

Technology brokerage portal: overview

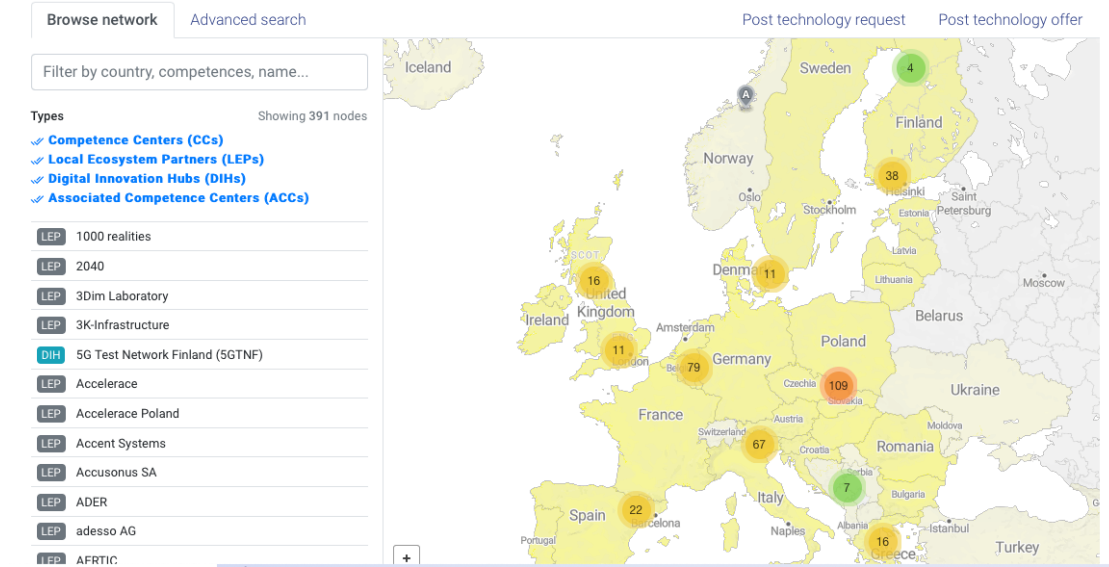

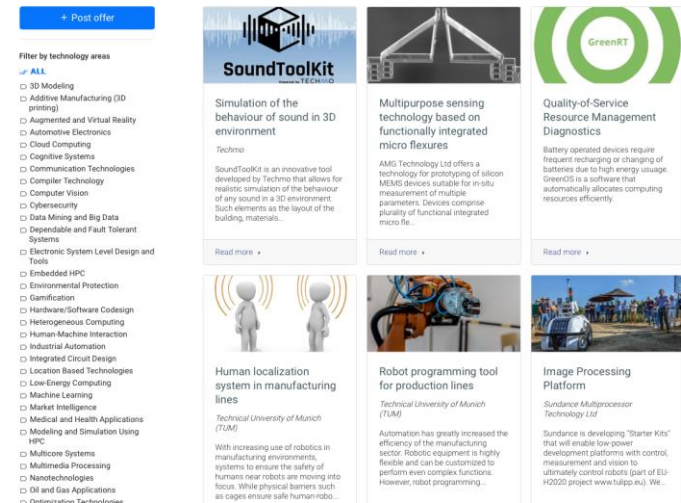

1. Network
2. Local contact points
3. Technology offers
4. Technology requests

The 23 TETRAMAX Competence Centers form the backbone of a European network with competence in all fields of Customized Low-Energy Computing (CLEC) for Cyber-Physical Systems and the Internet of Things. Each Competence Center is connected to further Local Ecosystem Partners (LEPs) and Digital Innovation Hubs (DIHs). Network nodes from EU candidate and associate countries are denoted as Associated Competence Centers (ACCs).

SMEs, mid-caps and other companies can use the network to identify digitization technology suppliers all across Europe, and academic research institutions can effectively offer their new technologies to European industries.

Below you can browse the network, search for specific technology partners throughout Europe and post technology offers/requests. Please contact the TETRAMAX Chief Technology Broker or your regional or national contact point as first-hand "shopping places".

SoundToolKit

Simulation of the behaviour of sound in 3D environment

Techmo

SoundToolKit is an innovative tool developed by Techmo that allows for realistic simulation of the behaviour of any sound in a 3D environment. Such elements as the layout of the building, materials...

Post request and offers on TETRAMAX website: tetramax.eu/brokerage

⇒ Dedicated TETRAMAX technology broker

⇒ Writes and publishes information on portal

⇒ Uses TETRAMAX network to find the right match

TETRAMAX

Your one stop shop for
digitizing European SMEs

Currently almost 400 nodes in total in our network and still growing:

- 25 Competence centers (TETRAMAX partners)
- 291 Local Ecosystem partners (such as SME or SME associations)
- 61 DIHs (such as local incubators)
- 12 Associated Competence centers in EU associated countries
- Related networks and projects such as HiPEAC, Eurolab4HPC, Enterprise Europe Network, CPSE Labs,...

TETRACOM project:

The technology transfer process is still ongoing,
even after the project ended .
