

INFORM – REGIO against disinfo – workflow

The workflow aims to set a clear collaboration scheme between the INFORM network and DG REGIO in reacting to online disinformation (myths, fake news) on cohesion policy. The guiding principles are:

- ensure a rapid reaction (maximum 1 hour);
- be proportional (the reactions must match the intensity and gravity of the disinformation);
- delegate to the appropriate level of response.

We aim to react fast to online news articles and reports, social media posts and comments from public figures.
