

IMPLEMENTATION OF E-COHESION

General characteristics

DENMARK

No. of **targeted national/regional operational programmes** covering ERDF/CF: **1**

No. of **e-Cohesion systems**: **1**

At a glance:

e-Cohesion system: PRV (Projektrapporteringsværktøj)

Introduction of the system: Operational since 2016.

Type of the system: National system - it covers the only national OP and does not support any Interreg programmes.

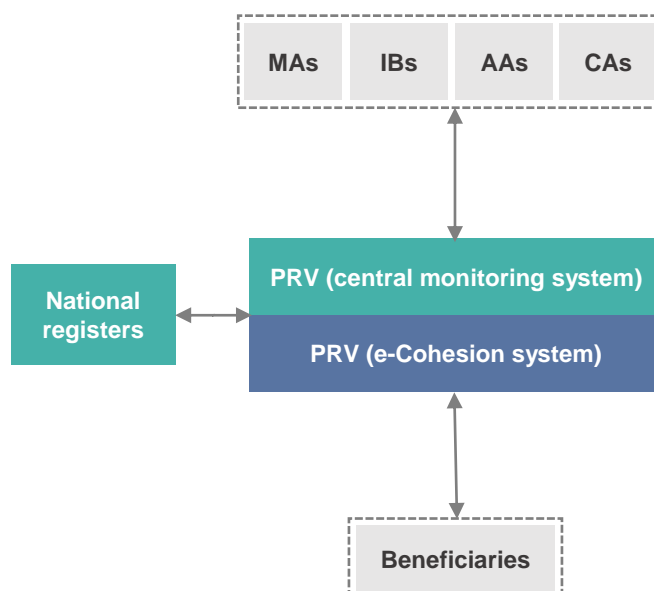

Implementation mode: Highly centralised.

Use during 2021-2027: Ongoing development (based on existing system).

Fund coverage of the system: ☒ ERDF ☐ CF

Context and structure of e-Cohesion

- E-Cohesion in Denmark is **highly centralised** - PRV is the only system used in the country and covers the only OP "Innovation and Sustainable Growth in Businesses. National Programme for the European Regional Fund – 2014-2020";
- PRV is linked with a **central monitoring system** and some **national/governmental registers**;
- PRV is not integrated with the **European Commission's System for Fund Management (SFC2014)**;
- PRV supports all key processes related to project implementation but does not support the application process, which is handled by a separate application portal;
- The use of PRV is not legally mandatory but it is the **officially provided solution** for project-management.

Implementation of e-Cohesion

Principles: Interoperability and once-only encoding

- PRV supports once-only encoding on the project-level:** Data and documents provided by beneficiaries are shared with all relevant authorities;
- While the system generally **supports the pre-filling of information**, not enough data is available to confirm which types of information are pre-filled and from which sources.

e-Cohesion features: Coverage of processes and functionalities

- PRV supports all operations related to project implementation** (progress reports, modification requests, payment claims and management verifications / on-the-spot checks) – the system does not support applications;
- PRV supports functionalities associated with user-friendliness** (interactive forms, automatic calculations, checks for incorrect/missing data, system-generated alerts, online status tracking, validity of e-signature and availability of previous data).

Please note that this fiche is not informed by the survey results. We did not receive enough responses, therefore, the information presented in this fiche builds on desk research and additional information received from relevant authorities.
