

Educational materials for preschool and primary school teachers, including the **mobile application**, developed by the University of Gdańsk in consultation with 6 European BirdLife Partners are part of the outputs of the Erasmus+ international project “**EMPOWERING TEACHERS AND PUPILS FOR A BETTER LIFE THROUGH NATURE**” and are specially adapted for each of 6 participating countries i.e. Poland, Slovakia, Spain, Ireland, Czechia and Macedonia.

Moreover, from 2nd to 7th July 2017 in Ireland 60 preschool and primary school teachers were hosted for an environmental education training course as part of the project’s activities. The workshop sessions were conducted using a set of the above mentioned, specially-produced educational materials, developed under this project. The entire course was also professionally filmed, with a view to disseminating the contents to a much wider audience via YouTube, again entirely free of charge and to serve as a video tutorial for those wishing to extend their knowledge on nature education through birds.
