THE CONSORTIUM

	Country	Beneficiary	Role
1	Norway	Norwegian Smart Care Cluster	Leader
2	Belgium	Flanders Health tech	Partner
3	Germany	DFKI	Partner
4	Italy	San Raffaele Hospital	Partner
5	Portugal	IPN Coimbra	Partner

- All partners with ongoing processes for guaranteeing co-funding/national commitment
- One partner slot available: desirable commitment already in place and prior experience in testing and validation

HEALTH & CARE CONTEXT

- Covid pandemic highlighted need for greater effectiveness, resilience and sustainability
- Opportunity to make use of digital transformation
- Need for providing wider access to AI-based technology for SMEs
- Link up with announced European Care Strategy

COMPETENCE OF CONSORTIUM

- Complementarity
- Already existing TEFs coupled with strong ecosystems and other digital health innovation initiatives
- Established processes & systems to collaborate with small & large clients
- Facilitator with long-term experience of managing complex, impact-oriented partnerships
- Established relations with NFAs with envisaged commitment letters by end of January 2022

EMERGING PROJECT IDEA

- Create an integrated, stable European-wide network for "go-to-pilot" and "go-to-market" R&D process;
- Serve as a one stop shop for SMEs, Start Ups and RTOs to test and validate their solutions
- Improve the testing and experimentation processes and systems of each partner and of the network
- Unique combination of expertise, infrastructure, RWD, synthetic data and living labs/clinical settings
