**Urban Development Network**

Sustainable Urban Development in Italy

Rome, 12-13 June 2018
Horizontal principles

- Shared care of urban commons
- Participation and Involvement
- Integration of different source of funding
A new paradigm
Public administrations governing not only on behalf of citizens, but also with citizens

Bologna citizens are involved in the life of their city thanks to an ancient tradition in the field of public participation. Over the last 10 years Bologna has tried to experiment new ways of listening and involving different actors in a participation process.
“City Regulation for the Care and Regeneration of Urban Commons”

Active citizens willing to work for the general interest can enter into a co-design process with the city, leading to the signing of “Collaborative Pacts for the care or regeneration of urban commons”: public spaces, urban green spaces and abandoned buildings or areas, but also immaterial goods as social inclusion, gender gap, widespread culture, digital divide and urban creativity.
245 Pacts since 2014
12% citizens; 5% committees, social streets; 52% associations; 24% economic actors; foundations
The Urban Development Network

"Collaborare è Bologna" Project

- 6 meetings in the 6 districts to share ideas and projects for the future city. Citizens have been asked to fill in a form where they had to highlight the priority actions to improve the quality of life of their territory.

- Data dissemination. The results have been collected and data have been given back to citizens.
The UIP could be considered as a natural progression of “Collaborare è Bologna” and seen as a vision to build up all together the Urban Agenda and to contribute to the Metropolitan City Strategical Plan.

Main objective is to develop the projects and proposals arised during the “Collaborare è Bologna” process and make them a reality in the next years.
The Urban Development Network
Inspire, innovate and exchange

UIP: map

http://www.urbancenterbologna.it/component/content/article/42-urbancenter/1504-piano-per-l-innovazione-urbana-luoghi-temi-obiettivi?Itemid=480
The UIP is supported by **European projects and programs** also, most of them conceived and implemented through a co-design process and mostly linked to the priorities of “Collaborare”.

**ESIF**: NOP Metropolitan cities, Salus Space (UIA), Open Lab (ROP ERDF Axis 6)

**EU Direct Funds**: ROCK (Horizon 2020)
ESI funds and multi-level governance

- **Co-design process between EU, member state managing authorities and cities:** local challenges selected through a **partnership** attended by the city Mayors, the National Association of Italian Municipalities (ANCI), the Regions concerned and the relevant Central Administrations.

- Buildings (renewal and redevelopment - ERDF) were chosen on the basis of “Collaborare” outcomes.

- Social innovation actions (ESF) are chosen by a co-design process implemented through **neighborhood workshops.**
NOP Metro Bologna

A **participatory and bottom-up path** involving stakeholders and citizens in the definition and implementation of PON Metro measures, with special reference to social innovation actions.
ESI funds and multi-level governance

- **Urban Lab meetings** to share strategies and objectives between Managing Authority and 10 cities;
- Meeting with experts to face common issues and possible solutions;
- ‘Anteprima Labs’ co-project process in collaboration with University of Bologna – Architecture Dept.
€ 1 million allocated to provide extraordinary maintenance and reorganization of spaces in 6 specific areas.

- 1° step: collection of citizens' proposals.
- 2° step: on line web voting
  - >16 years old;
  - people working in Bologna.
Neighborhood Workshops
Bottom-up approach in selection of urban development operations

Neighborhood Workshops have been activated in the 6 districts, under the central coordination of Urban Center Bologna - Civic Imagination Office. Main goal is to create proximity spaces and stable collaboration processes through co-design participatory paths focusing on specific district areas.

2017 goals:
- Define priorities within the resources of the participatory budget.
- PON Metro: co-design of development lines.
Thank you for your attention!
