Basque Talent Observatory is the world's first public access platform for monitoring the highly qualified labor market in the region. This is an initiative carried out by Bizkaia Talent together with TabulaeX, based on a tool that analyzes the Basque labor market focused on highly qualified professionals through the analysis of Big data from multiple online sources.

- **For citizens:**
  The dashboards within this section analyse basic information on web labour market from the vacancies active in the last 12 months.
Career Development Centre

The career development centre is the best place to start your new career from, checking tendencies and taking into account how the Basque labor market is moving on.

Here we have organised all the data you gave us about your education and professional life, so we are able to show you the best options and job offers for you from our network, the BBTN. You will also find some specific data according to your sector.

It’s time to keep growing. Let’s do it!
Improve your skills

Here you have the skills that you have filled in your profile, but we indicate some other skills that are the most demanded by organisations. Remember you can also add more in your profile.

Congratulations! You have one or more skills that are among the most demanded. We have highlighted it with a green border.

Demand in the market related to your current skills *

- Last year
- Current year
- Incremental/Decremental market demand tendency
