

# Nordic Carbon Neutral Bauhaus

Nordic Sustainable  
Construction

Matti Kuittinen  
01 April 2022

# Carbon Neutrality?

We are short of time in avoiding a climate disaster

Built environment causes high amounts of emissions

We need to rethink both building and living

New architecture, design, arts and culture needed

The transition needs to be fast & just

# A Nordic Bauhaus?

Nordic countries  
see the changes  
of climate  
already now

As a response,  
we have  
ambitious  
climate policies

We are  
introducing  
climate  
declarations for  
buildings

We wish to offer  
a dialogue  
platform for the  
entire NEB  
community

# Our vision 2030

## A **green** Nordic region

Together, we will promote a green transition of our societies and work towards carbon neutrality and a sustainable circular and bio-based economy.

## A **competitive** Nordic region

Together, we will promote green growth in the Nordic region based on knowledge, innovation, mobility and digital integration.

**The Nordic  
region will  
become the most  
sustainable and  
integrated region  
in the world**

## A **socially sustainable** Nordic region

Together, we will promote an inclusive, equal and interconnected region with shared values and strengthened cultural exchange and welfare.
