I. Information on the major projects adopted on 2 April 2019

Project Title	Sector	Total Project cost (EUR)	EU funding (EUR)
1 PUBLIC SECTOR NETWORK "SYZEFXIS II"	ICT	173,412,666	134,834,661
2 AC INTERCONNECTION CRETE - PELOPONNESE	Energy	441,956,665	94,720,370
	Total	615,369,331	229,555,031

Project descriptions:

1. Public Sector Network "Syzeftis II"

The overall objective of the project is to improve the telecommunication infrastructure of the existing public administration network with lower costs. This project, expected to be completed in 2023, will benefit 600,000 civil servants in 34,000 premises as well as the whole Greek population with valuable e-Government services supporting administrative reform and bringing increased transparency to the functioning of the public institutions.

2. AC Interconnection Crete - Peloponnese

The purpose of the project is the construction of electricity interconnection between the island of Crete and peninsula Peloponnese. The Project includes: **two new submarine cables** with the length of **135 km each** (making it the longest subsea alternate current interconnection in the world); upgrades of the existing - and construction of new - transmission lines, underground cables and substations in the Peloponnese and Crete, and static synchronous compensator on Crete. This EU investment, implemented between 2018 and 2020, will decrease the electricity generation costs in Crete by replacing expensive oil fired generation units with more efficient generation from mainland Greece, providing for 34% of Crete's total electricity demand in 2021.

II. Information on all major projects approved in Greece in 2014-2020 programming period
