

Evaluation Network

05-06 October 2023, Albert Borschette Conference Centre,
Brussels

DG REGIO – UNIT B2

Agenda – Friday, 06/10

- 09:30 – Innovative Evaluation Practices
- 10:10 - Cohesion Open Data update
- 10:15 - Current monitoring challenges – Tour de table
- 10:45 - Coffee break
- 11:15 - 2021-2027 Data transmission update
- 11:45 - SFC2021: Exploring the Latest developments with web service
- 12:30 - AOB

Innovative evaluation practices

Viktoria Bolla, Team Leader, Unit B.2, DG REGIO
Tillmann Heidelk, Unit B.2, DG REGIO

1. How do you evaluate your evaluations? Do you have regular reflections on what elements of your evaluation design and methodology are still fit for purpose or would require improvement?
2. What aspect of your evaluation activities did you consider needed a new approach during the design and planning of your 21-27 Evaluation Plans?
3. How do you collect data, especially for counterfactual analysis? And what type of data do you collect?

Cohesion Open Data update

Education, JTF, Latest Data updates

Caterina Scarpa, Lucian Luca, Giulia Olivieri, Philip Engles, REGIO B.2

Cohesion Policy Support for education, training and skills development

- EUR 33.6 billion (EU planned amounts)*
- EUR 48.2 billion (Total planned amounts)*

* *Based on directly-relevant intervention fields across all POs*

Cohesion Policy Support per Member State

Cohesion Policy support for education and training per MS (EU and total amounts)

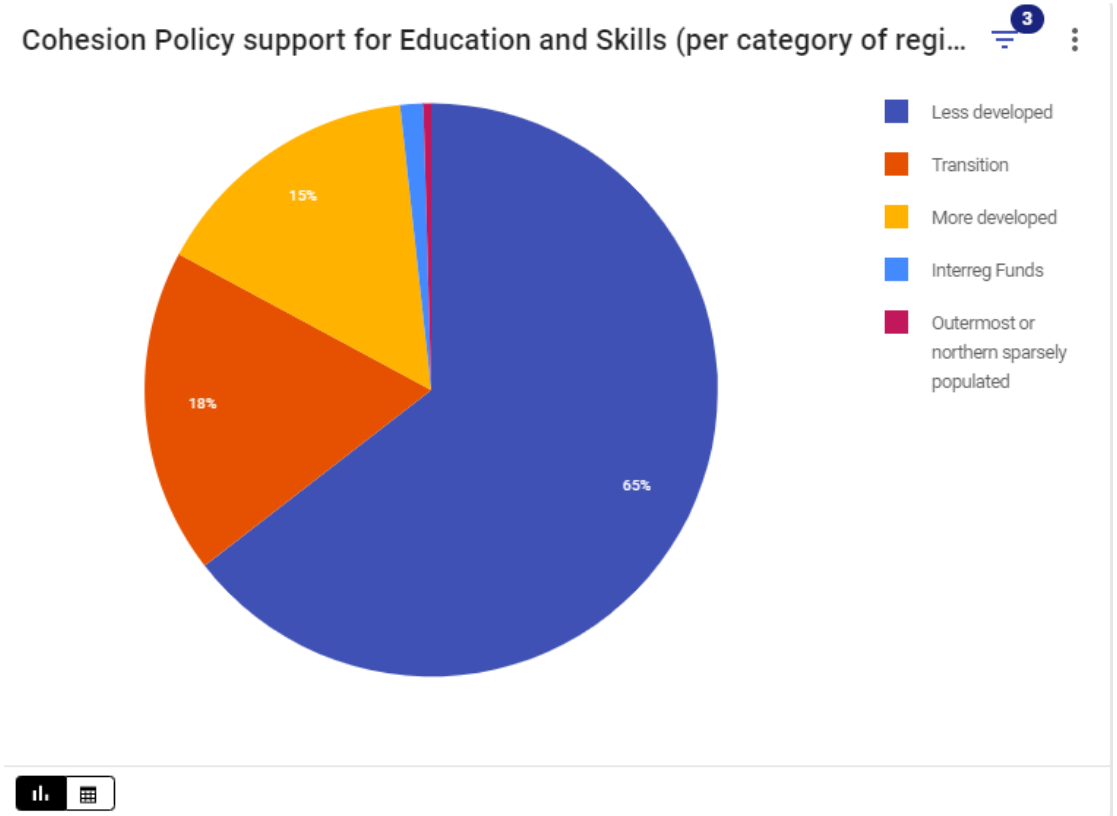

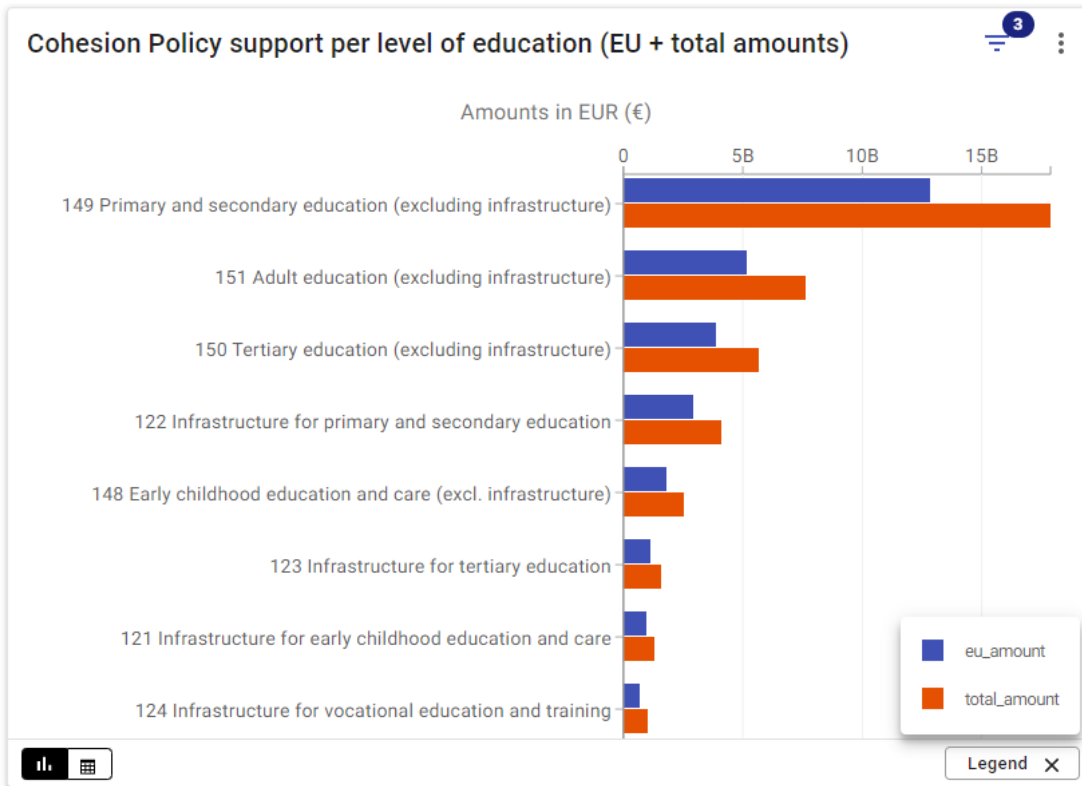

2

7

*Based on directly-relevant intervention fields across all POs

Cohesion Policy per type of region/level of education and training

Closer look into support under RSO4.2

ERDF

Amounts in EUR (€)

Interreg

Output and Results (2029 targets)

Classroom capacity in:

- **new or modernized educational facilities (RC067):** close to 3,3 million persons
- **new or modernized and childcare facilities (RC066):** around 493 thousand persons

Annual users of :

- **new or modernized educational facilities (RCR71):** 4,558,850 persons
- **new or modernized and childcare facilities (RCR70):** 587,163 persons

Just Transition Fund: leaving no region behind in the climate transition

A new fund in the Cohesion Policy family

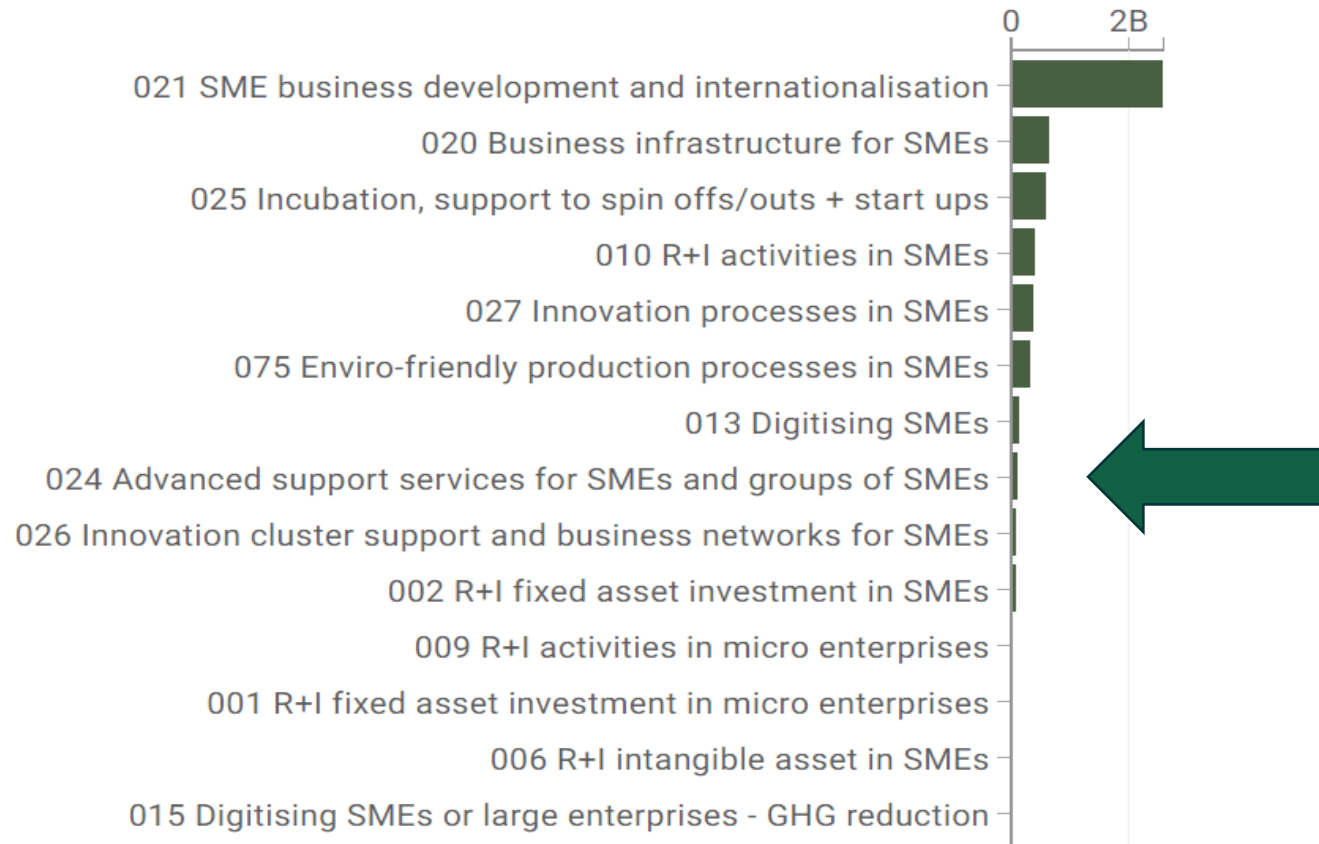

- The Just Transition Fund (JTF) is one of the most striking and visible aspects of the 2021-2027 period of Cohesion policy. The JTF is part of the [Just Transition Mechanism](#), created to make sure that **no person and no region is left behind** in the climate transition.
- To support the climate transition, for example through energy efficiency or renewable energy, the ERDF and the Cohesion Fund are the **primary investment instruments**. The JTF, on the contrary, specifically aims to help the people and places that suffer the most from the transition to climate neutrality. It is therefore more targeted – both geographically and thematically – than other cohesion policy funds.

- In combination **with national co-financing**, **EUR 25.4** billion is currently available from the adopted JTF programmes to support necessary investments.
- **The main objective of the JTF is to alleviate the impacts of the transition in the most affected territories.** _The main objectives of the JTF are to **diversify local economies** and to **reskill and upskill workers and jobseekers.**

- For this, are you seeing different tables with different type of investments: in total we profile four different type of investments.

JTF EU allocations to SME support - by country...

The first one is “investments help people find new skills and reinvent the local economy”, where you can find SME support and Skills and Jobs.

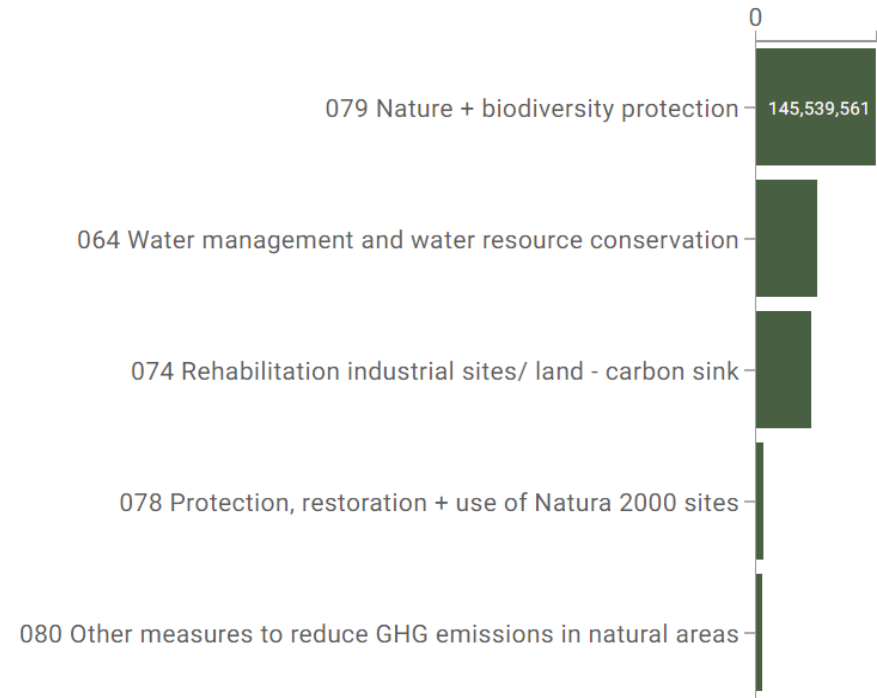

- The second is “clean energy, circular economy and innovation” where the field of interventions are more related on the green dimension like type of sustainable energies.

JTF EU allocations to Clean Energy - by country... ☰

- The third is investment in “Cleaning the environment” where field of interventions are related to Nature and Biodiversity or WWT.

JTF EU allocations to Regeneration of Sites- by... ☰

Next – update 2024

Implementation data - twice a year

2014-2020 Cohesion Policy Overview Funding Period 2014-2020

This page presents aggregated information on cohesion policy (European Regional Development Fund, Cohesion Fund, European Social Fund and Youth Employment Initiative) on finances (planned and implemented), EU payments made to the member states and achievements (targets, decided and implemented) for the period 2014-2020.

An aggregated presentation of the **European Structural and Investment Funds (ESIF) 2014-2020** is available on [this page](#).

Finances: Planned **Finances: Implemented** EU Payments Achievements

National and regional programmes report financial data to the Commission on their progress:

- Planned: Total budget of the programme
- Decided: Financial resources allocated to selected projects (project pipeline)
- Spent: Expenditure reported by the selected projects

The financial data reporting is expressed in total costs only (i.e. not broken down by the EU or national share). The data and charts below provide an approximation of the progress over time in investment effort. The data has limitations that are explained in [this data story](#).

2014-2020: Cohesion Policy financial implementation timeseries (total cost)

Current monitoring challenges

– Tour de table

John Walsh, Team Leder Monitoring, REGIO B.2

2021-2027 Monitoring Challenges

(Setting aside data transmission, SFC2021 web services)

- Tour de Table – Member States experts
- Concept of “selected operations”
- WP2 Data Preparation findings

Concept of “selected operation”

- **Programmes decide selection criteria and selection process** (competitive, administrative, etc.) (*CPR Art 40 + Art 73*)
- **Proposed operations are evaluated and grant offers are made** (letters, administrative decisions, other?)
- **Grant offers are accepted by project promoters**
- **Project monitoring system gathers the required data, at the latests when grant offer is accepted?** (Budget and categorisation codes, Output indicators forecasts and result indicator baselines and forecasts) (*CPR Annex XVII*)
- **Project is implemented, contracts procured, etc.** => regular monitoring updates to MA

REGIO WP2 – Data Preparation

- Final report : [Link](#)
-

2. STRUCTURE OF OPERATIONS MONITORING SYSTEMS	26
2.1 Different types of operations monitoring systems	29
2.2 Control mechanisms (i.e., data quality checks) by the MS	32
2.3 Reporting to the EC	37
3. QUALITY AND PLAUSIBILITY OF OPERATIONS MONITORING DATA	40
3.1 Key finding 1: Provision of plausible data by operations monitoring systems	40
3.2 Key finding 2: Lower accuracy in assigning the category of intervention data	41
3.3 Key finding 3: Only small and limited gaps in beneficiary data	43
3.4 Key finding 4: Differing interpretations and double counting can undermine comparability of achievements at operation level	44
3.5 Key finding 5: Aggregates reported in the AIRs are by and large plausible, meaning that they represent correctly what is included in the MS operations monitoring systems	47
4. RELEVANCE OF DATA AT EU LEVEL	58
4.1 Key finding 6: Different understandings or interpretations of definitions of operations influences level of detail and consistency of data at EU level	58
4.2 Key finding 7: Greater harmonisation at EU level could lead to improved data relevance for pan-EU assessments but at the same time may increase administrative burden	59

Figure 5: Use of control mechanisms in ERDF-OPs

Source: CSIL/Prognos/PPMI (2022): Information is based on interviews with MAs, desk research and experts' assessment, n=192-195. Question text: Which control mechanisms were in place to check data quality and completeness [...]?

Figure 6: Interview results on reporting errors commonly detected by control mechanisms

Source: CSIL/Prognos/PPMI (2022); information is based on interviews with MAs, desk research and experts' assessment, n = 106-181. *Question text: What were common reporting errors that were detected through the control mechanisms?*

Figure 8: Expected implications by changed reporting phases in the 2021-2027 period

Source: CSIL/Prognos/PPMI (2022); information is based on interviews with MAs, desk research and experts' assessment. n = 194-195. *Question text: Concerning the changes for the 2021-2027 period, what are the main implications resulting from changing the reporting phases to the EC to every three months?*

Key monitoring system challenges

- **High staff turnover:** difficult to retain high quality experts
- **Filling open vacancies:** labour market and time-consuming recruiting processes for expert staff the implementation of the operations monitoring system. In Latvia, it was also considered.
- **Budgetary constraints to employ expert staff** (e.g., data scientists, IT-experts): => outsourcing to external suppliers
- **Challenges in performing specific tasks:** Too few staff
- **External service providers as bottlenecks:**
- **Administrative challenges:** overlapping programme periods

2021-2027 Data transmission update

John Walsh, Team Leder Monitoring, REGIO B.2
Caterina Scarpa, REGIO B.2

Transmission of data – Article 42 CPR

- Essential information on the implementation
- Financial data
 - IJG: **31/1** 31/3 **31/7** 30/9 30/11
 - Interreg: **31/1** 31/3 **31/7** 31/10
 - ESF+ FEAD: Annual 31/1
- Achievement (indicator) data + Financial instruments
 - **31/1 + 31/7**

Article 42

Article 42

Transmission of data

1. The Member State or the managing authority shall electronically transmit to the Commission cumulative data for each programme by 31 January, 30 April, 31 July, 30 September and 30 November of each year, with the exception of the data required in point (b) of paragraph 2 and in paragraph 3 that shall be electronically transmitted by 31 January and 31 July of each year, in accordance with the template set out in [Annex VII](#).

The first transmission shall be due by 31 January 2022 and the last one by 31 January 2030.

For priorities supporting the specific objective set out in point (m) of Article 4(1) of the ESF+ Regulation, data shall be transmitted annually by 31 January.

The ESF+ Regulation may determine specific rules for the frequency of collecting and transmitting longer-term result indicators.

4. The data submitted in accordance with this Article shall be reliable and reflect the data stored electronically as referred to in point (e) of Article 72(1) as at the end of the month preceding the month of submission.

5. The Member State or the managing authority shall publish or provide a link to all the data transmitted to the Commission on the website portal referred to in point (b) of Article 46 or on the website referred to in Article 49(1).

Format of ToD

2. The data shall be broken down for each priority by specific objective and, where applicable, by category of region and shall refer to:
 - (a) the number of selected operations, their total eligible cost, the contribution from the Funds and the total eligible expenditure declared by the beneficiaries to the managing authority, all broken down by type of intervention;
 - (b) the values of output and result indicators for selected operations and values achieved by operations.
3. For financial instruments data shall also be provided on the following:
 - (a) eligible expenditure by type of financial product;
 - (b) amount of management costs and fees declared as eligible expenditure;
 - (c) the amount, by type of financial product, of private and public resources mobilised in addition to the Funds;
 - (d) interest and other gains generated by support from the Funds to financial instruments referred to in Article 60 and resources returned attributable to support from the Funds as referred to in Article 62;
 - (e) total value of loans, equity or quasi-equity investments in final recipients which were guaranteed with programme resources and which were actually disbursed to final recipients.

CPR Annex VII – Templates for ToD – Table 1

Overview of transmission of Table 2: cycle 2023-06 - 2/3

Overview of transmission of Table 2: cycle 2023-06 - 3/3

Article 42 - Key messages

- 2021-2027 transmission of data until end 2023 is being used to test SFC2021 input controls, BO reports and EC quality controls (no EC plans to publish)
- EC quality controls can lead to dialogue with programmes (re: correcting implausible values raising reputational risks)
- **The data transmission due by 31/1/2024 is targeted to be published in March/April 2024 on Cohesion Open Data**
- **Programmes have obligation to transmit data + should master the monitoring module in SFC2021**

SFC2021 Web Services

REGIO Eval Net – 6/10/2023

Jukka Himmanen – DG EMPL

Topics

- SFC2021 Web Services
- Where to get support

Automatic data transfer using Web Services

- Web Services is a technology to connect two IT systems to enable automatic transfer of data
- SFC2021 offers an interface that MS systems can use to submit data
- In principle all SFC2021 modules are be supported
- Requires initial development in the MS management system and also maintenance to support future changes

SFC 2021 WS – Key Improvements from SFC2014

- The SFC2021 allows earlier publication of web services compared to SFC2014, but for the moment the implementation of the web interface is the priority
- There is a separate service for each module (Partnership Agreement, Programme, etc.)

Available SFC2021 Web Services (In production)

- transmission-of-data
- partnership-agreement
- programme
- payment-application
- commission-decision
- annual-control-report (Not activated for AMIF, ISF, BMVI)
- prefinancing-request
- payment-forecast

SFC2021 Webservice uses REST

The SFC REST API enables you a the Data Store from any platform.

The REST API provides resources

- List, Create, Obtain & Modify
- Send resources to the commit
- Listen for events (acceptance

The Technology:

- Standard Rest API that uses PUT, POST and DELETE data
- Protected by EU login openID

Webservices on the SFC Support Portal

- In the Webservices section of the portal you will find:
 - Documentation related to the web services
 - List of available webservices and links to specific openAPI documentation
 - Additional resources
 - Sample application
 - Instructions on using a generator to create client API library based on openAPI

Documentation

- Currently there are three documents on the SFC Support Portal:
 - **SFC2021 WebService Guide**
A user guide to assist IT teams involved in SFC2021 Web Service development within the Member State.
 - **SFC2021-PM-330 Procedure to request a client certificate**
Procedure to request a client certificate required for host-to-host communication between local MS systems and the SFC2021 system via the Web Services.
 - **SFC2021-PM-329 Certificate Request Form**
A form for collecting information needed for a client certificate request.

Who to contact?

- Please contact the SFC support team ec-sfc2021-info@ec.europa.eu for all of your questions.

Why this survey?

OPINION

**WE CARE ABOUT
YOUR:**

NEEDS

INTEREST

**MAIN
CHALLENGES**

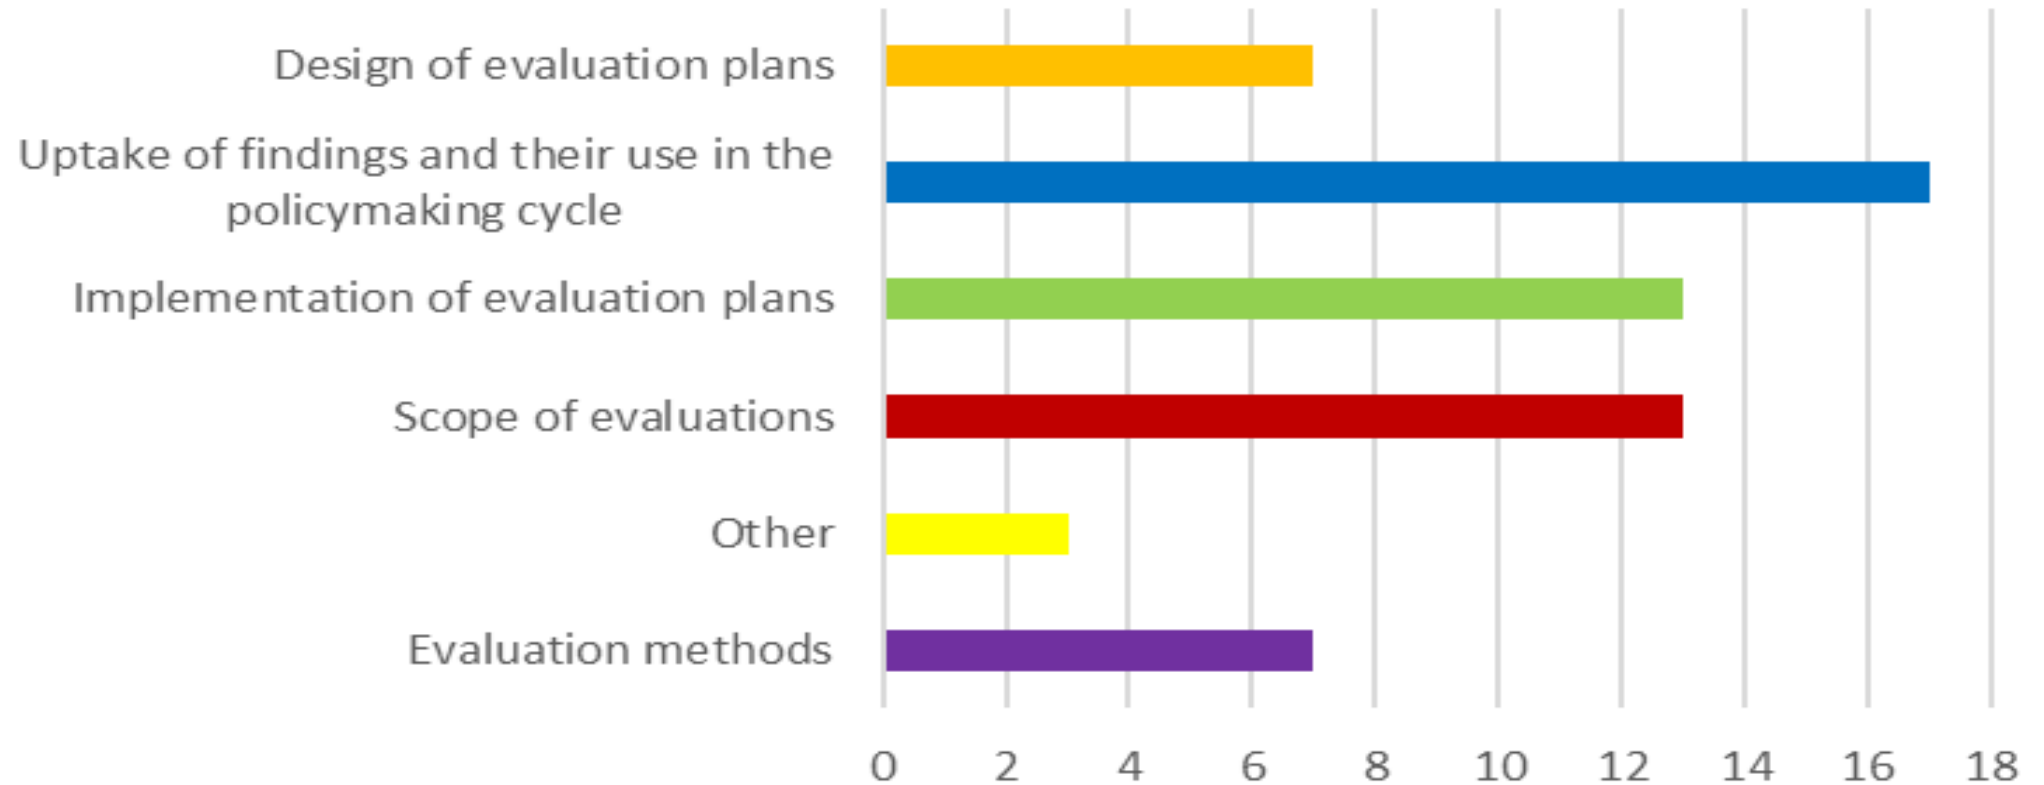

What do you see as main priorities for the Evaluation Network?

Please, give an order only to the priorities that are most relevant for you.

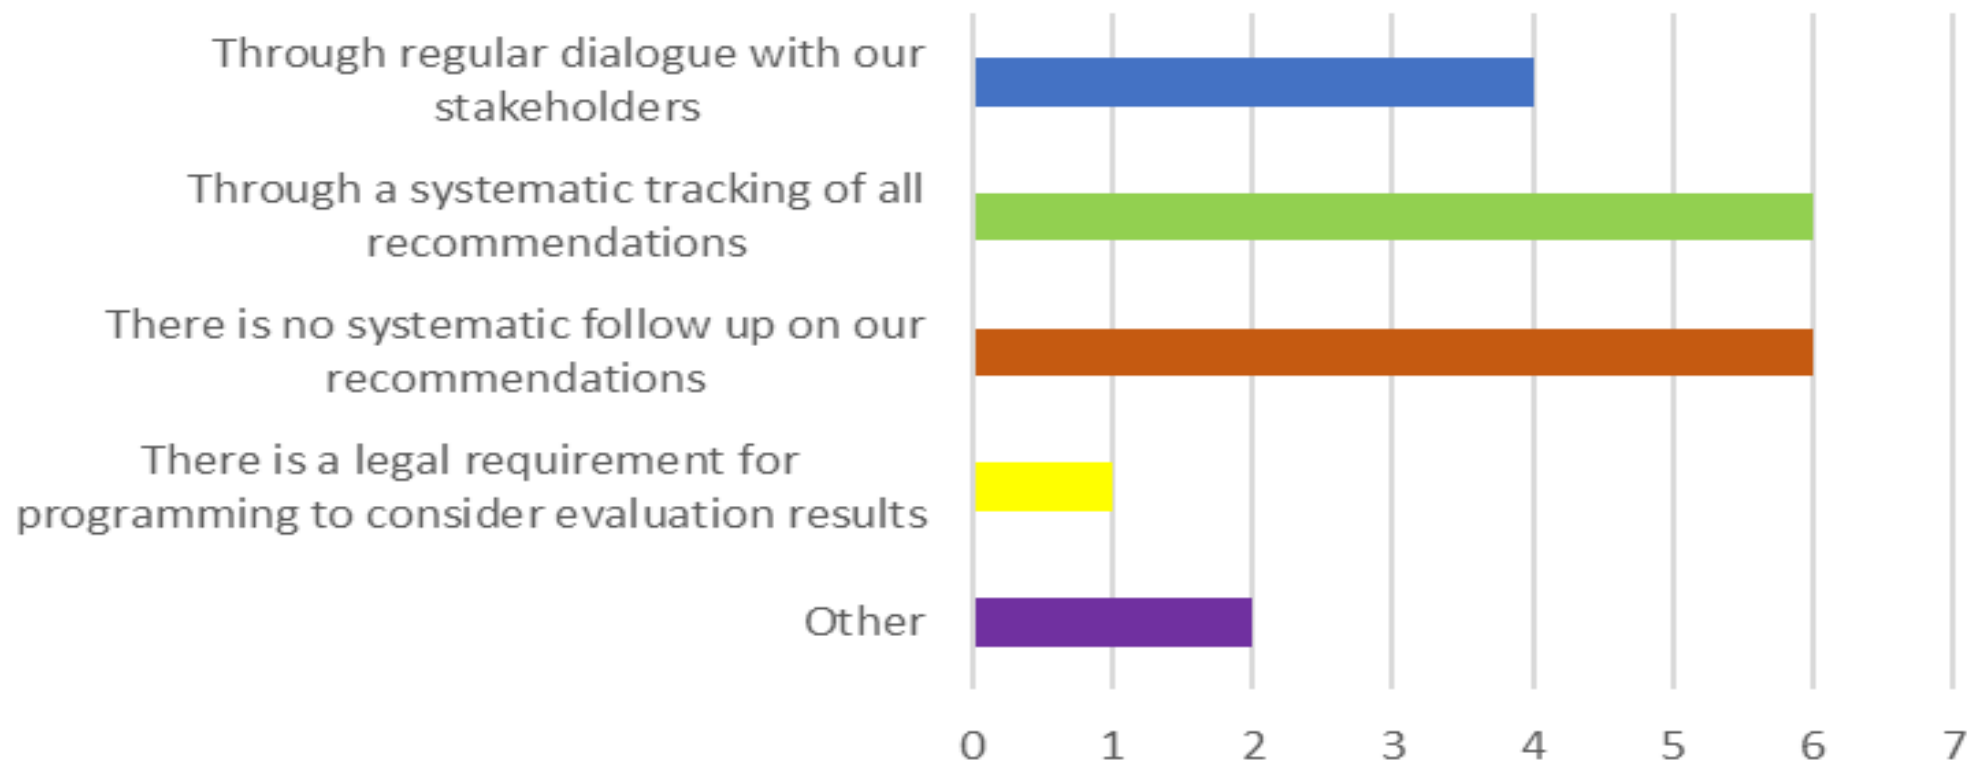

- Thematic evaluations, eg: Horizontal principles
- Ways to increase the use of evaluation
- Use of AI in evaluation process
- sharing good practice
- to communicate information from other EC groups/DGs that are relevant to evaluation
- Preparing FP 2028+ European Semester and CSP
- Guidance on evaluations

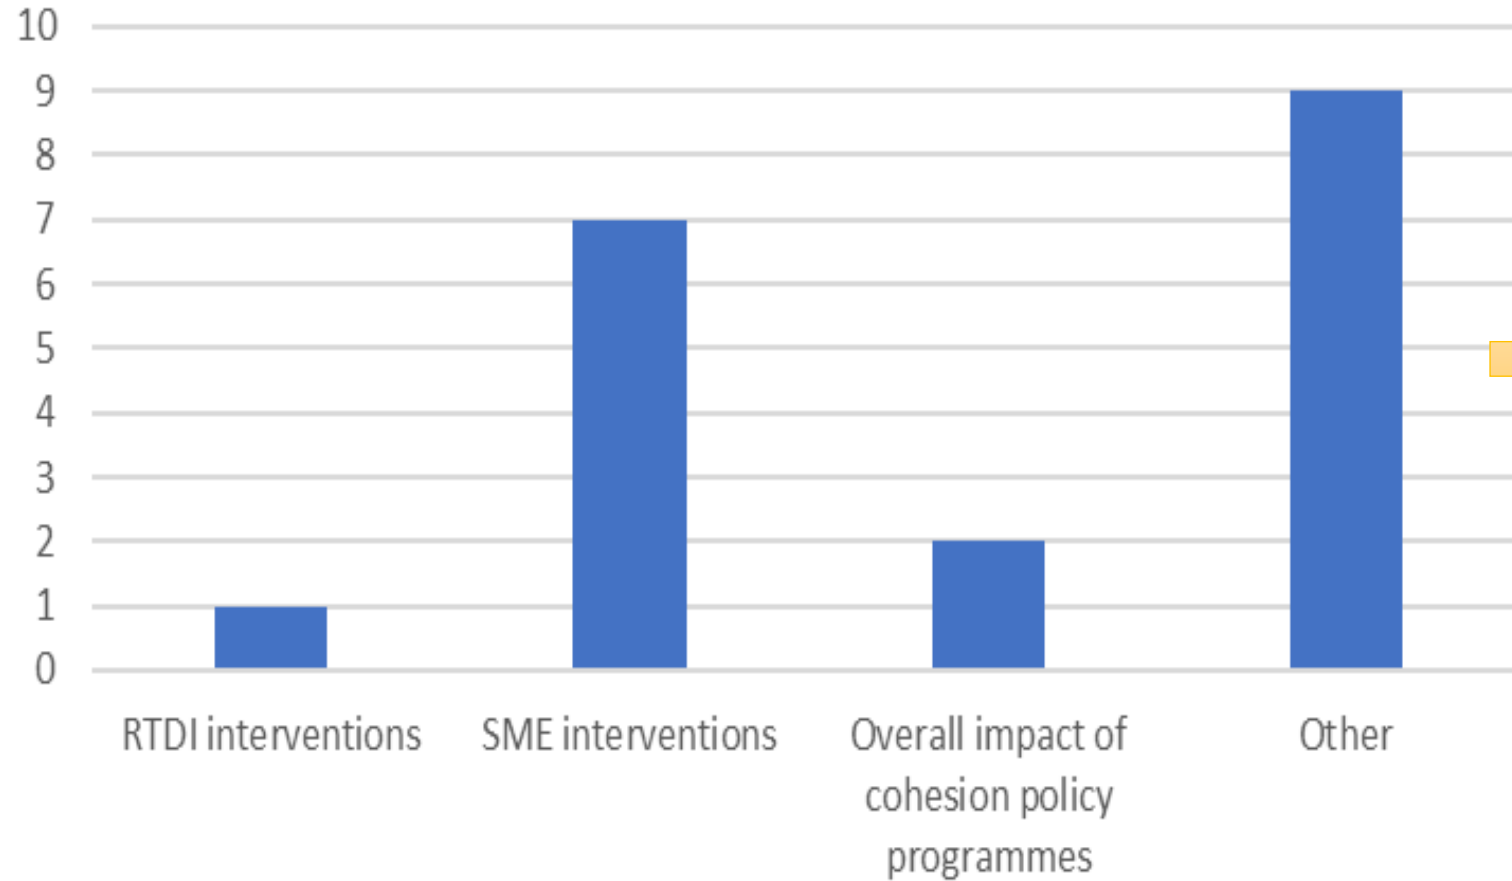

What are your the main challenges that you are facing on evaluation?

How do you follow up on evaluation conclusions and recommendations?

In what areas you find counterfactual analysis was the most successful to deliver result?

- Only use the **Theory-based evaluation.**
- **Poor use of counterfactual analysis** in impact evaluations

Did you / your managing authority undertake counterfactual analyses during the 2014-2020 programming period, or did you attempt it, even if unsuccessful?

- Yes, attempted and completed the evaluation
- Yes, attempted, but aborted / not completed
- No, it was planned but not implemented
- No, not attempted

Considering 3-4 meetings of the Evaluation Network a year, how many times would you like to meet in person?

■ 0 ■ 2 ■ 03-04 ■ 1
