

# [SPACE MATTERS]:

## How to develop a common methodology for CityLabs

*Exploratory Research Activity*

### Community of Practice on Cities – Plenary Meeting

28 April 2022 14h00 – 15h30

# THE ERA ON CITYLABS

## From where it started:

The JRC conducts impressive **territorial** studies at the European and regional scale

What about the **urban** scale? By zooming-in we could understand the effective impacts of policies, and we can obtain new data for trans-scalar learning...

We should make use of the existing CityLabs and rethink its entire methodology to be adapted to different cities and different topics!

# WHAT IS A CITYLABS

CityLabs

*A CityLab is a participatory format where the JRC works closely with a specific European city to collectively gather urban data and assess policies impacts through a process of spatialisation.*

The study of a **path tendency** in different cities

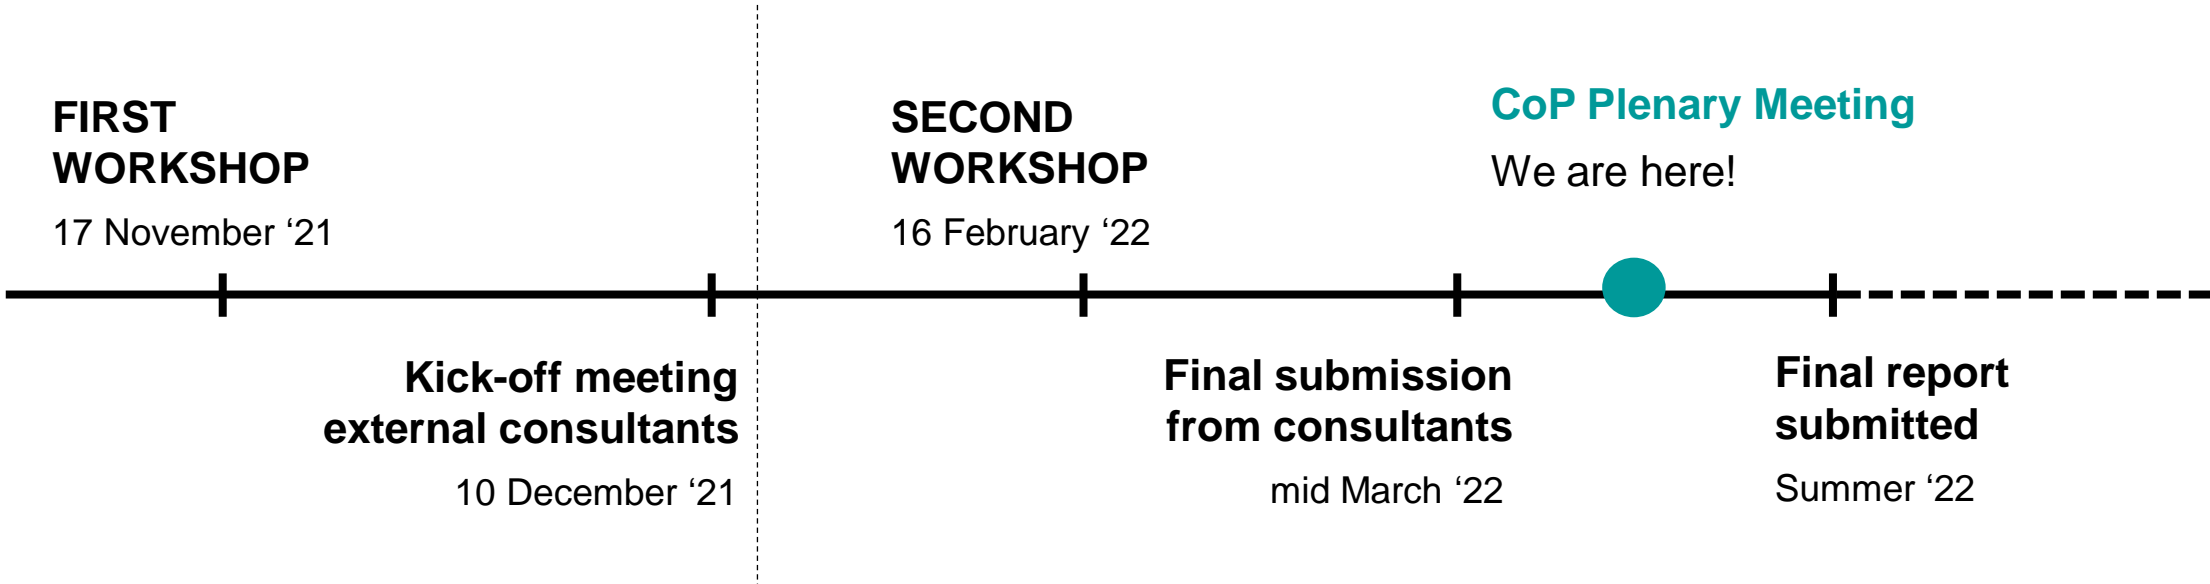

A way to scientifically learn from the small scale to **create impact at the bigger European one**

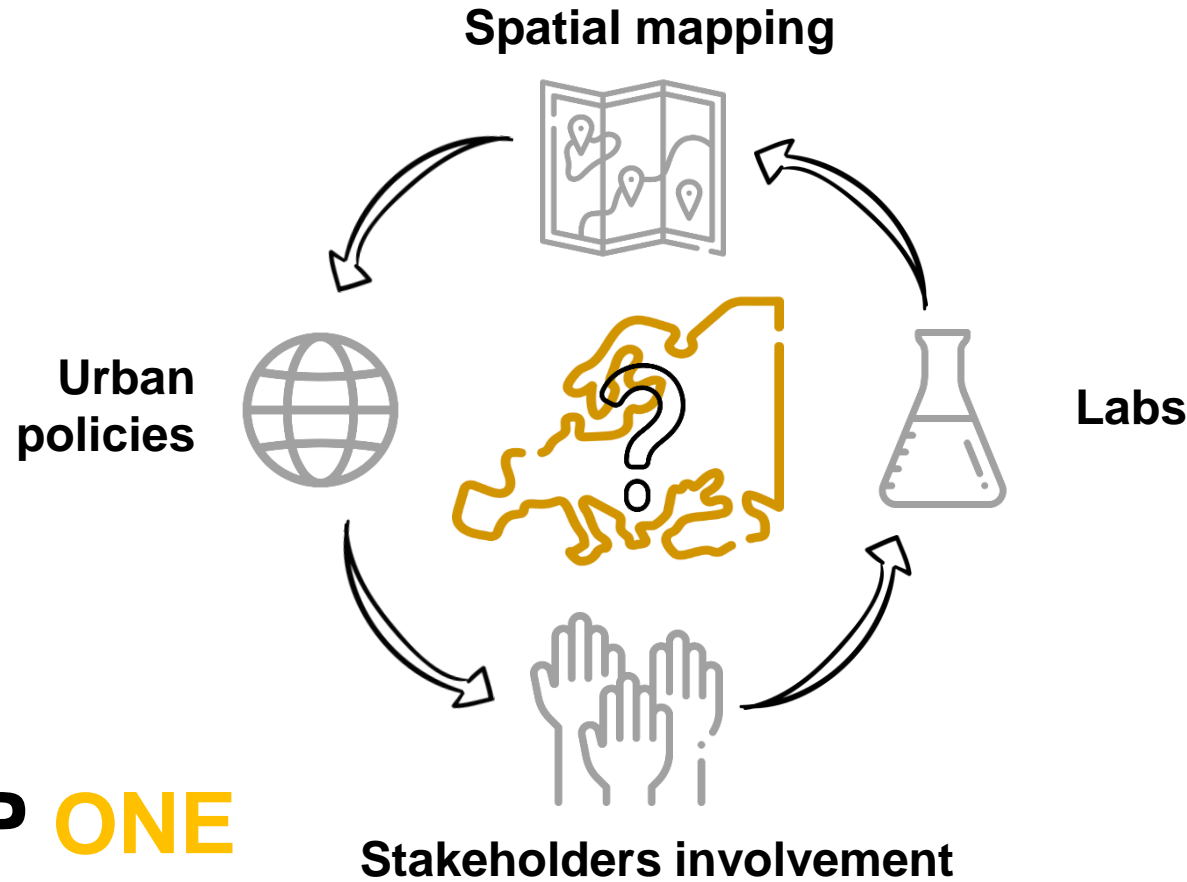

A support for **decision making**

The ERA consists of:

- ☐ 2 workshops (November '21 + February '22)
- ☐ one final report

## WORKSHOP ONE

Which is the state of the art internal to the **European Commission** on such topics?

## WORKSHOP TWO

Which is the state of the art at a **world level** in such topics?

# POOL OF EXPERTS AND THEIR EXPERTISE

## Stakeholders' involvement

- Stakeholders' participation
- Co-definition of topics and innovative outcomes

## Labs methodologies

- Experimental workshop techniques
- Previous workshops analysis and description
- From strategy to project. Political and economic limits in urban design

## Data analysis and visualisation

- Data collection/transfer
- Data combination and scenarios assessment
- Data trans-scalarity
- Innovative methods of communication and sharing of results

## Urban policy cycle

- Collection of existing urban policies/regulations
- Qualitative and quantitative data integration for a policy re-formulation
- Urban analysis translation to inform urban policies
- Trans-scalarity in urban policy

# PARTICIPATORY PROCESS FOR URBAN INCLUSION

Eleni Katrini

AIMING FOR INCLUSION

DEFINE THE SCALE OF INVESTIGATION

EXPANDING KNOWLEDGE TO A WIDER AUDIENCE

- Who are the key stakeholders?
- which scale is a dive deep enough
- How do knowledge & data become accessible to different audiences?

Stakeholders' involvement

Labs methodologies

# MAPPING DYNAMICS IN CITIES

Frenzi Ritter

Gerard Roemers

PARTICIPATORY STAKEHOLDER MAPPING

CONVENING STAKEHOLDERS

- Holistic stakeholder maps are crucial to further prioritize whom to engage
- Find the best way to keep stakeholders engaged

## DATA, SPACE AND SCIENCE STORYTELLING

Fábio Duarte

SENSOR, DATA AND VISUAL STORYTELLING

DATA VISUALISATION AND STORYTELLING

LABS METHODOLOGIES

- Data visualisation is a powerful method that combines the precision of scientific knowledge with the engagement of storytelling.

## MAKING SPACE MATTER

Luis Angel Flores-Hernandez

WHY SPACE MATTERS

LEARNING FROM THE GROUND

- Space is not just an entity to analyse, but a medium to intervene, transform and instigate change

Data analysis and visualisations

## MAPPING DYNAMICS IN CITIES

Frenzi Ritter

Gerard Roemers

THE SPATIAL DIMENSION OF COMPLEX URBAN DATA

- Cities are highly complex systems that are often conceptualized as multi-layered environments

## MULTIDIMENSIONAL DATA AND INTER-SCALAR LEARNING

Marina Alberti

MULTI-SCALAR SYNTHESIS AND LEARNING

- A CityLab's multiscalar approach will allow to map the transboundary flows that define the local-regional interdependencies

# URBAN POLICY IN EUROPE - FOUNDATIONS, DEVELOPMENT AND OPPORTUNITIES

Lea Scheurer

THE URBAN DIMENSION  
OF EU POLICIES

RECENT URBAN POLICY  
MILESTONES

MAKING SCIENCE FOR  
POLICY WORK

- One of the main objectives of the CityLabs is to translate scientific results into valuable information for policymakers at various scales?
- A profound understanding and consideration of cities is crucial today – both scientifically and in (European urban) policymaking

Urban policy cycle

# MAKING SPACE MATTER

Luis Angel  
Flores-Hernandez

URBAN POLICY  
CYCLE

- Space matters, as it provides unique inputs for policy formulation, implementation, and impact, impossible to obtain from other kinds of datasets
- Spatialisation provides a vantage point to delve into a whole range of existent conditions

# Space Matters

workshop

## Experts

## Roundtable

## Experts

## Collective

## Collective

# STRUCTURE OF THE **FINAL REPORT**

## 1. Introduction

## 2. State of the art inside the Commission

- I. Urban data analysis and visualisation (Patrizia Sulis)
- II. Existing labs for innovative interactions (Sjoerdje van Heerden, Maria Alonso Raposo, Biagio Ciuffo, Stefano Tarantola)
- III. Citizens and stakeholders' engagement (Tessa Dunlop, Ângela Guimarães Pereira)
- IV. Potentialities to align scientific spatial analysis to urban policies (Pia Laurila, Giulia Testori, Silvia Iodice)

## 3. Contribution by external consultants

- I. Participatory process for urban inclusion (Eleni Katrini)
- II. Making space matter (Luis Angel Flores Hernandez)
- III. Mapping dynamics in cities (Frenzi Ritter, Gerard Roemers)
- IV. Data, space and science storytelling (Fábio Duarte)
- V. Multidimensional data and inter-scalar learning (Marina Alberti)
- VI. Urban policy in Europe - foundations, developments and opportunities (Lea Scheurer)

**The CityLabs  
methodology**

# WHAT'S NEXT?

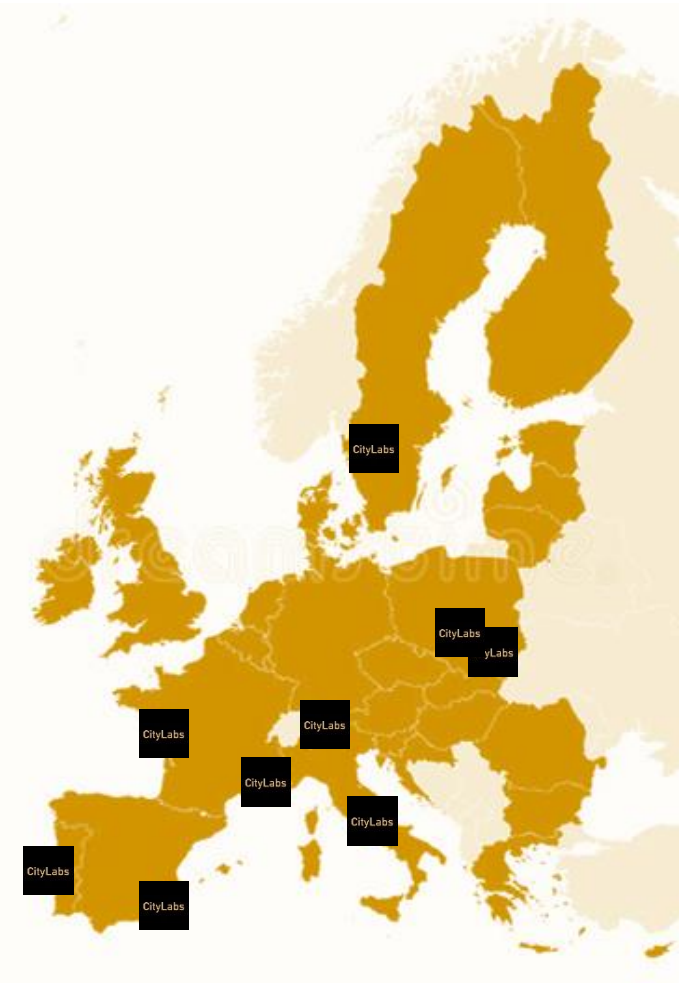

## Testing phase

□ Different situations may arise

- A CityLab is organized in partnership with specific stakeholders
- An agreement is created with a specific city (Memorandum of Understanding)
- The same CityLab is tested in multiple cities on the same topic
- ...

Each case is different!

# [SPACE MATTERS]:

## How to develop a common methodology for CityLabs
