## How to better exploit all that material?

Let us answer together some questions:

**-Material is nice and attractive but is uploading to only our and your websites enough to make us feel that the message is largely disseminated?**

**-If no, who else could promote this material?**

### Need for third parties endorsement

**-Mapping: What other multiplier could be warned and be associated?** It is up to you

**-Easing the use of our material: How we could enable their easy association to our effort?** *We will try to help you*
