

Data Quality Synchronising data transfer: SFC2014 Webservices

Jukka Himmanen / Project Manager SFC2014 – SFC2021

# What are "web services"?

- A web service is defined as
  - A software service used to communicate between two devices on a network. More specifically, it is a software application with a standardized way of providing interoperability between different applications. It does so over HTTP using different technologies (XML, SOAP, WSDL, and UDDI).
- Allows data synchronisation: linking databases allowing automated transfer
- Eliminates the risk of manual encoding errors in the transfer
- Requires very specific IT skills
- Needs continuous update/maintenance to match the evolution of the databases being synchronised

### => Involve your IT specialists

## **IT technical issues**

Profile:

- Determined by National data system (s)
- Familiarity with webservices
- DATA Synchronisation will require continuous maintenance it is not a one off (i.e. changes in templates)
- On SFC side the documentation and an API is available, but <u>active</u> <u>support will be strongly limited in 2021 due to the technical team is</u> <u>currently focused with the changes required associated to REACT-EU</u> <u>and the launch of the new SFC2021</u>
- Some Member States already have implemented several webservices, it is adviced to exchange best practices
- With right expertise, time investments and available documentation it is possible

ommission

### What "objects" can benefit from web services in SFC2014?

We are in the "mature" part of the period as we close 2020.

Our recommendation is to focus only on areas with highest return on invesment:

- Financial Data
- Implementation Report

## **Accessing SFC2014 Webservices**

About Europa site |Europa site legal notice |Contact us |IT security & Privacy notice |English (en) Welcome, walshjo Q Search 2014 period SFC SUPPORT PORTAL System for Fund Management in the European Union ropean European Commission > SFC > 2014 SFC2014 SFC2007 **MvSFC** About SFC2014 News Support Materials MS Support Materials EC Support Contact Anti-Fraud Support Materials MS Search Support Materials MS Here you can find documents, FAOs and video guides on SFC2014 for Member State users. General SFC2014 Access Documents Strategic Planning Application (EGF) SFC2014 General Introductory powerpoint hands-off training for Member 26 - Aug - 2016 Programming Training for MS State users Monitorina Execution Final Report (EGF) F.A.O Employment Status (EGF) Audit Why is SFC2014 not displayed correctly? Evaluation Closure The Object is Validated (in status 'Ready to Send') but it is not possible to Send it DUItilities I have added a document but the Commission cannot see it, what can I do? Why can't I see a link to Delete an Object (OP, Payment, etc.)? MySFC I always get a Communication problem error and cannot access SFC2014. What should I do? - DGHOME - MS Liaison Area 2014 I have sent a document by mistake, can I delete it? - WebServices Section - EAFRD Reports I cannot fit my text within the character limit of the text box, what can I do? Only for registered Users. What languages are supported in SFC? How can I be sure that my data is submitted/sent to the Commission? What is the document Size Limit and restrictions for file formats in SFC2014?

**STEP 1**:

### Email =>

<u>ec-sfc2014-</u> info@ec.europa.eu

*to register as webservices users* 

*SFC2014 provides technical documentation on webservices for IT specialists* 

# Contd .../

**STEP 2**: Complete the certification process (for verification of connection of national systems)

**STEP 3**: Prove that you can work with the Webservices in the SFC2014 Acceptance environment prior to connecting with the web services in the Production environment of SFC2014

### STEP 4: Go live !!

- ES example (2019)
- There is complete MS Liasion list
- Currently some programmes (ES, IT, DE, SI) are using WS

# Next period 2021-2027

- Intention was to offer next generation Webservices up front at the same that the Web version but the tight deadlines ahead and the fact that negotiations associated to REACT EU and CPR are still going on might jeorpardise this approach (at least at the beginning of the period)
- Requires additional developments (as compared to SFC2014)
  - SFC2021 webservices refer to a complete different data model
  - SFC2021 web services will use different technology (REST) than SFC2014.
