovation and economic benefits. The premise behind this purpose lies in the rapid tempo of digital developments which necessitate complementary digital skills. The Dutch coalition is focused on ensuring citizens at all levels are ready for the digital transformation and ensuring coding and digital skills become a cornerstone of the education curricula.

Digital Champion for the Netherlands
Tineke Netelenbos

Share of activities by target groups (as %)

Main achievements

- [CodePact](#) aims to have 400.000 children participating in at least one coding lesson during their compulsory education.
- [Geef IT Door](#)- Together with the Coalition partners Nederland ICT and CIO-platform, 250 matches are arranged between secondary schools and IT professional who give an introductory lesson in IT. This lesson is aimed to give students a clearer idea of the career opportunities of ICT professionals.
- [Dutch Digital Delta](#) - the Human Capital Agenda on ICT aims to improve the image of the ICT professional by handing out talent grants for talented students.
